Railway Guns of World War II Steven J. Zaloga, 2016-02-25 World War II marked the zenith of railway gun development. Although many of the railway guns deployed at the start of the conflict were of World War I vintage, Germany's ambitious development programme saw the introduction of a number of new classes, including the world's largest, the 80cm-calibre Schwerer Gustav and Schwerer Dora guns, which weighed in at 1,350 tons and fired a huge 7-ton shell. This book provides an overview of the types of railway guns in service during World War II, with a special focus on the German railway artillery used in France, Italy and on the Eastern Front, and analyzes why railway guns largely disappeared from use following the end of the war.

My Tank Is Fight! Zack Parsons, 2006-10-01 Soldiers that fly! Tanks that fly! Cruisers that . . . sink! What Fight Have Been My Tank Is Fight! contains a humorous and exciting examination of twenty real inventions from World War II that never saw the light of day. Each entry includes full technical details, a complete development history, in-depth analysis, and a riveting fictionalized account of the invention's success or failure on the battlefield. Lavish color artwork and technical illustrations are falling from the pages of this book like toenails from a trench foot. Dive under the Atlantic in the turreted U-Cruiser, or rule its surface from an aircraft carrier made out of ice. Shred bomber formations in a high-performance flying wing fighter and then rocket to your untimely end from the cockpit of your very own suicide missile. We've got a pair of German armored land vehicles for you that are so large they had to be powered by naval engines! My Tank Is Fight! delivers the thrilling action of the Second World War as it might have been with a touch of humor and a lack of class. Only the slow-witted are reading this anywhere other than in line at the cash register. Ask an adult to help you if you're still not sure you want to buy the book.

Identity and Image Jutta Vinzent, 2006-06-22 This book explores the image and identity of émigré painters, sculptors and graphic artists from Nazi Germany in Britain between 1933 and 1945. It focuses on a neglected field of Exile Studies, that of exiled artists in Britain. Methodologies used in this study have been developed by Exile Studies and History of Art, but also by Postcolonialism, scholars of which usually apply their ideas to the Afro-Asian emigration of the second part of the twentieth century. Thus this study represents methodologically a new way of looking at the emigration from Nazi Germany. Identity and Image is divided into five chapters: After an introductory Chapter One (historiography of the topic, methodology of the study, structure of the book), Chapter Two establishes socio-political patterns of emigration and provides an historical framework for Chapters Three and Four, which concentrate on the image and identity of the refugee artist, the former based on written sources and the latter on visual material. In detail, Chapter Three analyses the British image of the refugee artists and their works on the one hand and the émigrés' self-representations on the other, the latter exemplified by refugee organisations (the Free German League of Culture/Freier Deutscher Kulturbund, the Austrian Centre, the Anglo-Sudeten Club and the Czech Institute) and institutions founded by émigré artists (Jack Bilbo's Modern Art Gallery and Arthur Segal's Painting School). Chapter Four examines the works produced in internment and those

exhibited and produced for the refugee organisations discussed in Chapter Three. Chapter Five discusses the results of this study in the light of three postcolonial concepts: diaspora communities, the notion of home and the gendered identity of the refugee. The appendix lists all painters, sculptors and graphic artists from Nazi Germany in Britain with biographical details. Apart from visual and written sources discussed for the first time, there are two major results of the study: First, although the artists were united as refugees, this unity did not lead to a unity in art - refugee art is a construction put forward by the British press and the refugee organisations, particularly the Free German League of Culture. Second, contrary to claims that modern art was international and formed a universal unity that transgressed nationality, neither the West/Europe nor modernism form unities; instead, in the 1930s and 1940s, cultures in Europe constructed conceptions of other European cultures on the basis of nation-state identities.

Reich of the Black Sun Joseph P. Farrell, 2012-09-04 Why were the Allies worried about an atom bomb attack by the Germans in 1944? Why did the Soviets threaten to use poison gas against the Germans? Why did Hitler in 1945 insist that holding Prague could win the war for the Third Reich? Why did US General George Patton's Third Army race for the Skoda works at Pilsen in Czechoslovakia instead of Berlin? Why did the US Army not test the uranium atom bomb it dropped on Hiroshima? Why did the Luftwaffe fly a non-stop round trip mission to within twenty miles of New York City in 1944? Reich of the Black Sun takes the reader on a scientific-historical journey in order to answer these questions. Arguing that Nazi Germany actually won the race for the atom bomb in late 1944, Reich of the Black Sun then goes on to explore the even more secretive research the Nazis were conducting into the occult, alternative physics and new energy sources. The book concludes with a fresh look at the Nazi Legend of the UFO mystery by examining the Roswell

Majestic-12 documents and the Kecksburg crash in the light of parallels with some of the super-secret black projects being run by the SS. Reich of the Black Sun is must-reading for the researcher interested in alternative history, science, or UFOs!

Hitler's Last Day Jonathan Mayo, Emma Craigie, 2016-03-17 On 30th April 1945 the world is in chaos. American and Russian forces have linked up in the middle of Germany, but the fighting continues. The roads of Germany are full of people - Jews who have survived concentration camps, Allied POWs trying to get home, and Nazis on the run. The civilian population under German control will run out of food in less than a fortnight. The man whose dream of a thousand-year Reich began this nightmare is in a bunker beneath the streets of Berlin saying his farewells. By 3pm he will be dead. *Hitler's Last Day: Minute by Minute*, is pure chronological narrative, as seen through the eyes of those who were there in the bunker, those waiting for news back home, or fighting in the streets of Germany, or pacing the corridors of power in Washington, London and Moscow. It was a day of endings and beginnings when ordinary people were placed often in extraordinary situations.

