The Anglo-Boer War in 100 Objects War Museum of the Boer Republics,2017-02 The Anglo-Boer War in 100 Objects brings the victories and the tragedies, the full extent of the human drama behind this war to life through 100 iconic artefacts. While a Mafeking siege note helps to illustrate the acute shortages caused by the siege, a spade used by a Scottish soldier at Magersfontein and the boots of a Boer soldier who died at Spion Kop tell of the severity of some of the famous battles. The book follows the course of the war but also highlights specific themes, such as British and Boer weaponry, medical services, POW camps, as well as major role-players on both sides. The text is interspersed with striking historical images from the museums photographic collection. A further 200 secondary objects have been included to help tell the story of a conflict that left an indelible mark on the South African landscape.

Navies in the 21st Century Conrad Waters,2016-09-30 “A range of naval experts . . . build[s] a diverse and deeply-thought out picture of where maritime warfare is now and where it is likely to go.”—Army Rumour Service What is the purpose of navies in the modern world, and what types of warship does this require? This book tackles these questions by looking at naval developments, both technological and operational, in the quarter century since the end of the Cold War. It provides the overall political and economic context, assesses significant naval operations from the first Gulf War to Russia’s annexation of Crimea, reviews changes in the objectives and composition of the principal fleets, describes major design developments amongst the main warship types, and examines wider technological and operational developments, including naval aviation, shipbuilding and manning. “A high quality publication with a great many superb photographs. For those wishing to keep fully informed on world naval affairs, it is excellent value and strongly recommended.”—Scuttlebutt “This new book follows the successful approach and format of the very popular naval annual Seaforth’s World Naval Review. Under the same editor, a new team of specialists have been assembled to write authoritative articles in their particular fields of expertise. The absorbing text is fully supported by many outstanding images—Most Recommended.”—Firetrench “Provides a most useful contextual analysis of the post-Cold War period, explaining how technological developments and a range of world events have variously shaped the fleets of today.”—Warship

Type VII U-Boats Roger Chesneau,2012-01-20 The  series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references  books, monographs, large-scale

plans and websites. This volume is devoted to the largest class of submarines ever built, the Type VII, which formed the backbone of the German effort in the critical Battle of the Atlantic. A pre-war design, the Type VII was developed as the campaign progressed and was still in frontline service in 1945. All the major variants, as well as minor changes to equipment, are covered here. With its unparalleled level of visual information — paint schemes, models, line drawings and photographs — it is simply the best reference for any modelmaker setting out to build one of these famous boats.

A Guru Is Born Takeshi Kitano, 2012-06-05 Having lost his job and his girlfriend, Kazuo becomes a member of a religious sect, after seeing the Guru heal an old woman in a wheelchair. He soon discovers the secrets of success in the sect are much the same as the business world, the power of suggestion playing a larger role than faith. When the Guru unexpectedly dies, Kazuo is nominated to continue the sect as the new Guru.

Thief Of Thieves #1 Robert Kirkman, Nick Spencer, 2012-02-08 Conrad Paulson lives a secret double life as master thief Redmond. There is nothing he can't steal, nothing he can't have... except for the life he left behind. Now, with a grown son he hardly knows, and an ex-wife he never stopped loving, Conrad must try to piece together what's left of his life, before the FBI finally catch up to him... but it appears they are the least of his worries.

Great Western, 0-6-2 Tank Classes David Maidment, 2020-10-19 After tackling the GW pannier tanks in his 'Locomotive Portfolios' for Pen & Sword, author David Maidment seeks out descriptions and photographs of the GW 0-6-2 tank engines, the majority of which were built by the Rhymney, Taff Vale, Barry and other Welsh railways from the last decade or so of the nineteenth century onwards. The engines of eight different companies, absorbed by the GWR in 1922, are described and illustrated, and the way in which many were modernised and rebuilt at Swindon or Caerphilly Works in the 1920s. Charles Collett was, however, faced with a motive power crisis in the mining valleys at the Grouping, as many of the companies had economised on essential maintenance as the GW's take-over drew near, and he had to hurriedly design a standard 0-6-2T to complement and bolster their work as the powerful GW 2-8-0Ts were too heavy and wide for many of the Cardiff valleys. These engines, the 56XX & 66XX classes, became part of the South Wales scene between 1925 and 1964, mainly running the coal traffic between pits and docks, although they dominated Cardiff Valley passenger services until the influx of BR 3MT 2-6-2Ts and GW 41XX 2-6-2Ts in 1954/5. The book has nearly 40,000 words of text and around 300 black & white photographs.

If Chins Could Kill Bruce Campbell, 2015-10-01 *If Chins Could Kill: Confessions of a B Movie Actor* Here we are together in the digital universe. Somehow, you've clicked yourself to this page. If you came here of your own free will and desire, you and I are going to get along just fine. Life is full of choices. Right now, yours is whether or not to download the autobiography of a mid-grade, kind of hammy actor. Am I supposed to know this guy? you think to yourself. No-and that's exactly the point. You can download a terabyte of books about famous actors and their high-falootin' shenanigans. I don't want to be a spoilsport, but we've all been down that road before. Scroll down to that Judy Garland biography. You know plenty about her already-great voice, troubled life. Scroll down a little further to the Charlton Heston book. Same deal. You know his story too-great voice, troubled toupee. The truth is that though you might not have a clue who I am-unless you watch cable very late at night-there are countless working stiffs like me out there, grinding away every day at the wheel of fortune. *If Chins Could Kill: Confessions of a B Movie Actor* documents my time in blue-collar Hollywood, where movies are cheap, the hours are long, and the filmmaking process can be very personal. To keep up with the times, I've digitized Chins. It was originally published in hardcover/analog fifteen years ago, which is a vast amount of time in the evolution of books and technology, and it was time to get current. The advance of technology is great for a book like this, which is jammed full of pictures. When it came out originally, the photographs all had to be black and white and moderately sized on the page. Now, any photo that was originally taken in color can strut its stuff. Overall, the resolution of the images is off-the-charts better than the first go-around. This is one sequel that I'm happy to be a part of, since we could make so many technical improvements. The process was very similar to restoring an old movie. Since I knew that it was going to be reissued, I also had a look at the story being told and decided to condense, move, or clarify some chapters, all or in part. I also tried to add a hint of historical context, since it has been a decade and a half since Chins first came out. I hope you enjoy it. Regards, Bruce Campbell

British Naval Weapons of World War Two, Volume III Norman Friedman, 2020-07-30 "Lambert was a drafter of no mean skill . . . his drawings are concise, clear, and invaluable to scratchbuilders and super-detailers. Very highly recommended!" —Nautical Research Journal John Lambert was a renowned naval draftsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts. By the time of his death in 2016 he had produced over 850 sheets of drawings, many of which had never been published. Now they have become available in these remarkable collections, with expert commentary and captioning included. The initial volumes concentrate on British naval weaponry used in the Second World War, thus completing the project Lambert was working on when he died. His interest was always focused on smaller warships and his weapons drawings tend to be of open mountings—the kind that present a real challenge to modelmakers—rather than enclosed turret guns, but he also produced drawings of torpedo tubes, underwater weapons, fire-control directors, and even some specific armament-related deck fittings. Following the earlier volumes on destroyer and escort armament, this one covers the multitude of weapons carried by Coastal Forces, many of which were improvised, ad hoc, or obsolescent, but eventually led to powerful purpose-designed weaponry. An appendix covering the main deck guns carried by British submarines of this

era is included, along with an introductory essay by naval ordnance authority Norman Friedman and a selection of photos.
