**Space Shuttle Missions Summary (NASA/TM-2011-216142)** Robert D. Legler,Floyd V. Bennett,2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically as flown data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

**Saturn V Flight Manual, SA 507** George C. Marshall Space Flight Center,1969

*The World Book Encyclopedia* ,2002 An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

**Amazing Stories of the Space Age** Rod Pyle,2017 Reveals the most unusual space missions ever devised inside and outside of NASA during a time when nothing was too odd to be taken seriously, and the race to the moon and the threat from the Soviet Union trumped all other considerations. --Publisher.

**Forever Young** John W Young,2012-09-16 He walked on the Moon. He flew six space missions in three different programs--more than any other human. He served with NASA for more than four decades. His peers called him the astronaut's astronaut. Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights, his two Apollo missions, the first-ever Space Shuttle flight, and the first Spacelab mission. Forever Young delivers all that and more: Young's personal journey from engineering graduate to fighter pilot, to test pilot, to astronaut, to high NASA official, to clear-headed predictor of the fate of Planet Earth. Young, with the assistance of internationally distinguished aerospace historian James Hansen, recounts the great episodes of his amazing flying career in fascinating detail and with wry humor. He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies. He frankly discusses the risks of space travel, including what went wrong with the Challenger and Columbia shuttles. Forever Young is one of the last memoirs produced by an early American astronaut. It is the first memoir written by a chief of the NASA astronaut corps. Young's experiences and candor make this book indispensable to everyone interested in the U.S. space program.

**Spacecraft** Michael H. Gorn,2018-09-04 Spacecraft takes a long look at humankind's attempts and advances in leaving Earth through incredible illustrations and authoritatively written profiles on Sputnik, the International Space Station, and beyond. In 1957, the world looked on with both uncertainty and amazement as the Soviet Union launched Sputnik 1, the first man-made orbiter. Sputnik 1 would spend three months circling Earth every 98 minutes and covering 71 million miles in the process. The world's space programs have traveled far (literally and figuratively) since then, and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period. This ambitiously illustrated aerospace history profiles and depicts spacecraft fromSputnik 1 through the International Space Station, andeverything in between, including concepts that have yet to actually venture outside the Earth's atmosphere. Illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to present a huge, profusely illustrated, and authoritatively written collection of profiles depicting and describing the design, development, and deployment of these manned and unmanned spacecraft. Satellites, capsules, spaceplanes, rockets, and space stations are illustrated in multiple-view, sometimes cross-section, and in many cases shown in archival period photography to provide further historical context. Dividing the book by era, De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union/Russia, but also from the European Space Agency and China. The marvels examined in this volume include the rockets Energia, Falcon 9, and VEGA; the Hubble Space Telescope; the Cassini space probe; and the Mars rovers, Opportunity and Curiosity. Authoritatively written and profusely illustrated with more than 200 stunning artworks, Spacecraft: 100 Iconic Rockets, Shuttles, and Satellites That Put Us in Space is sure to become a definitive guide to the history of manned space exploration.

**Assessment of Options for Extending the Life of the Hubble Space Telescope** National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Space Studies Board,Committee on the Assessment of Options for Extending the Life of the Hubble Space Telescope,2005-02-28 The Hubble Space Telescope (HST) has operated continuously since 1990. During that time, four space shuttle-based service missions were launched, three of which added major observational capabilities. A fifth "SM-4" was intended to replace key telescope systems and install two new instruments. The loss of the space shuttle Columbia, however, resulted in a decision by NASA not to pursue the SM-4 mission leading to a likely end of Hubble's useful life in 2007-2008. This situation resulted in an unprecedented outcry from scientists and the public. As a result, NASA began to explore and develop a robotic servicing mission; and Congress directed NASA to request a study from the National Research Council (NRC) of the robotic and shuttle servicing options for extending the life of Hubble. This report presents an assessment of those two options. It provides an examination of the contributions made by Hubble and those likely as the result of a servicing mission, and a comparative analysis of the potential risk of the two options for servicing Hubble. The study concludes that the Shuttle option would be the most effective one for prolonging Hubble's productive life.

