Designing the T-34 Peter Samsonov, 2019-12-27

When the German army launched Operation Barbarossa – the invasion of the Soviet Union – on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it “the finest tank in the world”. Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war’s most revolutionary tank design.

The Sharing Economy in Europe Vida

Česnuitytė, Andrzej Klimczuk, Cristina Miguel, Gabriela Avram, 2022-01-21 This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between

societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.

Sherman Tanks of the Red Army Peter

Samsonov, 2020-12-21 More than 4000 examples of the famous diesel-fueled M4A2 Sherman tank were sent to the Soviet Union during the Second World War under the Lend-Lease program. These American-built vehicles were operated by Red Army crews against the Germans during some of the bitterest fighting on the Eastern Front - yet despite serving with distinction and being well-liked by their crews, relatively little has been written about these vehicles until now. Tank expert Peter Samsonov looks at the origins of the M4A2 in Soviet service and the machines that were received from the US as well as providing a detailed assessment of how they fared in combat on the front line.

Italian Light Tanks Filippo Cappellano, Pier Paolo Battistelli, 2012-06-20 The Italian army, unlike those of the British and French, did not use tanks in combat during World War I and, by November 1918, only one training unit equipped with French Schneider and Renault tanks had been formed. Consequently, during the 1920s the Italian army had just one single tank type in its armoured inventory - the Fiat 3000. Only in 1927 was the first tank unit formed as a branch of the infantry and not as an independent organization, while the cavalry rejected the idea of both tanks and armoured cars and decided to stand by the use of horses for its mounted units. Between 1933 and March 1939, a further 2,724 CV 33 / L 3 tanks were built, 1,216 of which were exported all over the

world. By the time Italy entered the war in June 1940, the army had 1,284 light tanks, 855 of which were in combat units, including three armoured divisions. Variants of the CV 33 / L 3 tanks included flame-throwers, bridge-layers, recovery vehicles, and a radio command tank. Some L 3 tanks were still in use in 1945, by both the Germans and the German-allied Italian units of the Repubblica Sociale.

Italian Medium Tanks Filippo Cappellano, Pier Paolo Battistelli, 2012-12-20 Several factors delayed and greatly hampered the development of an Italian medium tank during World War II. The first was the strategic stance of the country, focussed on a war against neighbouring countries such as France and Yugoslavia, and ill-prepared for a war in the Western Desert. Since these European countries bordered with Italy in mountainous areas, light tanks were preferred as these were deemed much more suitable for the narrow roads and bridges of the Alps. Furthermore, development was hampered by the limited number of Italian industries, whose production was also heavily fragmented. All these factors delayed the development of the first prototype of an Italian medium tank - the M 11 - which would only appear in 1937 and did not enter production until 1939. Although technically inferior to their German and Allied counterparts in 1941-43, the Italian M tanks proved to be quite effective when used by experienced crews with adequate combat tactics. In fact, their major shortcoming actually proved to be their limited production figures. While production was limited, innovation was not and, between 1941 and 1943, several experiments were carried out on the Italian tanks that produced interesting prototypes such as the anti-aircraft semovente.

Plant Cell Division Marie-Cécile Caillaud, 2015-12-11 This volume aims to present a

large panel of techniques for the study of Plant Cell Division. *Plant Cell Division: Methods and Protocols* captures basic experimental protocols that are commonly used to study plant cell division processes, as well as more innovative procedures. Chapters are split into five parts covering several different aspect of plant cell division such as, cell cultures for cell division studies, cell cycle progression and mitosis, imaging plant cell division, cell division and morphogenesis, and cytokinesis. Written for the *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Plant Cell Division: Methods and Protocols* is a valuable tool for the study of plant cell division at both the cellular and molecular levels, and in the context of plant development.

The Italian War on the Eastern Front, 1941-1943
Bastian Matteo Scianna, 2019-09-09 The Italian Army's participation in Hitler's war against the Soviet Union has remained unrecognized and understudied. Bastian Matteo Scianna offers a wide-ranging, in-depth corrective. Mining Italian, German and Russian sources, he examines the history of the Italian campaign in the East between 1941 and 1943, as well as how the campaign was remembered and memorialized in the domestic and international arena during the Cold War. Linking operational military history with memory studies, this book revises our understanding of the Italian Army in the Second World War.