Refuge in Hell Daniel B. Silver, 2004-09-15 "Fascinating footnote to Holocaust history . . . a Jewish hospital in the heart of Berlin that treated patients to the very end of Hitler's reign" (Kirkus Reviews, starred review) "One of the most incredible stories of World War II." —Dallas Morning News How did Berlin's Jewish Hospital, in the middle of the Nazi capital, survive as an institution where Jewish doctors and nurses cared for Jewish patients throughout World War II? How could it happen that when Soviet troops liberated the hospital in April 1945, they found some eight hundred Jews still on the premises? Daniel Silver carefully uncovers the often surprising answers to these questions and, through the skillful use of primary source materials and the vivid voices of survivors, reveals the underlying complexities of human conscience. The story centers on the intricate

machinations of the hospital's director, Herr Dr. Lustig, a German-born Jew whose life-and-death power over medical staff and patients and finely honed relationship with his own boss, the infamous Adolf Eichmann, provide vital pieces to the puzzle—some have said the miracle—of the hospital's survival. Silver illuminates how the tortured shifts in Nazi policy toward intermarriage and so-called racial segregation provided a further, if hugely counterintuitive, shelter from the storm for the hospital's resident Jews. Scenes of daily life in the hospital paint an often heroic and always provocative picture of triage at its most chillingly existential. Not since Schindler's List have we had such a haunting story of the costs and mysteries of individual survival in the midst of a human-created hell. "Gripping . . . one physician's actions are depicted in all their fascinating complexity." —The Washington Post Book World

Rain of Fire Human Rights Watch (Organization), 2009 This report provides witness accounts of the devastating effects that white phosphorus munitions had on civilians and civilian property in Gaza. Human Rights Watch researchers in Gaza immediately after hostilities ended found spent shells, canister liners, and dozens of burnt felt wedges containing white phosphorus on city streets, apartment roofs, residential courtyards, and at a United Nations school. The report also presents ballistics evidence, photographs, and satellite imagery, as well as documents from the Israeli military and government.

The Messerschmitt Me 163 Komet Marek Rys, 2021-09-30 Although the German Me 163 Komet rocket fighter was created as a remedy for the mass air raids of the Allied air force on Germany, its origins date back to 1938. Alexander Lippisch then began work at the DFS factory on a tailless rocket-propelled aircraft, designated as DFS 194. At the beginnings of 1939, the project was handed over to the Messerschmitt factory and there it developed into the Me 163A. Two prototypes

of this aircraft - V4 and V5 - were completed in 1941 and flown as gliders. Then the V4 received a Walter HWK R.II rocket engine with a thrust of 7.5 kN, and on October 2, 1941 H. Dittmar achieved a speed of 1003 km/h on mentioned plane. Thirteen Me 163As were built for training.

Hispano Suiza in Aeronautics Manuel Lage Marco, 2003-11-01 This book examines Hispano Suiza's evolution and the technological advances of its engines. Starting with circumstances that favored the creation of an indigenous aviation engine, the story follows engine development for a breadth of applications, particularly aviation engines, and describes, in parallel, the birth and development of aircraft in Spain by Campaña Española de Construcciones Aeronáuticas (CECA), La Hispano, La Hispano Aircraft, La Hispano Suiza, SAF-5, SAF-15, and La Hispano Aviación. Hispano Suiza in Aeronautics: Men, Companies, Engines and Aircraft is an in-depth study covering a vast period in the history of the Spanish and French aircraft industry (1913-1967) and offers insight into Hispano Suiza's significant developments.

Russian Piston Aero Engines Vladimir Kotelnikov, 2005 The Russian aircraft industry has, over the years, produced a staggering number of aircraft, large and small, for civil and military purposes. These aircraft have been powered by an equally extraordinary number of engines, built in Russian factories to both native and foreign designs. This detailed study of the piston aero engines produced by Russian factories from the birth of flight to the present is a tour de force of historical research, which has used many resources and archives not previously known in the west. The book includes every piston engine built from an original Russian design or copied from a foreign design; from engines used in the first Russian flying machines to microlight engines still in production. Each is written with its history, specifications and details of use.

The Color of Time Dan Jones, 2018-10-16 *The Color of Time* spans more than one hundred years of world history—from the reign of Queen Victoria and the American Civil War to the Cuban Missile Crisis and the beginning of the Space Age. It charts the rise and fall of empires, the achievements of science, industrial developments, the arts, the tragedies of war, the politics of peace, and the lives of men and women who made history. This illustrated narrative is a collaboration between a gifted Brazilian artist and a New York Times bestselling British historian. American Military Transport Aircraft Since 1925 E.R. Johnson, 2013-04-23 Without the support of airlift, the modern American military machine would be brought to a standstill. Since World War II--beginning with the Cold War and continuing up to the present day--the U.S. armed forces have come increasingly to rely upon airlift for mobility. The power to rapidly move and thereafter support a military operation--anywhere in the world, at any time--has become a foundational element of American defense policy. This work provides the reader with a comprehensive historical survey--including technical specifications, drawings, and photographs--of each type of fixed-wing aircraft used by U.S. military forces over a nearly 90-year period to carry out the airlift mission.
