Shadow Mountain Renee Askins,2004-01-06 After forming an intense bond with Natasha, a wolf cub she raised as part of her undergraduate research, Renée Askins was inspired to found the Wolf Fund. As head of this grassroots organization, she made it her goal to restore wolves to Yellowstone National Park, where they had been eradicated by man over seventy years before. In this intimate account, Askins recounts her courageous fifteen-year campaign, wrangling along the way with Western ranchers and their political allies in Washington, enduring death threats, and surviving the anguish of illegal wolf slayings to ensure that her dream of restoring Yellowstone's ecological balance would one day be realized. Told in powerful, first-person narrative, *Shadow Mountain* is the awe-inspiring story of her mission and her impassioned meditation on our connection to the wild.

Basics of Virtual Reality Armin Grasnack,2022-01-04 Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition Grundlagen der virtuellen Realität by Armin Grasnack, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Eyes as Big as Plates Karoline Hjorth,Riitta Ikonen,2017 Eyes as Big as Plates is an ongoing collaborative photography and sculpture project by Norwegian-Finnish artist duo Karoline Hjorth and Riitta Ikonen (both born 1980). Initially a play on characters from Nordic folklore, the series has evolved into a search for the human connection to nature. Hjorth & Ikonen work together throughout the process with their complementary skills (Karoline is the photographer in the duo, while Riitta works mainly with the creation of the wearable sculptures). Since 2011 the duo has collaborated with retired farmers, fishermen, zoologists, plumbers, opera singers, housewives, artists and academics. Each character inhabits the landscape in a wearable sculpture made from natural materials. The book features portraits, field notes, essays and behind-the-scenes stories from many of the project's 60 shoots. With international press coverage in the Huffington Post, the BBC, TIME LightBox, Life and elsewhere, plus a highly successful Kickstarter campaign attracting a large American audience, the series has developed into a project with universal appeal.
