Power Plays Andrew Noah Weintraub,2004 Based on

ethnographic fieldwork spanning twenty years, *Power Plays* is the first scholarly book in English on wayang golek, the Sundanese rod-puppet theater of West Java. It is a detailed and lively account of the ways in which performers of this major Asian theatrical form have engaged with political discourses in Indonesia. Wayang golek has shaped, as well, the technological and commercial conditions of art and performance in a modernizing society. Using interviews with performers, musical transcriptions, translations of narrative and song texts, and archival materials, author Andrew N. Weintraub analyzes the shifting and flexible nature of a set of performance practices called Padalangan, the art of the puppeteer. He focuses on superstar performers and the musical troupes that dominated wayang golek during the New Order political regime of former president Suharto (1966-98) and the ensuing three years of the post-Suharto period. Studies of actual performances illuminate stylistic and formal elements and situate wayang golek as a social process in Sundanese culture and society. *Power Plays* includes an interactive multimedia CD-ROM of wayang golek. *Power Plays*

shows how meanings about identity, citizenship, and community are produced through theater, music, language, and discourse. While based in ethnographic theory and methods, this book is at the center of a new synthesis emerging among ethnomusicology, anthropology, and cultural studies. Its cross-disciplinary approach will inspire researchers studying similar struggles over cultural authority and popular representation in culture and the performing arts.

Philippe Halsman Philippe Halsman, Sam Stourdzé, Anne Lacoste, 2014 Salvador Dali's flamboyant moustache, Richard Nixon jumping in the West Wing, Grace Kelly's amazing profile - these are just a few of the images that achieved iconic status and helped make photographer Philippe Halsman an icon in his own right. Comprising hundreds of photographs and insightful accompanying texts, this volume explores Halsman's oeuvre in a variety of aspects. It examines his early career exhibiting works at the avant-garde La Pleiade Gallery in Paris; his experiments with portraiture, particularly the series of stunning images of Marilyn

Monroe and his more than 100 covers for Life magazine; his pictures of the contemporary art scene that include famous dancers, movie stars, stage actors, and musicians and the birth of his jumpology concept; and his unique, 30-year collaboration with Salvador Dali, including a book devoted entirely to the artist's moustache. Anyone interested in portraiture, celebrity, or surrealist photography will marvel at the breadth and magnificence of Halsman's work, which is definitively presented in this beautiful volume. AUTHOR: Sam Stourdze is Director of the Musee de L'Elysee in Lausanne, Switzerland. He has published several books on artists such as Dorothea Lange, Federico Fellini and Charlie Chaplin. Anne Lacoste is curator of the exhibitions at the Musee de L'Elysee in Lausanne, Switzerland. She has published several books on artists such as Felice Beato and Irving Penn. 100 illustrations

Mechanics of Materials in Modern Manufacturing Methods and Processing Techniques Vadim V. Silberschmidt, 2020-04-03

Mechanics of Materials in Modern Manufacturing Methods and Processing Techniques provides a detailed overview of the latest developments in the mechanics of modern metal forming manufacturing. Focused on mechanics as opposed to process, it looks at the mechanical behavior of materials exposed to loading and environmental conditions related to modern manufacturing processes, covering deformation as well as damage and fracture processes. The book progresses from forming to machining and surface-treatment processes, and concludes with a series of chapters looking at recent and emerging technologies. Other topics covered include simulations in autofrettage processes, modeling strategies related to cutting simulations, residual stress caused by high thermomechanical gradients and pultrusion, as well as the mechanics of the curing process, forging, and cold spraying, among others. Some non-metallic materials, such as ceramics and composites, are covered as well. Synthesizes the latest research in the mechanics of modern metal forming processes Suggests theoretical models and numerical codes to predict mechanical responses Covers mechanics of shot peening, pultrusion, hydroforming, magnetic pulse forming Considers applicability of different materials and processes for optimum performance

