Great Paper Fighter Planes Norman Schmidt,2004 Offers instructions for making paper models from standard index cards.

Fairey Swordfish 1934 to 1945 (all marks) Jim Humberstone,2014-07-17 Affectionately known as the 'Stringbag' by its crews, the Fairey Swordfish biplane torpedo bomber was obsolete by 1939, but it still achieved some spectacular successes during the Second World War, including the famous crippling of the German battleship Bismarck in 1941. The centrepiece of this manual is Swordfish Mk II, LS326, operated by the Royal Navy Historic Flight from RNAS Yeovilton. The author and Haynes have been given unique access to this rare aircraft, which is one of only two airworthy examples in the world.

Fleet Air Arm Legends Matthew Willis,2021-07-19 Few aircraft encompass as many contradictions as the Fairey Swordfish - the legendary 'Stringbag' naval torpedo bomber was approaching antiquation at the start of the war yet struck mortal blows against some of the most powerful battleships in the Axis fleets. Naval Aviation historian Matthew Willis explores how modern technology such as radar kept the Swordfish effective in the early years of the war and enabled it to find and hit the Italian fleet at Taranto, and the Bismarck in the Atlantic, in circumstances where no other aircraft could have succeeded. When it was finally superseded in its main role with the Fleet, the Swordfish fulfilled vital roles protecting convoys from the U-boat menace. The story of the Swordfish's service across the majority of theatres in WW2, from the hunt for the Graf Spee to the beaches of Normandy, is told here with never-before-published accounts from veteran aircrews. Includes 100+ historic photographs and unique images of the Royal Navy Historic Flight's preserved aircraft.

Fairey Swordfish and Albacore W A Harrison,2003-08-31 The Fairey Swordfish 'General Purpose Spotter Reconnaissance and Torpedo Aircraft' was introduced into service with the Royal Navy in July 1936, was obsolete by 1939 and went on to become one of the most famous of all World War II British aircraft. The story of this most unlikely hero, and the Albacore, the successor that it overshadowed and outlived, is told here in fascinating detail. Including first-hand account from aircraft crews and a wealth of archive photographs, this is a book that deserves a place on the bookshelf of all enthusiasts of naval aviation.

Extreme Origami Won Park,2012-10-15 Won Park has taken the ancient art of origami to a whole new level. Using American currency, Park transforms dollar bills into creative works of art. He relies on the fibrous quality of the paper to fold, bend and twist hundreds of times per model without tearing. With no cutting and no pasting, Park is able to incorporate the details on the bills into his model designs. His signature koi fish is folded in such a way that the patterns on the dollar bill become the scales on the fish, and even the facial features fall in exactly the right place. His designs include a wide array of vehicles, animals, and mythical creatures. In this book, step-by-step instructions are provided for 20 distinct models that are bound to challenge even the most proficient folders. The challenge includes a Formula 1 race car, a toilet, a butterfly, a koi fish, a scorpion, a sea turtle, a fox, an ox, a marlin, a car, a praying mantis, a dragon, a spider, a stag beetle, a stegosaurus, a bat, Pegasus, a fighter jet, a battle tank, and a pig. All models can be made with either one or two dollar bills. Why worry about the declining value of the U.S. dollar? Follow the instructions in this book, and you can transform your dollars into works of art!

Plague Ship Clive Cussler,Jack Du Brul,2008-06-03 Chairman Juan Cabrillo and the rest of the Corporation's mercenaries fight to stop a corrupt activist group from unleashing a viral attack in this #1 New York Times-bestselling adventure from the Oregon Files. Captained by the rakish, one-legged Juan Cabrillo and manned by a crew of former military and spy personnel, the Oregon is a private enterprise, available for any government agency that can afford it. They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate – and as perilous – as any he has ever known and pitted against a cult with monstrously lethal plans for the human race . . . plans he may already be too late to stop

King George V Class Battleships Roger Chesneau,2011-05-23 The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references books, monographs, large-scale plans and relevant websites. The five battleships of the class covered by this volume were the most modern British capital ships to serve in the Second World War. They were involved in many famous actions including the sinking of both Bismarck and Scharnhorst, while Prince of Wales suffered the unfortunate distinction of being the first capital ship sunk at sea by air attack.

Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units Marco Mattioli,2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia, Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a

dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 – which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

British Aircraft Carriers David Hobbs,2014-09-30 This book is a meticulously detailed history of British aircraft-carrying ships from the earliest experimental vessels to the Queen Elizabeth class, currently under construction and the largest ships ever built for the Royal Navy. Individual chapters cover the design and construction of each class, with full technical details, and there are extensive summaries of every ship's career. Apart from the obvious large-deck carriers, the book also includes seaplane carriers, escort carriers and MAC ships, the maintenance ships built on carrier hulls, unbuilt projects, and the modern LPH. It concludes with a look at the future of naval aviation, while numerous appendices summarise related subjects like naval aircraft, recognition markings and the circumstances surrounding the loss of every British carrier. As befits such an important reference work, it is heavily illustrated with a magnificent gallery of photos and plans, including the first publication of original plans in full colour, one on a magnificent gatefold.??Written by the leading historian of British carrier aviation, himself a retired Fleet Air Arm pilot, it displays the authority of a lifetime's research combined with a practical understanding of the issues surrounding the design and operation of aircraft carriers. As such British Aircraft Carriers is certain to become the standard work on the subject.

The Next War in the Air Brett Holman,2016-02-17 In the early twentieth century, the new technology of flight changed warfare irrevocably, not only on the battlefield, but also on the home front. As prophesied before 1914, Britain in the First World War was effectively no longer an island, with its cities attacked by Zeppelin airships and Gotha bombers in one of the first strategic bombing campaigns. Drawing on prewar ideas about the fragility of modern industrial civilization, some writers now began to argue that the main strategic risk to Britain was not invasion or blockade, but the possibility of a sudden and intense aerial bombardment of London and other cities, which would cause tremendous destruction and massive casualties. The nation would be shattered in a matter of days or weeks, before it could fully mobilize for war. Defeat, decline, and perhaps even extinction, would follow. This theory of the knock-out blow from the air solidified into a consensus during the 1920s and by the 1930s had largely become an orthodoxy, accepted by pacifists and militarists alike. But the devastation feared in 1938 during the Munich Crisis, when gas masks were distributed and hundreds of thousands fled London, was far in excess of the damage wrought by the Luftwaffe during the Blitz in 1940 and 1941, as terrible as that was. The knock-out blow, then, was a myth. But it was a myth with consequences. For the first time, The Next War in the Air reconstructs the concept of the knock-out blow as it was articulated in the public sphere, the reasons why it came to be so widely accepted by both experts and non-experts, and the way it shaped the responses of the British public to some of the great issues facing them in the 1930s, from pacifism to fascism. Drawing on both archival documents and fictional and non-fictional publications from the period between 1908, when aviation was first perceived as a threat to British security, and 1941, when the Blitz ended, and it became clear that no knock-out blow was coming, The Next War in the Air provides a fascinating insight into the origins and evolution of this important cultural and intellectual phenomenon, Britain's fear of the bomber.

The Fleet that Had to Die Richard Hough,2000 Richard Hough recounts the fleet's extraordinary seven-month journey from the Baltic to the Far East, which eventually became a mission of heroic futility when Port Arthur, and with it the entire Russian Pacific Fleet, fell. As Admiral Rozhdestvensky's fleet lumbered through the Straits of Tsushima towards Vladivostok on 27 May 1905, the Japanese, in one of the most crushing naval victories of all time, utterly destroyed the Russian armada. The humiliating and total defeat of Russia was confirmed, giving rise to a new and dynamic superpower in the East.--BOOK JACKET.

My Years with the IAF Pratap Chandra Lal,1986 This is the first time that an Air Chief is sharing his thoughts and memories with the reading public. His span of service covers a period of thirty-three years: from the end of 1939 to the beginning of 1973. It includes the Burma campaign of World War II, the restricted fighting in Kashmir in 1947 and 1948, the Chinese debacle in 1962 and the two full scale wars with Pakistan in 1965 and 1971. He had 4,274 hrs of flying with the Air Force to his credit and the experience of flying 58 types of aircraft from Wapitis to supersonic jets. In 1965 he was the Vice Chief of Air Staff and in 1971 the Chief. His honesty and forthrightness many readers will find engaging& but perhaps a few who were on the scene then may find them unpalatable. In a way this is the story of aviation in India, in particular of the Indian Air Force. It is a story of a real life adventure the genesis, growth and achievements of the youngest of the three defence services. Sir Winstom Churchill said of the RAF: Never before in the history of human conflict was so much owed by so many to so few. That is true also of the Indian Air Force. Though this does not purport to be a history of the Indian Air Force without it no history would be complete.
