Aviation Fuels with Improved Fire Safety National Research Council,Division on Engineering and Physical Sciences,National Materials Advisory Board,Commission on Engineering and Technical Systems,Committee on Aviation Fuels with Improved Fire Safety,1997-08-18 The reduction of the fire hazard of fuel is critical to improving survivability in impact-survivable aircraft accidents. Despite current fire prevention and mitigation approaches, fuel flammability can overwhelm post-crash fire scenarios. The Workshop on Aviation Fuels with Improved Fire Safety was held November 19-20, 1996 to review the current state of development, technological needs, and promising technology for the future development of aviation fuels that are most resistant to ignition during a crash. This book contains a summary of workshop discussions and 11 presented papers in the areas of fuel and additive technologies, aircraft fuel system requirements, and the characterization of fuel fires.

To Fly and Fight Clarence E. "Bud" Anderson,2017-05-12 Bud Anderson is a flyers flyer. The Californians enduring love of flying began in the 1920s with the planes that flew over his fathers farm. In January 1942, he entered the Army Air Corps Aviation Cadet Program. Later after he received his wings and flew P-39s, he was chosen as one of the original flight leaders of the new 357th Fighter Group. Equipped with the new and deadly P-51 Mustang, the group shot down five enemy aircraft for each one it lost while escorting bombers to targets deep inside Germany. But the price was high. Half of its pilots were killed or imprisoned, including some of Buds closest friends. In February 1944, Bud Anderson, entered the uncertain, exhilarating, and deadly world of aerial combat. He flew two tours of combat against the

Luftwaffe in less than a year. In battles sometimes involving hundreds of airplanes, he ranked among the groups leading aces with 16 aerial victories. He flew 116 missions in his old crow without ever being hit by enemy aircraft or turning back for any reason, despite one life or death confrontation after another. His friend Chuck Yeager, who flew with Anderson in the 357th, says, In an airplane, the guy was a mongoosethe best fighter pilot I ever saw. Buds years as a test pilot were at least as risky. In one bizarre experiment, he repeatedly linked up in midair with a B-29 bomber, wingtip to wingtip. In other tests, he flew a jet fighter that was launched and retrieved from a giant B-36 bomber. As in combat, he lost many friends flying tests such as these. Bud commanded a squadron of F-86 jet fighters in postwar Korea, and a wing of F-105s on Okinawa during the mid-1960s. In 1970 at age 48, he flew combat strikes as a wing commander against communist supply lines. To Fly and Fight is about flying, plain and simple: the joys and dangers and the very special skills it demands. Touching, thoughtful, and dead honest, it is the story of a boy who grew up living his dream.

Flying Tigers Daniel Ford,2023-05-01 During World War II, in the skies over Burma and China, a handful of American pilots met and bloodied the Imperial Wild Eagles of Japan and won immortality as the Flying Tigers. One of America's most famous combat forces, the Tigers were recruited to defend beleaguered China for \$600 a month and a bounty of \$500 for each Japanese plane they shot down--fantastic money in an era when a Manhattan hotel room cost three dollars a night.This May 2023 revision has never-before-published information about Chennault's early years. Admirable, wrote Chennault biographer Martha Byrd of Ford's original text. A readable book based on sound sources. Expect some surprises. Flying Tigers won the Aviation/Space Writers Association Award of Excellence in the year of its first publication.

One-Man Airforce [Illustrated Edition] Major Don Salvatore Gentile,2014-08-15 Illustrated with 14 photos of the Author and the Aircraft he flew. Gentile was born in Piqua, Ohio. After a fascination with

