**Japanese Tanks 1939–45** Steven J. Zaloga, 2011-12-20 The Japanese Army used tanks to great effect in the build-up to World War II. Inspired by European designs, in the 1920s and 1930s an innovative Japanese tank program facilitated their campaigns in China prior to the Pacific War. During the ensuing war against the Allies tanks were deployed imaginatively in jungle terrain previously thought impassable by such vehicles, being integral in Malaya and the capture of Singapore. Steven J Zaloga uses detailed and colorful artwork and photographs to explore these designs, explaining their neglect in favor of the naval priorities that left Japanese tanks outmoded by Western designs.

**M4 Sherman vs Type 97 Chi-Ha** Steven J. Zaloga, 2012-05-20 Although US and Japanese tank forces first clashed in 1941, it was on in 1944 that tank-vs-tank action became more common as both sides poured larger numbers of tanks into the combat zone. These battles were a means of demonstrating each side's latest tank technology. For the US, the pinnacle of their tank machinery came in the form of the M4 Sherman and for the Japanese, their most notable feat of engineering was the smaller, yet still effective Type 97 Chi-Ha. The last two campaigns of the war – Iwo Jima and Okinawa – saw tanks used by both sides, the Japanese finally concluding that “the fight against the US Army is a fight against his M4 tanks”. The illustrations follow the usual Duel pattern with profile illustrations of the Type 97-kai Shinhoto Chi-ha and the M4A3, views showing the ammunition of both types, interior illustrations showing the turret layout in both types, and a battlescene showing the Type 97-kai in combat against US armour.

**Axis Tanks of the Second World War** Michael Green, 2017-07-30 This pictorial history presents an in-depth study of the various tanks built and deployed by the Axis Alliance during WWII. Though Nazi Panzer tanks have become a ubiquitous symbol of Axis Alliance combat, the Japanese Army had more tanks than Germany in 1938. These included the Type 95 light tank and the Type 89 and 97 medium tanks. Other Axis powers, including Italy, Romania and Hungary also built their own tanks. The latter was responsible for the Toldi and Turan light tank series. In this informative collection of wartime photographs, military expert Michael Green discusses how the Axis powers drew on British and French tank designs in the period leading up to the Second World War. The Carden-Loyd tankette suspension was used as a model for the Panzer 1 series as well as the light Italian and Japanese tanks. German engineering talent then produced the ingenious designs of the Panzer II, III and IV series and, later in the War, the Panther Medium and Tiger heavy tanks.

**Japanese Tanks and Armoured Warfare 1932-1945** David McCormack , 2021-03-13 The popular image of the Japanese tanks which faced the markedly superior tanks fielded by the Allies during the Second World War is one of poorly armed and armoured Lilliputian tin cans which failed to make any impression upon the battlefield. In this absorbing new history, David McCormack looks beyond widely held and unchallenged misconceptions to create a new narrative in which Japan's rightful place as a leading innovator in tank design and doctrine is restored. Why did Japan produce tanks in such limited numbers?

What contribution did Japanese tanks make to the war effort? Why did it take Japan so long to develop heavier tanks capable of meeting the Allies on more equal terms? Drawing from primary and secondary sources, the author's meticulous research provides the reader with an objective appraisal of both the successes and failures of the Empire of the Sun's tank forces.

Tanks on Iwo Jima 1945 Romain Cansière, 2024-06-20 An award-winning US Marine Corps armor historian's account of the role of US and Japanese tanks on Iwo Jima. The battle of Iwo Jima is iconic and known for its brutality: this was the only battle in which the number of US casualties outnumbered those of the Japanese. But as is often the case with the Pacific campaigns, the tank action on the island has generally been overshadowed by that of infantry. The tank, however, played an important role as a support weapon – especially on the US side – despite the rough terrain and unconventional enemy tactics. Using unpublished official records and veterans' accounts, award-winning USMC armor specialist Romain Cansière sheds new light on Japanese and USMC armored operations on the island. This book offers new information on the battle in a complete, concise, and accessible format, and its illustrations include unpublished photographs from private collections and meticulously researched new color profiles, highlighting the tanks' modifications and their diverse camouflage and markings.

