Lamborghini Gautam Sen,Kaare Byberg,Branko Radovinovic,2022-04-04 A richly illustrated two-volume love letter to an extraordinary Italian carmaker. Since the unveiling of the Lamborghini Miura--the world's first V12-powered mid-engine road car--at the 1966 Geneva Motor Show, this Italian marque, with its widely recognized raging bull emblem, has been one of the most famous and desirable purveyors of the supercar. This lavish two-volume book celebrates the design history of Lamborghini through numerous previously unpublished documents and images, delving into the extraordinary shapes and the intrepid personalities who made Lamborghini what it is today. The authors make clear that what has really distinguished Lamborghini has been a series of models with ground-breaking shapes, each one a veritable design revolution. With the aid of more than a thousand images, the authors detail the design history of such beloved models as the Miura, Espada, Urraco, Countach, and Diablo, each of which astounded automotive fans as much for their daring shape, form, and aesthetic purity as for their top-notch engineering and trendsetting packaging. This deluxe history of one of the world's most celebrated automobile marques is sure to delight Lamborghini aficionados and neophytes alike.

*Go Like Hell* Albert J. Baime,2009 By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, science fiction on wheels, but was also called the Assassin because so many drivers perished while racing them.*Go Like Hell*tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done.*Go Like Hell*transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the pilots who would drive them to victory, or doom.

Lamborghini Antonio Ghini,2023-10-10 A new updated edition of the volume released in 2020 with the history of Lamborghini. This official book

is dedicated to the history of the Italian car brand founded in Sant'Agata Bolognese in 1963 by Ferruccio Lamborghini. Ferruccio's dream was to create the perfect car and still today, more than half a century later, Lamborghini continues to produce super sport cars that are sought after and renowned throughout the world. The book is divided into five macro-sections: Where: In Sant'Agata Bolognese, Emilia, Italy - a small remote village now known throughout the world. How: With the ingredients that make it unique - the passion of the local people, mechanical purity and unstoppable technical innovation, forward-looking design, stylish and original use of color and a constant dialogue with new generations. Who: Lamborghini's strength is its people, from the past and the present, who deserve respect for what they do and what they have done. When: The history of Lamborghini spans from 1963 to today, from the brilliant moments from the past to the successes of today, as well as the more difficult periods that were overcome with great dignity and commitment. Why: All the models that have shaped the history of Lamborghini are illustrated here, including special editions, those that underwent significant evolution and unreleased models.

*Lamborghini Countach* Thillainathan Path Pathmanathan, Anne Christina Reck, 2021-08-17 When launched at the Geneva motor show in 1971, the Lamborghini Countach was like a vision of the future, with its incredibly radical styling by Bertone's Marcello Gandini. Through various evolutionary stages, the Countach remained in production from 1973 to 1990 and during that time 1,997 examples were manufactured, making it exceedingly rare as well as highly desirable. Subsequently the magnificent Countach has risen to almost mythical status among collectors and enthusiasts. Now, as the model approaches its 50th anniversary, two passionate and deeply knowledgeable Countach co-owners have written an authoritative new book -- the first English-language study of the car for 30 years -- to celebrate this fabled Italian supercar in all its glory. The Countach's spectacular design and unique engineering are explored in depth, including analysis of its Bizzarrini-designed V12 engine with forward-mounted gearbox (giving 'south-north' orientation), intricate spaceframe chassis and aerodynamics. Painstaking development of the original LP500 prototype into the final LP400 production version is covered in detail, with insights into the work of key figures Paolo Stanzani, Giampaolo Dallara, Bob Wallace and Massimo Parenti. Production evolution is explained, from LP400 to LP400S and LP500S, then the definitive 5000 Quattrovalvole (QV) versions with four-valve cylinder heads, culminating in the '881/2' and '25th Anniversary' models. For today's owners and aspiring owners, matters of maintenance and restoration are investigated, with plenty of personal perspective. Speaking from the heart: Thillainathan Pathmanathan describes a 30-year journey towards Countach ownership, including visits to the Sant'Agata factory and encounters with significant people in the Countach story. Tonino Lamborghini, son of founder Ferruccio Lamborghini, provides a special chapter dispelling common myths, misconceptions and mistakes about the cars and the company. Comprehensive presentation of data includes the best available information on the thorny subject of chassis numbering and production figures. Beautifully designed and illustrated, this book will be treasured not only by Lamborghini fans but anyone who adores sports cars, especially of the exotic Italian variety.

**World Editors** Gustavo Guerrero, Benjamin Loy, Gesine Müller, 2020-12-16 The existence of World Literature depends on specific processes, institutions, and actors involved in the global circulation of literary works. The contributions of this volume aim to pay attention to these multiple material dimensions of Latin American 20th and 21st century literatures. From perspectives informed by materialism, sociology, book studies, and digital humanities, the articles of this volume analyze the role of publishing houses, politics of translation, mediators and gatekeepers, allowing insights into the processes that enable books to cross borders and to be transformed into globally circulating commodities. The book focusses both on material (re)sources of literary archives, key actors in literary and cultural markets, prizes and book fairs, as well as on recent dimension of the digital age. Statements of some of the leading representatives of the global publishing world complement these analyses of the operations of selection and aggregation of value to literary texts.

**Race Car Design** Derek Seward, 2017-09-16 Based on the principles of engineering science, physics and mathematics, but assuming only an elementary understanding of these, this textbook masterfully explains the theory and practice of the subject. Bringing together key topics, including the chassis frame, suspension, steering, tyres, brakes, transmission, lubrication and fuel systems, this is the first text to cover all the essential elements of race car design in one student-friendly textbook. It avoids the pitfalls of being either too theoretical and mathematical, or else resorting to approximations without explanation of the underlying theory. Where relevant, emphasis is placed on the important role that computer tools play in the modern design process. This book is intended for motorsport engineering students and is the best possible resource for those involved in Formula Student/FSAE. It is also a valuable guide for practising car designers and constructors, and enthusiasts.