flying as a child, his father provided him with his own plane, an Aerosport Biplane. He managed to log over 300 hours flying time by July 1941, when he attempted to join the Army Air Force. The U.S. military required two years of college for its pilots, which Gentile did not have, so he enlisted in the Royal Canadian Air Force and was posted to the UK in 1941. Gentile flew the Supermarine Spitfire Mark V with No. 133 Squadron, one of the famed Eagle Squadron during 1942. His first kills (a Ju 88 and Fw 190) were on August 1, 1942, during Operation Jubilee. In September 1942, the Eagle squadrons transferred to the USAAF, becoming the 4th Fighter Group. Gentile became a flight commander in September 1943, now flying the P-47 Thunderbolt. Having been Spitfire pilots, Gentile and the other pilots of the 4th were displeased when they transitioned to the heavy P-47. By late 1943, Group Commander Col. Don Blakeslee pushed for re-equipment with the lighter, more maneuverable P-51 Mustang. Conversion to the P-51B at the end of February 1944 allowed Gentile to build a tally of 15.5 additional aircraft destroyed between March 3 and April 8, 1944. After downing 3 planes on April 8, he was the top scoring 8th Air Force ace when he crashed his personal P-51, named Shangri La, on April 13, 1944 while stunting over the 4th FG's airfield at Debden for a group of assembled press reporters and movie cameras. Blakeslee immediately grounded Gentile as a result, and he was sent back to the US for a tour selling war bonds. In 1944, Gentile co-wrote with well-known war correspondent Ira Wolfert *One Man Air Force*, an autobiography and account of his combat missions.

China's Wings Gregory Crouch, 2012-02-28 From the acclaimed author of *Enduring Patagonia* comes a dazzling tale of aerial adventure set against the roiling backdrop of war in Asia. The incredible real-life saga of the flying band of brothers who opened the skies over China in the years leading up to World War II—and boldly safeguarded them during that conflict—*China's Wings* is one of the most exhilarating untold chapters in the annals of flight. At the center of the maelstrom is the book's courtly, laconic protagonist, American aviation executive William Langhorne Bond. In search of adventure, he arrives in Nationalist China in 1931, charged with turning around the turbulent nation's flagging airline business, the China National Aviation Corporation (CNAC). The mission will take him to the wild and lawless frontiers of commercial aviation: into cockpits with daredevil pilots flying—sometimes literally—on a wing and a prayer; into the dangerous maze of Chinese politics, where scheming warlords and volatile military officers jockey for advantage; and into the boardrooms, backrooms, and corridors of power inhabited by such outsized figures as Generalissimo and Madame Chiang Kai-shek; President Franklin Delano Roosevelt; foreign minister T. V. Soong; Generals Arnold, Stilwell, and Marshall; and legendary Pan American Airways founder Juan Trippe. With the outbreak of full-scale war in 1941, Bond and CNAC are transformed from uneasy spectators to active participants in the struggle against Axis imperialism. Drawing on meticulous research, primary sources, and extensive personal interviews with participants, Gregory Crouch offers harrowing accounts of brutal bombing runs and heroic evacuations, as the fight to keep one airline flying becomes part of the larger struggle for China's survival. He plunges us into a world of perilous night flights, emergency water landings, and the constant threat of predatory Japanese warplanes. When Japanese forces capture Burma and blockade China's only overland supply route, Bond and his pilots must battle shortages of airplanes, personnel, and spare parts to airlift supplies over an untried five-hundred-mile-long aerial gauntlet high above the Himalayas—the infamous “Hump”—pioneering one of the most celebrated endeavors in aviation history. A hero's-eye view of history in the grand tradition of Lynne Olson's *Citizens of London*, *China's Wings* takes readers on a mesmerizing journey to a time and place that reshaped the modern world.

Troubled Partnership Taylor & Francis Group,2020-12-18 During World War II, Japanese fighters, such as the famed Zero, were among the most respected and feared combat aircraft in the world. But for decades following the defeat of Japan in 1945, a variety of political and economic factors prevented Japan from developing its own modern national fighter. This changed in the 1980s. Japan began independently developing its first world-class fighter since World War II. After several years of contentious negotiations, the Japanese agreed to work with the United States to cooperatively develop a minimally modified F-16, the FS-X. The new fighter, however, has evolved into a world-class aircraft developed largely by Japanese industry primarily due to errors committed by the U.S. side. By the fall of 1995, fifty years after the end of World War II, the Zero for the 1990s will have made its first flight, catapulting Japan into the elite ranks of nations capable of developing the most advanced weapon systems. In *Troubled Partnership*, Mark Lorell traces the evolution of the FS-X, disclosing the conflicting economic and security objectives advanced by U.S. officials, the flawed U.S. policy of technology reciprocity, and the challenges of international collaboration. Its deep intimacy with the interplay of policy and economy will make this volume of intense interest to political scientists, military studies specialists, historians, and government officials.