**Where Heroes Trained** Roger M. Baty, Eddie L. Maddox, 2004 Where Heroes Trained deals with a secretive and highly unusual Army project in World War II. Not a Manhattan Project, but taken nearly as seriously, this was a most interesting sidelight of armored warfare. Caught up in the project were many unwitting GIs who found themselves whisked off to mysterious training bases, introduced to the most powerful tank in the American arsenal, and drilled in one of the war's most imaginative battle tactics. This is oral history as it ought to be done: a truly unusual project with lots of photos, maps and illustrations and best of all-interviews that have been well edited. Baty and Maddox make even the most commonplace memories of home and camp into absorbing reading. The result is a fascinating look at ordinary American GIs caught up in a strange environment, enmeshed in events they barely understand, and determined to carry it through. Best of all, this is no BS -Ray Puffer, Historian, Edwards AFB

**The Pacific Theater** Daniel Siskind, 2016-11-24 Instructions to build some of the most iconic fighting machines from World War II in the Pacific, using LEGO® (or compatible) building bricks Models covered include the M4 Sherman Tank, M2A4 Stuart Tank, LVT-4 (Landing Vehicle, Tracked), P-40 Warhawk, A6M Zero, Type 97 Medium Tank, Type 95 Light Tank and more. Includes stickers for vehicles and uniforms for up to 20 soldiers.

M3 Lee Grant David Doyle, 2020-08-05 This volume is the most detailed study yet presented of the M3 Lee/Grant tanks, illustrating and describing the development, production, and use of these iconic vehicles by US, Commonwealth, and Russian forces during WWII. The tanks, their power plants, and production techniques used by each manufacturer are shown from assembly line to front line through this profusely illustrated book, including numerous never before published vintage photos.

*Tiger I & Tiger II* Anthony Tucker-Jones, 2013-07-17 A pictorial history and analysis of the infamous World War II German tanks. The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels

the myths that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.

*M4 Sherman vs Type 97 Chi-Ha* Steven J. Zaloga, 2012-05-22 While the Pacific campaign is not well known as a theater for tank combat, the US Army deployed nearly a third of its tank battalions to the Pacific, and Japan was among the top five tank manufacturers during the war. The obscurity of Pacific tank battles largely hinged on the tactics used in the Pacific theater due to terrain. Tanks were generally used as infantry support weapons, and the terrain precluded the use of tanks in maneuver warfare that might have led to large scale tank-vs.-tank battles. This book begins by surveying the early tank battles in the Pacific between US and Japanese forces, starting with the first encounters in the Philippines in 1941 between US M3 Stuart light tanks and Japanese Type 95 tanks. Tank-vs.-tank action became more common in 1944 as both sides poured larger numbers of tanks into the combat zone. The largest Japanese tank attack of war took place in July 1944 on Saipan, but there were frequent tank encounters in the ensuing months on Guam, and Peleliu. The Philippines saw the largest Japanese tank deployment of the war, with the Japanese sending a tank division to Luzon in 1944. This led to extensive clashes with US army forces, sometimes pitting tank vs. tank, but often a mixture of tanks, infantry anti-tank weapons, and even self-propelled guns. The last two campaigns of the war on Iwo Jima and Okinawa saw tank use on the part of both sides, the Japanese finally concluding that the fight against the US Army is a fight against his M4 tanks. This book will take a look at the two best tanks of the Pacific campaign. On the American side, the M4A3 Sherman medium tank was used by both the US Army and US Marine Corps. On the Japanese side, the Type 97-kai Shinhoto Chi-Ha was the best tank to see combat. This was a very uneven contest, which is the main reason that in 1944 on Luzon, the Japanese were so reluctant to deploy the Chi-ha against the Sherman and preferred to use them as dug-in pillboxes. The book illustrations will follow the usual Duel pattern with profile illustrations of the Type 97-kai Shinhoto Chi-ha and M4A3, views showing the ammunition of both types, interior illustrations showing the turret layout in both types, and a Battlescene showing the Type 97-kai in combat against US armor.

**Bolt Action: Armies of Germany** Warlord Games, Warwick Kinrade, 2012-11-20 This book provides Bolt Action players with all of the information they need to field the military forces of Germany. Detailed army lists allow players to construct German armies for any theatre and any year of the war, including the early campaigns in Poland and France, the dusty tank war in the North African desert, the bloody battles on the Eastern Front, and the final defence of Normandy, occupied France and Germany itself. With dozens of different unit types including Fallschirmjager, Waffen-SS, and the dreaded Tiger tank, players can assemble a huge variety of troops with which to battle their opponents.

