WTF, Evolution?! Mara Grunbaum,2014-10-07 We all have our off days. Why should Evolution be any different? Maybe Evolution got carried away with an idea that was just a little too crazy—like having the Regal Horned Lizard defend itself by shooting three-foot streams of blood from its eyes. Or maybe Evolution ran out of steam (Memo to Evolution: The Irrawaddy Dolphin looks like a prototype that should have been left on the drawing board). Or maybe Evolution was feeling cheeky—a fish with hands? Joke's on you, Red Handfish! Or maybe Evolution simply goofed up: How else to explain the overgrown teeth of the babirusas that curl backward over their face? Oops. Mara Grunbaum is a very smart, very funny science writer who celebrates the best—or, really, the worst—of Evolution's blunders. Here are more than 100 outlandish mammals, reptiles, insects, fish, birds, and other creatures whose very existence leaves us shaking our heads and muttering WTF?! Ms. Grunbaum's especially brilliant stroke is to personify Evolution as a well-meaning but somewhat oblivious experimenter whose conversations with a skeptical narrator are hilarious. For almost 4 billion years, Evolution has produced a nonstop parade of inflatable noses, bizarre genitalia, and seriously awkward necks. What a comedian!

Why Evolution is True Jerry A. Coyne,2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

The Paper Zoo Charlotte Sleight,2017-03-08 For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well once have been exotic).
