MANFRED "DUTCH" VON EHRENFRIED

📖 From Cave Man to Cave Martian Manfred “Dutch” von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man’s first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

📖 Stratonauts Manfred “Dutch” von Ehrenfried, 2013-12-13 Just what does it take to be a stratonaut, soaring to higher and higher altitudes of Earth’s atmosphere? Brave men and women have reached extreme heights in balloons, aircraft and rocket ships over the past two centuries, from the first untethered balloon flight to the first flights in the newly defined stratosphere, through to the present flights that continue to set new records. This book defines the altitudes related to the stratosphere, how it changes with latitude and the effects on ascending aviators. Also described is how over time technology enabled aircraft and balloons to achieve higher altitudes. The book shows the clear influence of the military on designs that initially focused on speed and maneuverability, but only later on reaching new altitudes. The early flights into the troposphere and eventually the mid to upper reaches of the stratosphere are chronicled, with great emphasis on flight operations. This includes decompression, bailouts, inertia coupling, ejections, catastrophic disintegration, crashes and deaths. Although the book highlights major altitude attempts and records, it also focuses on the life-threatening problems confronting the would-be stratonaut and the causes of many of their deaths. In doing so, it tries to define just what it takes to be a stratonaut.

📖 Exploring the Martian Moons Manfred “Dutch” von Ehrenfried, 2017-04-11 This book explores the once popular idea of ‘Flexible Path’ in terms of Mars, a strategy that would focus on a manned orbital mission to Mars’s moons rather than the more risky, expensive and time-consuming trip to land humans on the Martian surface. While currently still not the most popular idea, this mission would take advantage of the operational, scientific and engineering lessons to be learned from going to Mars’s moons first. Unlike a trip to the planet’s surface, an orbital mission avoids the dangers of the deep gravity well of Mars and a very long stay on the surface. This is analogous to Apollo 8 and 10, which preceded the landing on the Moon of Apollo 11. Furthermore, a Mars orbital mission could be achieved at least five years, possibly 10 before a landing mission. Nor would an orbital mission require all of the extra vehicles, equipment and supplies needed for a landing and a stay on the planet for over a year. The cost difference between the two types of missions is in the order of tens of billions of dollars. An orbital mission to Deimos and Phobos would provide an early opportunity to acquire scientific knowledge of the moons and Mars as well, since some of the regolith is presumed to be soil ejected from Mars. It may also offer the opportunity to deploy scientific instruments on the moons which would aid subsequent missions. It would provide early operational experience in the Mars environment without the risk of a landing. The author convincingly argues this experience would enhance the probability of a safe and successful Mars landing by NASA at a later date, and lays out the best way to approach an orbital mission in great detail. Combining path-breaking science with achievable goals on a fast timetable, this approach is the best of both worlds--and our best path to reaching Mars safely in the future.

📖 Apollo Mission Control Manfred “Dutch” von Ehrenfried, 2018-06-21 This book describes the history of this now iconic room which represents America’s space program during the Gemini, Apollo, Skylab, Apollo-Soyuz and early Space Shuttle eras. It is now a National Historic Landmark and is being restored to a level which represents the day the flight control teams walked out after the last lunar landing missions. The book is dedicated to the estimated 3,000 men and women who supported the flights and tells the story from their perspective. It describes the rooms of people supporting this control center; those rooms of engineers, analysts and scientists most people never knew about. Some called it a “shrine” and some called it a “cathedral.” Now it will be restored to its former glory and soon thousands will be able to view the place where America flew to the Moon.

📖 The Birth of NASA Manfred “Dutch” von Ehrenfried, 2016-03-23 This is the story of the work of the original NASA space pioneers; men and women who were suddenly organized in 1958 from the then National Advisory Committee on Aeronautics (NACA) into the Space Task Group. A relatively small group, they developed the initial mission concept plans and procedures for the U. S. space program. Then they boldly built hardware and facilities to accomplish those missions. The group existed only three years before they were transferred to the Manned Spacecraft Center in Houston, Texas, in 1962, but their organization left a large mark on what would follow. Von Ehrenfried’s personal experience with the STG at Langley uniquely positions him to describe the way the group was structured and how it reacted to the new demands of a post-Sputnik era. He artfully analyzes how the growing space program was managed and what techniques enabled it to develop so quickly from an operations perspective. The result is a fascinating window into history, amply backed up by first person documentation and interviews.

