**From Cave Man to Cave Martian** Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

**Alien Next Door** Joey Spiotto,2015-11-03 See a new, caring side to the legendary science fiction monster as he tends to Jonesy the cat, endeavours to keep his house cleaner than the Nostromo, and searches for his place on a cold, new, alien world: Earth. *The Art of Journey* Matthew Nava,Adam Adamowicz,2012-08-28 Concept drawings created for the computer game Journey.

**The Burning** Tim Madigan,2013-07-09 "A powerful book, a harrowing case study made all the more so by Madigan's skillful, clear-eyed telling of it." —Adam Nossiter, *The New York Times Book Review* On the morning of June 1, 1921, a white mob numbering in the thousands marched across the railroad tracks dividing black from white in Tulsa, Oklahoma, and obliterated a black community then celebrated as one of America's most prosperous. 34 square blocks of Tulsa's Greenwood community, known then as the Negro Wall Street of America, were reduced to smoldering rubble.

And now, 80 years later, the death toll of what is known as the Tulsa Race Riot is more difficult to pinpoint. Conservative estimates put the number of dead at about 100 (75% of the victims are believed to have been black), but the actual number of casualties could be triple that. The Tulsa Race Riot Commission, formed two years ago to determine exactly what happened, has recommended that restitution to the historic Greenwood Community would be good public policy and do much to repair the emotional as well as physical scars of this most terrible incident in our shared past. With chilling details, humanity, and the narrative thrust of compelling fiction, *The Burning* will recreate the town of Greenwood at the height of its prosperity, explore the currents of hatred, racism, and mistrust between its black residents and neighboring Tulsa's white population, narrate events leading up to and including Greenwood's annihilation, and document the subsequent silence that surrounded the tragedy.

Missile Mouse Jake Parker, 2011 *Missile Mouse*, a secret agent for the Galactic Security Agency, must battle evil King Bognarsh who has enslaved an entire planet.

Gathering survivors from the Raven Guard and the Salamanders aboard any vessels capable of warp travel, these Shattered Legions wage a new campaign of annihilation against the traitor forces across the galaxy - a campaign masterminded by legendary warleader Shadrak Meduson. This Horus Heresy anthology contains ten short stories by authors including Dan Abnett, Chris Wraight, John French and many more. Also, in the novella *The Seventh Serpent*, Graham McNeill revisits the ragtag crew of the starship *Sisyphus* as they are drawn into a war of subterfuge against the Alpha Legion. --Page [4] of cover.

**God Complex Vol. 1: Dogma** Paul Jenkins, 2018-07-18 A young forensics investigator finds his worldview turned upside down when a bizarre religious triple homicide introduces him to the Rulers, godlike beings who have ruled humanity since the dawn of time. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years

of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Simulating Human Origins and Evolution* K. P. Wessen, 2005-04-14 The development of populations over time, and, on longer timescales, the evolution of species, are both influenced by a complex of interacting, underlying processes. Computer simulation provides a means of experimenting within an idealised framework to allow aspects of these processes and their interactions to be isolated, controlled, and understood. In this book, computer simulation is used to model migration, extinction, fossilisation, interbreeding, selection and non-hereditary effects in the context of human populations and the observed distribution of fossil and current hominoid species. The simulations described enable the visualisation and study of lineages, genetic diversity in populations, character diversity across species and the accuracy of reconstructions, allowing insights into human evolution and the origins of humankind for graduate students and researchers in the fields of physical anthropology, human evolution, and human genetics.