Walking in Their Boots Joanne

Tapiolas, 2017-12-24 Over 1500 Italian prisoners of war, captured in the battlefields of north Africa, came to Queensland during World War 2. The Italians provided a much-needed workforce for farmers throughout nine south-east Queensland districts. Additionally, 250 Italians worked at the Commonwealth Vegetable Farm on the Burdekin River, to supply fresh produce to the north's military forces. Queensland farming families welcomed the Italians onto their farms and into their homes. A temporary refrain from life behind barbed wire fences, friendships were forged and lasting memories remain clear over seven decades later. The Italian prisoners of war left their footprints in the landscape and in the memories of Queenslanders. *Walking in their Boots* traces the history of Italian prisoners of war in Queensland and tells the stories of a time when POWs worked on our Queensland farms.

The Battle of Bardia Craig Stockings, 2011-07-01 On the morning of 3 January 1941, Australians of the 6th Division led an assault against the Italian colonial fortress village of Bardia in Libya, not far from the Egyptian-Libyan frontier. The ensuing battle was the second of the First Libyan Campaign, but the first battle of the Second World War planned and fought predominantly by Australians. The fortress fell to the attackers a little over two days after the attack began, in what could only be described as a remarkable victory. At a cost of 130 killed and 326 wounded,

the 6th Division captured around 40,000 Italian prisoners and very large quantities of military stores and equipment. The victory was heralded at the time in Australia as one of the greatest military achievements of that nation's military history. Quite soon afterwards, however, overshadowed perhaps by Rommel's subsequent desert advances, the tragedy in Greece, and the war in the Pacific, Bardia slipped from the public mind. Very few Australians today have heard of the battle. This book attempts to bring Bardia back into the light.

Introduction to Natural Language Processing
Jacob Eisenstein, 2019-10-01 A survey of

computational methods for understanding, generating, and manipulating human language, which offers a synthesis of classical representations and algorithms with contemporary machine learning techniques. This textbook provides a technical perspective on natural language processing—methods for building computer software that understands, generates, and manipulates human language. It emphasizes contemporary data-driven approaches, focusing on techniques from supervised and unsupervised machine learning. The first section establishes a foundation in machine learning by building a set of tools that will be used throughout the book and applying them to word-based textual analysis. The second section introduces structured representations of language, including sequences, trees, and graphs. The third section explores different approaches to the representation and analysis of linguistic meaning, ranging from formal logic to neural word embeddings. The final section offers chapter-length treatments of three transformative applications of natural language processing: information extraction, machine translation, and text generation. End-of-chapter exercises include both paper-and-pencil analysis and software implementation. The text synthesizes and distills a broad and diverse research literature, linking contemporary machine learning techniques with the field's linguistic and computational foundations. It is suitable for use in advanced undergraduate and graduate-level courses and as a reference for software engineers and data scientists. Readers should have a background in computer programming and college-level mathematics. After mastering the material presented, students will have the technical skill to build and analyze novel natural language processing systems and to understand the latest research in the field.

Computational Materials Science June Gunn

Lee,2016-11-25 This book covers the essentials of Computational Science and gives tools and techniques to solve materials science problems using molecular dynamics (MD) and first-principles methods. The new edition expands upon the density functional theory (DFT) and how the original DFT has advanced to a more accurate level by GGA+U and hybrid-functional methods. It offers 14 new worked examples in the LAMMPS, Quantum Espresso, VASP and MedeA-VASP programs, including computation of stress-strain behavior of Si-CNT composite, mean-squared displacement (MSD) of ZrO₂-Y₂O₃, band structure and phonon spectra of silicon, and Mo-S battery system. It discusses methods once considered too expensive but that are now cost-effective. New examples also include various post-processed results using VESTA, VMD, VTST, and MedeA.

Spanish Civil War Tanks Steven J. Zaloga,2011-12-20 The tanks used during the Spanish Civil War are not often examined in any great detail, and are often labeled as little more than test vehicles in a convenient proving ground before World War II. But, with groundbreaking research, armor expert Steven J Zaloga has taken a fresh look at the tanks deployed in Spain, examining how future tanks and armored tactics were shaped and honed by the crews' experiences, and how Germany was able to benefit from these lessons while their Soviet opponents were not. Based on recently uncovered records of Soviet tankers in Spain and rare archival accounts, this book describes the various tanks deployed in Spain, including the PzKpfw I and the T-26.