📖 Indian Poetry in English Zinia Mitra, 2012-04-03 Indian poetry in English began with the imitation of English Romantic poets but gradually Indo-Anglian poets began to write on Indian themes based on Indian contexts and Indian social scenario. Indo-Anglian poetry has received world recognition and some of the poets are held in high esteem. This anthology containing 35 essays is an attempt to represent the gamut of Indian poetry in English, both pre-independence and post-independence, from diverse critical perspectives. The thirteen poets covered in this anthology include Michael Madhusudan Dutt, Toru Dutt, Rabindranath Tagore, Sarojini Naidu, Nissim Ezekiel, A.K. Ramanujan, and Kamala Das. The essays in the book offer innovative perspectives and touch upon different aspects of Indian poetry in English. The tone of the essays varies from personal to argumentative to objectively discursive. The book, with diverse and thought-provoking essays, will be highly useful for undergraduate and postgraduate students of English literature. Besides, those who are interested to know about Indian poetry in English will find the book quite illuminating and interesting.

📖 Inhabited by Stories Nancy A. Barta-Smith, Danette DiMarco, 2012-11-30 Intertextuality has signaled change, appropriation, adaptation, and derivation. It has focused readers on irresolvable questions of influence and origination, progressive or regressive movement across continents, periods, and media. Inhabited by Stories: Critical Essays on Tales Retold takes a different approach. What would a model of literary study look like that steps out of time’s river and embraces not only the presence and proximity of the world to the senses, but also of the past and the future to the present here and now? When stories inhabit us, imagination and memory extend our ability to see and feel. Phenomenological experience is lived, not just thought. Such a perspective suggests that the past and future inhabit the present, increase the depth of sensory perception itself, and enrich the range of our affective and ethical responses. Grounded in the lived experience of reading, this perspective offers an alternative to an idea of intertextuality as simply following lines of influence and appropriation. It focuses on the expansion of experience created by telling and retelling stories. Ironically, for literary theorists and critics, perhaps the highest form of both praise and critique is a tale retold, since such retellings attest to literature’s instructive power and its perennial regeneration.

📖 Film and Fiction Somdatta Mandal, 2005 Moving pictures in the silent era and moving pictures with recorded sounds after 1927, has been used to tell stories, describe events, imitate human actions, expose problems, and urge reforms. It is not therefore surprising that such uses would provoke speculative comparisons with other major human systems for telling, describing, imitating, exposing and urging - verbal language. The twenty-two essays in this volume deal primarily with the interrelation of the two art forms - fiction and film. An entirely twentieth century phenomenon, this interrelation not only developed a cinematic imagination in novelists, but also added new dimensions to the modernist worldview. Divided under four categories, the essays discuss film and literary narrative theories, analyse different Hollywood genres, speak of individual associations of writers with the ‘liveliest art of the century,’ and also delve into the problems of adapting of individual texts.

📖 Tagore-At Home in the World Sanjukta Dasgupta, Chinmoy Guha, 2013-02-08 This volume of 22 essays spans a wide trajectory, foregrounding the texts of Tagore and Tagore as text. The Tagorean spirit that makes the bard so relevant in the 21st century forms the basis of this compilation. Tagore’s travels to various parts of the world, his reception and response to diverse cultures, his scepticism about the rigid parameters of nationalism all establish the perception that Tagore was remarkably at home in the world. Tagore’s concern was with life, play and contingency-with the momentary as well as the eternal. It is this strain of unacknowledged modernism and life-affirming vision that make his work powerful. A believer in freedom of the individual, creative freedom and freedom of all, his words are as pertinent in today’s context as they were in his time. This volume analyses how the constrictions of the specificities of place, location and geographies have always been interrogated by Tagore for whom space was a defining trope. With contributions from some leading Tagore experts both from India and abroad, this volume enables us to re-read Tagore as a messenger of world harmony and peace.