*Deep Maneuver* Jack D Kern Editor, Jack Kern, 2018-10-12 Volume 5, Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose.

Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

**Forgotten Tanks and Guns of the 1920s, 1930s and 1940s** David Lister, Paul Charlton, 2018-10-30 History forgets. Files are lost and mislaid. But this book seeks to shine a light, offering a collection of cutting edge pieces of historical research detailing some of the most fascinating arms and armament projects from the 1920s to the end of the 1940s, nearly all of which had previously been lost to history. Included here are records from the UK's MI10 (the forerunner of GCHQ) which tell the story of the mighty Japanese heavy tanks and their service during the Second World War. Other chapters expand on the development of British armour, including the story of infantry tanks from the 1920s right through to the end of the Second World War and beyond. Other items placed beneath the microscope in this fascinating history include a wide variety of guns, rocket launchers, super heavy tanks and countless pieces of specialised armour. Previously overlooked, hidden under layers of dust in archives up and down the country, the histories of these objects has finally been uncovered.

The Mushroom at the End of the World Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

**The Brigade: A History, Its Organization and Employment in the US Army**, 2004 This work provides an organizational history of the maneuver brigade and case studies of its employment throughout the various wars. Apart from the text, the appendices at the end of the work provide a ready reference to all brigade organizations used in the Army since 1917 and the history of the brigade colors.

**Tanks in the Great War, 1914-1918** John Frederick Charles Fuller, 1920 This book presents the history of the British Tank Corps and the history of Great Britain's tanks. The author summarizes the campaigns of World War I emphasizing the role of the tanks during each of the battles.

**Japanese Tanks and Armoured Warfare 1932-45** David McCormack, 2021-02-19 This new history charts the development, production, deployment, and combat operations of Japan's tank forces between their inception in 1918 and their disbandment in 1945. The author's persuasive arguments encourage the reader to reappraise their existing views concerning the contribution of Japanese tanks towards the projection of combat power.

Nomonhan, 1939 Stuart Goldman, 2013-10-15 Stuart Goldman convincingly argues that a little-known, but intense Soviet-Japanese conflict along the

Manchurian-Mongolian frontier at Nomonhan influenced the outbreak of World War II and shaped the course of the war. The author draws on Japanese, Soviet, and western sources to put the seemingly obscure conflict—actually a small undeclared war— into its proper global geo-strategic perspective. The book describes how the Soviets, in response to a border conflict provoked by Japan, launched an offensive in August 1939 that wiped out the Japanese forces at Nomonhan. At the same time, Stalin signed the German—Soviet Nonaggression Pact, allowing Hitler to invade Poland. The timing of these military and diplomatic strikes was not coincidental, according to the author. In forming an alliance with Hitler that left Tokyo diplomatically isolated, Stalin succeeded in avoiding a two-front war. He saw the pact with the Nazis as a way to pit Germany against Britain and France, leaving the Soviet Union on the sidelines to eventually pick up the spoils from the European conflict, while at the same time giving him a free hand to smash the Japanese at Nomonhan. Goldman not only demonstrates the linkage between the Nomonhan conflict, the German-Soviet Nonaggression Pact, and the outbreak of World War II , but also shows how Nomonhan influenced Japan's decision to go to war with the United States and thus change the course of history. The book details Gen. Georgy Zhukov's brilliant victory at Nomonhan that led to his command of the Red Army in 1941 and his success in stopping the Germans at Moscow with reinforcements from the Soviet Far East. Such a strategy was possible, the author contends, only because of Japan's decision not to attack the Soviet Far East but to seize the oil-rich Dutch East Indies and attack Pearl Harbor instead. Goldman credits Tsuji Masanobu, an influential Japanese officer who instigated the Nomonhan conflict and survived the debacle, with urging his superiors not to take on the Soviets again in 1941, but instead to go to war with the United States.

Bringing Order to Chaos Peter J Schifferle Editor, Peter Schifferle, 2018-10-12 Volume 2, Bringing Order to Chaos: Combined Arms Maneuver in Large Scale Combat Operations, opens a dialogue with the Army. Are we ready for the significantly increased casualties inherent to intensive combat between large formations, the constant paralyzing stress of continual contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight?
