Truths, Half Truths and Little White Lies Nick Frost,2015-10-08 'If I'm going to tell the story of a life, my life, then I need to tell it warts and all. If the tale is too saccharine sweet then what can the reader take away from it? What do they learn about you? I've written everything down. The shit, the death, fun, naughtiness, addiction, laughter, laughter, laughter, some tears and lots of love and happiness. That to me is a better reflection of a human's life.' Nick's family life was difficult, blighted by alcoholism, illness and sudden misfortune meaning they lost everything overnight. He left school early and drifted from job to job dogged by his own personal demons. It's something of a miracle that Nick survived and even more that he would achieve such success with his writing, acting and comedy. In *Truths, Half Truths and Little White Lies* Nick paints a brilliantly funny, moving and brutally candid portrait of childhood, adolescence and eventual success.

The Art of The Adventures of Tintin Weta Workshop, 2011 An incredible visual insight into one of the most eagerly anticipated films of 2011. In autumn 2011 Steven Spielberg and Peter Jackson are teaming up to launch The Adventures of Tintin: Secret of the Unicorn. The first of two movies being produced, this film will bring to life the enormously popular books by Hergé in performance-captured, 3D form. Starring Jamie Bell (of Billy Elliot fame) as Tintin, the intrepid young reporter whose relentless pursuit of a good story thrusts him into a world of high adventure, and Daniel Craig as the nefarious Red Rackham, this will be the film of Christmas 2011. Published alongside the groundbreaking film, this book will reveal the incredible creative design process behind it. The conceptual design and visual effects for the movie are being created by Weta, the multi Academy Award winning company behind blockbusters such as Avatar, The Lord of the Rings, District 9, King Kong, The Chronicles of Narnia and many others. The designs for the book will be put together by the very same Weta artists, giving the readers a true inside story on the how the original comics were transformed into the final look on the big screen.

Focke Wulf Jet Fighters Justo Miranda, 2017-12-14 The biggest success of the Focke Wulf company during the Second World War was the choice of a radial engine for the Fw 190 fighter, in this way avoiding to compete against Messerschmitt for the in line engines. The decision of the Oberkommando der Luftwaffe to assign the few turbojets available to the Messerschmitt and Arado firms and the discovery of the terrible aerodynamic effect known as compressibility buffeting by mid-1942, made the life of fighter designers of the time very interesting. The Kurt Tank team proposed to install a centrifugal turbojet of his design in the nose of an Fw 190 A/3 with the intention of replacing it with a Jumo 004 B when available in 1943. Several designs followed that were able to use all turbojets, turboprops, ramjets and rocket engines, either projected or at their disposal. They constitute the documental foundation of this book. After failing in the TL Jagdfleugzeug contests in March 1943, Volksflugzeug in September 1944 and Hochleistungs Nachtjäger in January 1945, Focke Wulf could finally overcome its competitors with the great Jägernotprogramm design Ta 183. Although it was too late to intervene in the Second World War, it served as inspiration for numerous designs of other countries during the first years of the Cold War.

December 1917. An important visitor arrives at a field hospital not far from the front, who makes sharp deductions about the way the ward is run based on small details that he sees. Sherlock Holmes is apparently only present for a tour, but asks searching questions about a young officer who apparently died in the hospital, but whose records have mysteriously vanished. As Holmes digs deeper, details emerge pertaining to a cover-up that stretches from the trenches to the top of the War Office, and conspiracy on both the British and enemy fronts.

Space Utopia Vincent Fournier,2019-03-12 This unique collection of photographs features over ten years of collaborations with the most important space and research centers in the world, resulting in a one-of-a-kind story of the human race to the stars. Vincent Fournier's visionary photographs provide an imaginative look at space exploration by merging fantasy with reality in images of rockets, otherworldly landscapes, research facilities, and cosmonauts. To produce these extraordinary images, Fournier has collaborated with the world's major space centers and astronomical observatories, including NASA, the European Space Agency, the Russian space agency, and the European Southern Observatory. Readers are given access to confidential locations and projects such as the NASA SLS rocket. Fournier's artistic vision creates a unique look at the history of space exploration, from the early Sputnik and Apollo programs to the future Mission on Mars. The images invite us to focus on our perceptions of space and time. Fournier questions our past and future utopias--what are our expectations for the future and has the future already happened? The evocative images document and archive while also exploring humankind's myths and fantasies about the future.

David Mazzucchelli's Daredevil Frank Miller,David Mazzucchelli,Marvel Comics Group Staff,2012 Each page has been personally scanned by David Mazzucchelli from his own original art at the same size he drew it, and in color (to insure the best possible reproduction). While appearing to be in black and white, each page was scanned in color to mimic as closely as possible the experience of viewing the actual original art - for instance, corrections, blue pencils, paste-overs, all the little nuances that make original art unique. Each page is printed the same size as drawn, and the paper selected is as close as possible to the original art board.--Publisher description.
