*The View From The Studio Door* Ted Orland, 2006-04-01 In the perennial best-seller *Art & Fear*, Ted Orland (with David Bayles) examined the obstacles that artists encounter each time they enter their studio and stand before a new blank canvas. Now, in *The View From The Studio Door*, Orland turns his attention to broader issues that stand to either side of that artistic moment of truth. In a text marked by grace, brevity and humor, Orland argues that when it comes to art making, theory and practice are always intertwined. There are timeless philosophical questions (How do we make sense of the world?) that address the very nature of art making, as well as gritty real-world questions (Is there art after graduation?) that artists encounter the moment they're off the starting blocks and producing work on a regular basis. Simply put, this is a book of practical philosophy. As a teacher and working artist himself, Orland brings authentic insight and encouragement to all those who face the challenge of making art in an uncertain world. The breadth of material covered is reflected in chapters that include *Making Sense of the World*, *Art & Society*, *The Education of the Artist*, *Surviving Graduation*, *Making Art That Matters*, *The Artistic Community*, and more. *The View From The Studio Door* is the perfect companion piece to *Art & Fear*, and will appeal to a similar (and already-established) audience of students, working artists, teachers and professionals. For students' benefit, *The View* is also modestly priced, with wide page margins for easy note-taking and annotation.

Images of the animals in their grassland homes with depictions of each finished project will inspire and delight origami and animal enthusiasts alike.

**Giraffe Problems** Jory John, 2020-06-09 The bestselling creators of the hilarious *Penguin Problems*, Jory John and Lane Smith, turn a giraffe's problematic long neck into an enviable advantage in this fun board book. Edward the giraffe can't understand why his neck is as long and bendy and, well, ridiculous as it is. No other animal has a neck this absurd. He's tried disguising it, dressing it up, strategically hiding behind bushes--honestly, anything you can think of. Just when he has exhausted his neck-hiding options and is about to give up, Cyrus the turtle ambles in (very slowly) and helps Edward understand that his neck has a purpose and, besides, looks excellent in a bow tie. Along with a heavy dose of humor comes a gentle reminder about the importance of acceptance.

**The Evolution of the Long-necked Giraffe (*Giraffa Camelopardalis* L.)** Wolf-Ekkehard Lönnig, 2011 Darwin (1871) and many African folk legends before him [...] proposed a simple but powerful explanation for the large and elongated shape. Long necks allowed giraffe to outreach presumed competitors, particularly during dry-season bottlenecks when leaves become scarce; (Simmons and Scheepers). However, this old African folk legend which is still commonly taught in high schools, fails to explain, among other things, the size differences between males and females. Giraffe cows are up to 1.5 meters shorter than the giraffe bulls, not to mention the offspring. The wide migration range of the giraffe and the low heights of the most common plants in their diet likewise argue against the dominant selection hypothesis. Also: 1) The fossil links, which according to the theory should appear successively and replace each other, usually exist simultaneously for long periods of time. 2) Evolutionary derivations based on similarities rely on circular reasoning. 3) The giraffe has eight cervical vertebrae. Although the 8th vertebra displays almost all the characteristics of a neck vertebra, as an exception to the rule the first rib pair is attached there. 4) The origin of the long-necked giraffe by a macromutation is, due to the many synorganized structures, extremely improbable. 5) Sexual selection also lacks a mutational basis and, what is more, is frequently in conflict with natural selection (head clubbing is probably a consequence of a long neck and not a cause; see also Mitchell et al. 2009). 6) In contrast to the thus-far proposed naturalistic hypotheses, the intelligent design theory is basically testable. 7) The long-necked giraffes possibly all belong to the same basic type inasmuch as 8) a gradual evolution from the short-necked to the long-necked giraffe is ruled out by the duplication of a neck vertebra and the loss of a thoracic vertebra. 9) Chance mutations are principally not sufficient to explain the origin of the long-necked giraffe. 10) The intelligent design theory offers an adequate and satisfying solution to the problems and points to numerous old and new research projects. 11) Mitchell and Skinner present a good analysis of the selectionist problem; however, their phylogenetic hypotheses presuppose the correctness of the synthetic evolutionary theory, and their claims of intermediate forms are unproven (similarly summary Part 2). Part 1 shows why Dawkins and Kutschera are wrong. The scientific facts speak for design.

Find out in this board book edition of a much-loved title. As morning dawns, the zookeeper makes his rounds, exhorting animals to wake up, comb their hair, and stand up straight.