Hassan, Shahriman Zainal Abidin, 2018-06-18 This book of

conference proceedings contains papers presented at the Art and

Design International Conference (AnDIC 2016). It examines the

impact of Cyberology, also known as Internet Science, on the world

of art and design. It looks at how the rapid growth of Cyberology

and the creation of various applications and devices have

influenced human relationships. The book discusses the impact of

Cyberology on the behaviour, attitudes and perceptions of users,

including the way they work and communicate. With a strong focus

on how the Cyberology world influences and changes the methods

and works of artists, this book features topics that are relevant to

four key players - artists, intermediaries, policy makers, and the

audience - in a cultural system, especially in the world of art and

design. It examines the development, problems and issues of

traditional cultural values, identity and new trends in contemporary

art. Most importantly, the book attempts to discuss the past, present and future of art and design whilst looking at some underlying issues that need to be addressed collectively.

Papertoy Monsters Brian Castleforte, 2010-12-29 A

breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck,

the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Brand Resilience Jonathan R. Copulsky, 2011-05-10 As the recent Tiger Woods scandal illustrates, brand reputation is more precarious than ever before. True and false information spreads like wildfire in the vast and interconnected social media landscape and even the most venerable brands can be leveled in a flash—by disgruntled customers, competing companies, even internal sources. Here, veteran marketing executive Jonathan Copulsky shows companies and individuals how to play brand defense in the twenty-first century. Five Signs that You Need to Pay More Attention to the Possibility of Brand Sabotage: A group of uniformed employees posts embarrassing YouTube videos, in which they display unprofessional attitudes towards their work. One of your senior executives publicly blames a supplier for product defects, even though they predate your relationship with the supplier. Your competitor's ads trumpet their solution to the performance problems associated with your most recent product. A customer unhappy with changes made to your product design

launches a Facebook group, which attracts 5,000 fans. Your outsource partner is prominently featured in numerous blogs and websites describing allegations of worker mistreatment and workplace safety hazards.

Love from A to Z S. K. Ali, 2019-04-30 From William C. Morris Award Finalist S.K. Ali comes an unforgettable romance that is part *The Sun Is Also a Star* mixed with *Anna and the French Kiss*, following two Muslim teens who meet during a spring break trip. A marvel: something you find amazing. Even ordinary-amazing. Like potatoes—because they make French fries happen. Like the perfect fries Adam and his mom used to make together. An oddity: whatever gives you pause. Like the fact that there are hateful people in the world. Like Zayneb's teacher, who won't stop reminding the class how "bad" Muslims are. But Zayneb, the only Muslim in class, isn't bad. She's angry. When she gets suspended for confronting her teacher, and he begins investigating her activist friends, Zayneb heads to her aunt's house in Doha, Qatar, for an early start to spring break. Fueled by the guilt of getting her friends in trouble, she resolves to try out a newer, "nicer" version of herself in a place where no one knows her. Then her path crosses with Adam's. Since he got diagnosed with multiple sclerosis in

November, Adam's stopped going to classes, intent, instead, on perfecting the making of things. Intent on keeping the memory of his mom alive for his little sister. Adam's also intent on keeping his diagnosis a secret from his grieving father. Alone, Adam and Zayneb are playing roles for others, keeping their real thoughts locked away in their journals. Until a marvel and an oddity occurs... Marvel: Adam and Zayneb meeting. Oddity: Adam and Zayneb meeting.

Modelling of Machining Operations J.C. Outeiro,2011-04-19

Volume is indexed by Thomson Reuters CPCI-S (WoS). The modelling of Machining Operations has become very widespread today, with many researchers developing models with which to predict metal-cutting performance. The aim here is to provide an answer to the challenges presented by the machining industry, which is presently facing very tight economical and environmental constraints. The collection of over 100 peer-reviewed papers covers twelve research topics, including: □Analytical and Numerical Modelling□; □Cutting Fundamentals: Input Parameters□; □Cutting

Fundamentals: Experimental Validation; Surface Integrity; Surface Topography; Tool Wear and Tool Life; Dynamics and Stability; High-Speed Machining and 5-Axes Machining; Abrasive Machining; Ultra-Precision and Micromachining; Computer-Aided Manufacturing (CAM); Experimental: Non-Conventional Machining. This work will thus constitute an invaluable handbook on the subject.
