Jnr Class C62 Delmar Thomas C. Stawart,2011-09-01 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. C62 is a type of 4-6-4 steam locomotive built by the Japanese National Railways. The C classification indicates three sets of driving wheels. The C62 was built with a 4-6-4 frame, upon which was mounted the boiler of the JNR D52 class 2-8-2 locomotives. These were the largest and fastest steam passenger locomotives to run in Japan, and hauled the Tsubame express on the Tokaido Main Line between Tokyo and Osaka. Forty nine were built from 1948 to 1949. The last examples in regular service were withdrawn in 1973.

Inductors and Transformers for Power Electronics Vencislav Cekov Valchev, Alex Van den Bossche, 2018-10-03 Although they are some of the main components in the design of power electronic converters, the design of inductors and transformers is often still a trial-and-error process due to a long working-in time for these components. Inductors and Transformers for Power Electronics takes the guesswork out of the design and testing of these systems and provides a broad overview of all aspects of design. Inductors and Transformers for Power Electronics uses classical methods and numerical tools such as the finite element method to provide an overview of the basics and technological aspects of design. The authors present a fast approximation method useful in the early design as well as a more detailed analysis. They address design aspects such as the magnetic core and winding, eddy currents, insulation, thermal design, parasitic effects, and measurements. The text contains suggestions for improving designs in specific cases, models of thermal behavior with various levels of complexity, and several loss and thermal measurement techniques. This book offers in a single reference a concise representation of the large body of literature on the subject and supplies tools that designers desperately need to improve the accuracy and performance of their designs by eliminating trial-and-error.
