Lockheed F-104 Starfighter Jim Upton,2003 The F-104 Starfighter was one of the most successful and prolific jet fighters of the late '50s and early '60s - and one of the most beautiful. It was the first production Mach 2 aircraft, and it rewrote the performance books for speed, altitude and time to climb. Aircraft enthusiasts called it the missile with a man in it. After its initial flight in 1954, the F-104 program produced more than 2,500 aircraft, making it one of the largest military aircraft programs ever. F-104s flew for the US and many NATO allies, and were eventually produced under license in Canada, Japan, and several European countries. In fact, Italy is still flying updated F-104s in 2003. This book covers this revolutionary aircraft's design and development, its weapons and other systems, and all 18 models of the F-104, complete with photos of each variant. NASA-modified research craft are also discussed, along with several formerly classified programs based on the F-104. Author Jim Upton was one of the F-104 program's flight test engineers, so he knows the aircraft and the people involved. Includes a foreword by Dick Heppe, retired president of Lockheed California, and chief aerodynamicist of the F-104. F-104 Starfighter Units in Combat Peter E. Davies,2014-11-20 This title covers the technical characteristics of the F-104 Starfighter, one of the most widely-used and popular aircraft in history. Although built in small numbers for the USAF, the F-104C fought and survived for almost three years in Vietnam. There, it was engaged in some of the war's most famous battles including the legendary operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. This small, tough and very fast fighter, dubbed 'The Missile with a Man in It', was called upon to do things it was not specifically designed for, and did them admirably. Featuring illustrations and photographs detailing the variety of nose-paint schemes and weapons configurations, this comprehensive appraisal of the F-104 Starfighter is ideal for modelling and aviation enthusiasts alike.

F-104 STARFIGHTER PILOTS FLIGH United States Air Force,NASA,2011-01 Created by famed Lockheed designer Kelly Johnson, the F-104 Starfighter was designed to compete with Soviet Mig-15s. Equipped with a huge and powerful J79 engine, the aircraft could reach speeds well in excess of Mach 2.0, while its thin, trapezoidal wing provided extremely low drag with terrific acceleration and rate of climb. Unforgiving and sensitive to control inputs, the F-104 killed many pilots and developed a reputation as a widow-maker. Despite its shortcomings, the Starfighter enjoyed a long career. It flew in the air support role during Rolling Thunder in the Vietnam War. It also saw extensive service in foreign air forces and NATO. NASA continued to use the F-104 as a support aircraft until 1995. This pilot's flight operating handbook was originally produced by the USAF. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes.
