Papertoy Monsters Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Environmental Transitions Petr Pavlínek, John Pickles, 2002-09-26 Environmental Transitions is a detailed and comprehensive account of the environmental changes in Central and Eastern Europe, both under state socialism and during the period of transition to capitalism. The change in politics in the late 1980s and early 1990s allowed an opportunity for a rapid environmental clean up, in an area once considered one of the most environmentally devastated regions on earth. The book illustrates how transformations after 1989 have brought major environmental improvements, as well as new environmental problems. It shows how environmental policy, economic change and popular support for environmental movements, have specific and changing geographies associated with them. Environmental Transitions addresses a large number of topics, including the historical geographical analysis of the environmental change, health impacts of environmental degradation, the role of environmental issues during the anti-communist revolutions, legislative reform and the effects of transition on environmental quality after 1989. Environmental Transitions contains detailed case studies from the region, which illustrate the complexity of environmental issues and their intimate relationship with political and economic realities. It gives theoretically informed ideas for understanding environmental change in the context of the political economy of state socialism and post-communist transformations, drawing on a wide body of literature from West, Central and Eastern Europe.
