Lamborghini Gautam Sen,Kaare Byberg,Branko Radovinovic,2022-04-04 A richly illustrated two-volume love letter to an extraordinary Italian carmaker. Since the unveiling of the Lamborghini Miura--the world's first V12-powered mid-engine road car--at the 1966 Geneva Motor Show, this Italian marque, with its widely recognized raging bull emblem, has been one of the most famous and desirable purveyors of the supercar. This lavish two-volume book celebrates the design history of Lamborghini through numerous previously unpublished documents and images, delving into the extraordinary shapes and the intrepid personalities who made Lamborghini what it is today. The authors make clear that what has really distinguished Lamborghini has been a series of models with ground-breaking shapes, each one a veritable design revolution. With the aid of more than a thousand images, the authors detail the design history of such beloved models as the Miura, Espada, Urraco, Countach, and Diablo, each of which astounded automotive fans as much for their daring shape, form, and aesthetic purity as for their top-notch engineering and trendsetting packaging. This deluxe history of one of the world's most celebrated automobile marques is sure to delight

Lamborghini aficionados and neophytes alike.

Go Like Hell Albert J. Baime, 2009 By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, science fiction on wheels, but was also called the Assassin because so many drivers perished while racing them. **Go Like Hell** tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. **Go Like Hell** transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the pilots who would drive them to victory, or doom.

Lamborghini Luca Molinari, Raffaello Porro, 2014 To celebrate Lamborghini's first 50 years,

authors and professionals from different fields narrate its history, present, and future in a completely new way. Lamborghini, one of the most famous and iconic of all automobile brands, will turn 50 in 2013 (1963 - 2013). Over the course of this half century, it has gradually established itself as a leader in its sector, integrating perfectly into the culture of its time and becoming a symbol of innovation in design and technology, as well as a phenomenon in culture and communication. This beautifully illustrated book describes every step of the journey, with references to cinema, technology, design and the work of the men who made their fortune from the brand. It is not the usual book about cars written for car enthusiasts, but a broader and more complex project with six carefully structured chapters (1. The history; 2. The technological innovation; 3. The design; 4. The people; 5. The image; 6. The future), accompanied by spectacular images of all the models produced up to now, revealing how Lamborghini made its way into the collective imagination and became the legend it is today. It is a large-format volume with 200 beautiful colour images, brilliantly evoking a surprising combination of tradition and innovation for all those who are interested in design, technology, material culture, communication and, of course, the classic qualities of Italian manufacture at its best.

The last Shelby Cobra Chris Theodore, 2021-09-15 Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

Lamborghini Anthony Pritchard, 2005-11-11 When the 495bhp Gallardo was launched in 2004, motoring journalists were impressed - this stylish supercar combined the ferocity of Lamborghini

with the polish and practicality of Audi and, being lower in price, it did not scorch the wallet quite as much as its bigger brother, the Murcielago. Lamborghinis have always quickened the pulse, of course, and this book shows why. Packed with model analysis, driving impressions, technical specifications, buying hints, personal anecdotes and sumptuous photographs, it tells the story of this exotic marque, from the peasant background of founder Ferruccio Lamborghini, to its burning ambition to beat Ferrari in the manufacture of supercars.

Automotive Ergonomics Heiner Bubb, Klaus Bengler, Rainer E. Grünen, Mark Vollrath, 2021-10-19 Ergonomics teaches how to design technology in such a way that it is optimally adapted to the needs, wishes and characteristics of the user. In this context, the concept of the human-machine system has become established. In a systematic way and with a detailed view of the complicated technical and perceptual psychological and methodological connections, this book explains the basics of automotive ergonomics with numerous examples. The application is shown in examples such as package, design of displays and control elements, of environmental ergonomics such as lighting, sound, vibrations, climate and smell. The design of driver assistance systems from an ergonomic perspective is also a central topic. The book is rounded off by methods of ergonomic vehicle development, the use of mock-ups, driving simulators and tests in real vehicles and prototypes. For the first time, those responsible in the automotive industry and in the field of relevant research are provided with a specialized systematic work that provides the ergonomic findings in the design of today's automobiles. This provides planners and designers of today's automobiles with concrete information for ergonomic product development, enabling them to keep an eye on decisive requirements and subsequent customer acceptance. This book is a translation of the original German 1st edition *Automobilergonomie* by Heiner Bubb, Klaus Bengler, Rainer E. Grünen & Mark Vollrath, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2015. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
