Power Plays Andrew Noah Weintraub,2004 Based on ethnographic fieldwork spanning twenty years, Power Plays is the first scholarly book in English on wayang golek, the Sundanese rod-puppet theater of West Java. It is a detailed and lively account of the ways in which performers of this major Asian theatrical form have engaged with political discourses in Indonesia. Wayang golek has shaped, as well, the technological and commercial conditions of art and performance in a modernizing society. Using interviews with performers, musical transcriptions, translations of narrative and song texts, and archival materials, author Andrew N. Weintraub analyzes the shifting and flexible nature of a set of performance practices called Padalangan, the art of the puppeteer. He focuses on superstar performers and the musical troupes that dominated wayang golek during the New Order political regime of former president Suharto (1966-98) and the ensuing three years of the post-Suharto period. Studies of actual performances illuminate stylistic and formal elements and situate wayang golek as a social process in Sundanese culture and society. Power Plays includes an interactive multimedia CD-ROM of wayang golek. Power Plays shows how meanings about identity, citizenship, and community are produced through theater, music, language, and discourse. While based in ethnographic theory and methods, this book is at the center of a new synthesis emerging among ethnomusicology, anthropology, and cultural studies. Its cross-disciplinary approach will inspire researchers studying similar struggles over cultural authority and popular representation in culture and the performing arts.

**No More Regrets!** Marc Muchnick,2011-08-18 Why do we have regrets - and what can we do about it? We all want to live a life without regrets. Whenever we do something we wish we hadn't - or don't do something we wish we had - we vow it won't happen again. But why do we have regrets in the first place? Because we become prisoners of habit and circumstance, we take people in our lives for granted and fail to be true to ourselves. We stop growing and learning, become self - absorbed and judgmental, and lose touch with our innate goodness. Inspired by his final conversation with a dying friend, Marc Muchnick's No More Regrets! is specifically designed to help you avoid these pitfalls. Just one or two of the thirty ways to greater happiness and meaning outlined here could potentially change your life. Muchnick's suggestions are straightforward, thoughtful, and easy to implement - often just a matter of shifting perspective and seeing the world differently. He illustrates each with a moving personal story and includes a "No More Regrets! Game Plan" tool to help you banish regret from your life forever.

**Proceedings of the Art and Design International Conference (AnDIC 2016)** Rusmadiyah Anwar, Muliyadi Mahamood, D'zul Haimi Md. Zain, Mohamad Kamal Abd Aziz, Oskar Hasdinor Hassan, Shahriman Zainal Abidin, 2018-06-18 This book of conference proceedings contains papers presented at the Art and Design International Conference (AnDIC 2016). It examines the impact of Cyberology, also known as Internet Science, on the world of art and design. It looks at how the rapid growth of Cyberology and the creation of various applications and devices have influenced human relationships. The book discusses the impact of Cyberology on the behaviour, attitudes and perceptions of users, including the way they work and communicate. With a strong focus on how the Cyberology world influences and changes the methods and works of artists, this book features topics that are relevant to four key players - artists, intermediaries, policy makers, and the audience - in a cultural system, especially in the world of art and design. It examines the development, problems and issues of traditional cultural values, identity and new trends in contemporary art. Most importantly, the book attempts to discuss the past, present and future of art and design whilst looking at some underlying issues that need to be addressed collectively.

**Contemporary Selling** Mark W. Johnston, Greg W. Marshall, 2016-02-19 Contemporary Selling is the only book on the market that combines full coverage of 21st century personal selling processes with a basic look at sales management practices in a way that students want to learn and instructors want to teach. The overarching theme of the book is enabling salespeople to build relationships successfully and to create value with customers. Johnston and Marshall have created a comprehensive, holistic source of information about the selling function in modern organizations that links the process of selling (what salespeople do) with the process of managing salespeople (what sales managers do). A strong focus on the modern tools of selling, such as customer relationship management (CRM), social media and technology-enabled selling, and sales analytics, means the book continues to set the standard for the most up-to-date and student-friendly selling book on the market today. Pedagogical features include: Mini-cases to help students understand and apply the principles they have learned in the classroom Ethical Dilemma and Global Connection boxes that simulate real-world challenges faced by salespeople and their managers Role Plays that enable students to learn by doing A companion website includes an instructor's manual, PowerPoints, and other tools to provide additional support for students and instructors.

**Brand Resilience** Jonathan R. Copulsky, 2011-05-10 As the recent Tiger Woods scandal illustrates, brand reputation is more precarious than ever before. True and false information spreads like wildfire in the vast and interconnected social media landscape and even the most venerable brands can be leveled in a flash—by disgruntled customers, competing companies, even internal sources. Here, veteran marketing executive Jonathan Copulsky shows companies and individuals how to play brand defense in the twenty-first century. Five Signs that You Need to Pay More Attention to the Possibility of Brand Sabotage: A group of uniformed employees posts embarrassing YouTube videos, in which they display unprofessional attitudes towards their work. One of your senior executives publicly blames a supplier for product defects, even though they predate your relationship with the supplier. Your competitor's ads trumpet their solution to the performance problems associated with your most recent product. A customer unhappy with changes made to your product design launches a Facebook group, which attracts 5,000 fans. Your outsource partner is prominently featured in numerous blogs and websites describing allegations of worker mistreatment and workplace safety hazards.

*Papertoy Monsters* Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

**Astral Sciences in Mesopotamia** Hermann Hunger, David Pingree, 2015-11-02 Astronomy and astrology, or the astral sciences, played an enormous, if not a key role in the political and religious life of the Ancient Near East, and, later, of the Greek and Roman world. This is the first comprehensive and up-to-date account of the origins of the astral sciences in the Ancient Near East. Every type of Sumerian or Akkadian text dealing with descriptive or mathematical astronomy, including many individual tablets are thoroughly dealt with. All aspects, such as the history of discovery, reconstruction, and interpretation come to the fore, accompanied by a full bibliography. At that the reader will find descriptions of astronomical contents, an explanation of their scientific meaning and the place a given genre or tablet has in the development of astronomy both within the Mesopotamian culture and outside of it. Because celestial omens are intimately related to astronomy in Mesopotamian science, these are also discussed extensively. The material is arranged both chronologically and thematically, so as to help make *Astral Sciences in Mesopotamia* a reference

work on the subject in its truest sense.

The modelling of Machining Operations has become very widespread today, with many researchers developing models with which to predict metal-cutting performance. The aim here is to provide an answer to the challenges presented by the machining industry, which is presently facing very tight economical and environmental constraints. The collection of over 100 peer-reviewed papers covers twelve research topics, including: [Analytical and Numerical Modelling]; [Cutting Fundamentals: Input Parameters]; [Cutting Fundamentals: Experimental Validation]; [Surface Integrity]; [Surface Topography]; [Tool Wear and Tool Life]; [Dynamics and Stability]; [High-Speed Machining and 5-Axes Machining]; [Abrasive Machining]; [Ultra-Precision and Micromachining]; [Computer-Aided Manufacturing (CAM)]; [Experimental: Non-Conventional Machining]. This work will thus constitute an invaluable handbook on the subject.
