**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of

land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*The Golden Thread* Ewan Clayton, 2015-01-20 From the simple representative shapes used to record transactions of goods and services in ancient Mesopotamia, to the sophisticated typographical resources available to the twenty-first-century users of desktop computers, the story of writing is the story of human civilization itself. Calligraphy expert Ewan Clayton traces the history of an invention which—ever since our ancestors made the transition from a nomadic to an agrarian way of life in the eighth century BC—has been the method of codification and dissemination of ideas in every field of human endeavour, and a motor of cultural, scientific and political progress. He explores the social and cultural impact of, among other stages, the invention of the alphabet; the replacement of the papyrus scroll with the codex in the late Roman period; the perfecting of printing using moveable type in the fifteenth century and the ensuing spread of literacy; the industrialization of printing during the Industrial Revolution; the impact of artistic Modernism on the written word in the early twentieth century—and of the digital switchover at the century's close. *The Golden Thread* also raises issues of urgent interest for a society living in an era of unprecedented change to the tools and technologies of written communication. Chief among these is the fundamental question: What does it mean to be

literate in the early twenty-first century? The book belongs on the bookshelves of anyone who is inquisitive not just about the centrality of writing in the history of humanity, but also about its future; it is sure to appeal to lovers of language, books and cultural history.