**Preparing for the High Frontier** National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee on Human Spaceflight Crew Operations,2011-11-09 As the National Aeronautics and Space Administration (NASA) retires the Space Shuttle and shifts involvement in International Space Station (ISS) operations, changes in the role and requirements of NASA's Astronaut Corps will take place. At the request of NASA, the National Research Council (NRC) addressed three main questions about these changes: what should be the role and size of Johnson Space Center's (JSC) Flight Crew Operations Directorate (FCOD); what will be the requirements of astronaut training facilities; and is the Astronaut Corps' fleet of training aircraft a cost-effective means of preparing astronauts for NASA's spaceflight program? This report presents an assessment of several issues driven by these questions. This report does not address explicitly the future of human spaceflight.

**The Problem with Space Travel** Herman Noordung,1995-03 A translation from German of a 1929 treatise by the author. Deals with the problem of the space travel. Expresses ideas about rocketry and space travel. Extensive treatment of the engineering aspects of a space station. Extensive bibliography. 100 drawings.

**Dark Space** Marianne de Pierres,2014-04-01 The "ambitious" first Sentients of Orion novel. "Part Dune, part Gateway, part Alien, Marianne's new series looks like one to continue reading" (SFFWorld). On the arid mining planet of Araldis, Baronessa Mira Fedor finds herself on the run from the authorities, her life in tatters and her future stolen. Araldis itself buckles under the onslaught of a ruthlessly executed invasion. None of this is coincidence. The more Mira discovers about her planet's elite and the forces arrayed against them, the more things seem to point to a single guiding intelligence. Nothing that has happened to her or her world is an accident. But the intrigue is only beginning, as Mira must fight for her very own survival, or embrace the dark space that threatens to consume her. Don't miss the entire Sentients of Orion series: DARK SPACE, CHAOS SPACE, MIRROR SPACE, TRANSFORMATION SPACE.

**The Camel and the Wheel** Richard W. Bulliet,1990 Why, for many centuries, was the wheel abandoned in the Middle East in favor of the camel as a means of transport? This richly illustrated study explains this anomaly. Drawing on archaeology, art, technology, anthropology, linguistics, and camel husbandry, Bulliet explores the implications for the region's economic and social development during the Middle Ages and into modern times.

**NASA's Journey to Mars: Pioneering Next Steps in Space Exploration** National Aeronautics and Space Administration,2016-02-05 This document communicates NASA's strategy and progress to learn about the Red Planet, to inform us more about our Earth's past and future, and may help answer whether life exists beyond our home planet. Together with NASA's partners in academia and commercial enterprises, NASA's

vision is to pioneer Mars and answer some of humanity’s fundamental questions: • Was Mars home to microbial life? Is it today? • Could it be a safe home for humans one day? • What can it teach us about life elsewhere in the cosmos or how life began on Earth? • What can it teach us about Earth’s past, present, and future?

**Constellations of the Night Sky** Bruce LaFontaine,2003-05-19 Large, double-page illustrations introduce stargazers of all ages to 22 major constellations, among them Aquarius, the water bearer; Orion, the hunter; Gemini, the twins; as well as Canis Major, Taurus, and Leo. Accompanying text relates mythological story behind each constellation's name and identifies its principal stars.

*Mission Design & Implementation of Satellite Constellations* Jozef C. van der Ha,2012-12-06 The papers contained in this Volume of Proceedings have been collected from an international Workshop entitled 'Mission Design and Implementation of Satellite Constellations' which was held in Toulouse, France, in November 1997. This Workshop represented the first international gathering of the specialists in this currently very active field of research activity. The initiative to organise a Workshop around this theme was conceived during the Congress of the International Astronautical Federation (IAF) in Beijing, China, in October 1996. On that occasion, the IAF explored concepts and possibilities for the conduct of small specialist Workshops and Symposia of current interest. Topical, interesting, and focused themes in the general field of space technology (both theories and applications) will be selected for these Symposia. They aim at offering a dedicated forum at international level for specialists and experts to exchange their views and experiences on recent and future developments within the selected theme. These specialist Workshops and Symposia supplement the comprehensive annual IAF Congresses which cover all aspects of space technology and draw a correspondingly diverse audience.

**Mirror Space** Marianne de Pierres,2014-04-01 Third in the Sentients of Orion space opera series—“one of the most accomplished and best modern SF offerings out there” (Fantasy Book Critic). With her home planet of Araldis under occupation by hostile forces, and the Orion League of Sentient Species unable—or unwilling—to help, Mira Fedor is forced to turn to the mercenary captain, Rast Randall, if she is to save her home. Having Rast on her side means she can thwart political constraints and enact her own game of ruthlessness. As hidden strategies of her allies and enemies alike are revealed, Mira wonders why the philosophers of Scolar have been targeted? And how far does the Extropist influence extend into Orion space? Is everyone set to achieve their separate goals, or has one devastating agenda been set in motion? Mira fears that these puzzling events are all leading toward a single and terrifying conclusion . . . Marianne de Pierres' epic Sentients of Orion series has been called a grand space opera (The Times Literary Supplement) and brilliant in all senses of the word (Sean Williams). All four books were shortlisted for the prestigious Aurealis Award, with the final book winning for best novel.

**Star Trek: The Motion Picture: The Art and Visual Effects** Jeff Bond,2020-09-01 The official guide to the film artistry of Star Trek: The Motion Picture. Forty years ago, Star Trek: The Motion Picture brought Kirk, Spock, and the Enterprise crew to the big screen and changed the course of the Star Trek franchise. Now, celebrate this landmark anniversary by discovering the visual artistry that made this an enduring science fiction classic. For the first time ever, explore archival material created by legendary Star Trek collaborators, including Robert Abel, Syd Mead, Ralph McQuarrie, Andrew Probert, and Ken Adams.

**Transformation Space** Marianne de Pierres,2010-12-02 Mira Fedor and her friends stand in the eye of the hurricane. Everything is in flux and nothing is as it appears to be. Mira's pregnancy seems to be proceeding at an inhuman pace and the sedate acceptance of this state of affairs by her biozoon, Insigna, is as much an irritation as it is comfort. It seems clear that the extropists' procedures have had an unforeseen effect - but will her child be more than human? Or less? Meanwhile, the galaxy-wide conspiracy that has plagued the Orion League for so long is blown wide open. The conspirators stand unmasked, but is there time to prevent their carefully laid plans coming to fruition? And even if there is, how many of the Orion Worlds will pay the price for their leaders' blindness? The pieces are all in play; all that remains is for each side to commit to its end game. But there's one question nobody has thought to ask: will god play by the rules . . . ?

2001 Adam K. Johnson,2012-05-25 In the last four decades Stanley Kubricks 2001 has been dissected in books and theses from every conceivable angle. Until humanity actually encounters extraterrestrial intelligence, his movie will draw attention to this most tantalising subject. However, what is often overlooked in all of these critical studies is the almost flawless scientific façade constructed by Kubrick, Clarke, Ordway, Lange and the hundreds of engineers and scientists who contributed to the production. Author and engineer Adam Johnson has spent years accumulating information, believed to have been long since destroyed, to create a detailed and unprecedented analysis of the technology envisioned in Kubricks masterpiece. From British designers and model-makers to Soviet astronomers, from Canadian special effects wizards to German artists, from American spacecraft engineers and artificial intelligence scholars to French stylists, this is the Lost Science of 2001.

**Aurora** Kim Stanley Robinson,2018-06-05 From one of science fiction's most powerful voices, Aurora tells the incredible story of our first voyage beyond the solar system. Brilliantly imagined and beautifully told, it is the work of a writer at the height of his powers. Our voyage from Earth began generations ago. Now, we approach our new home. AURORA. *Project Orion* George Dyson,2003-03-26 The race to the moon dominated space flight during the the 1960s yet, during the late 1950s and early 1960s, the US Government sponsored a project that could possibly have sent 150 people on expeditions to Mars or Saturn.The project was code-named Orion and centred upon the effort to develop a fast, manoeuvrable, nuclear-powered space vehicle for long-range voyages in space. The proposed 4000-ton spaceship would be propelled by nuclear bombs but, strictly classified, the project was never given a chance to succeed or fail - due partly to its apparent absurdity - but its mix of sublime physics, madcap engineering, and a cast of Cold War warriors and would-be inter-galactic engineers made the mission a tantalising what if story.In this book George Dyson, son of physicist Freeman Dyson, one of the original project team, pieces together the story his father could only tell him in fragments at the time.
