The Cutting Edge Mark A. Lorell, Hugh P. Levaux,1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.

Mindset Carol S. Dweck,2007-12-26 From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn

and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Cherries John Podlaski, 2010-04-20 In 1970, John Kowalski is one of many young, naive teenage soldiers sent to Vietnam to fight in an unpopular war. Dubbed "Cherries" by their more seasoned peers, these newbies suddenly found themselves thrust into the middle of a terrible nightmare - literally forced to become men overnight. On-the-job-training is intense, however, most of these teenagers were hardly ready to absorb the harsh mental, emotional, and physical stress of war. When coming under enemy fire for the first time and witnessing death first-hand, a life changing transition begins...one that can't be reversed. The author is an excellent story teller, readers testify that they are right there with the characters, joining them in their quest

for survival, sharing the fear, awe, drama, and sorrow, witnessing bravery and sometimes, even laughing at their humor. It's a story that is hard to put down. When soldiers return home from war, all are different - changed for life. Cherries tells it like it is and when finished, readers will better understand what these young men had to endure, and why change is imminent.

Piece of Cake Derek Robinson, 2013-11-05 From the Phoney War of 1939 to the Battle of Britain in 1940, the pilots of Hornet Squadron learn their lessons the hard way. Hi-jinks are all very well on the ground, but once in a Hurricane's cockpit, the best killers keep their wits close. Newly promoted Commanding Officer Fanny Barton has a job on to whip the Hornets into shape before they face the Luftwaffe's seasoned pilots. And sometimes Fighter Command, with its obsolete tactics and stiff doctrines, is the real menace. As with all Robinson's novels, the raw dialogue, rich black humor and brilliantly rendered, adrenaline-packed dogfights bring the Battle of Britain, and the brave few who fought it, to life.

Goshawk Squadron Derek Robinson, 2013-09-03 Known for his black humor and expertise in military aviation, Derek Robinson is best renowned for his novels on the Royal Flying Corps. The Goshawk Squadron was shortlisted for the Booker Prize. World War One pilots were the knights of the sky, and the press and public idolised them as gallant young heroes. At just twenty-three, Major Stanley Woolley is the old man and commanding officer of Goshawk Squadron. He abhors any notion of chivalry in the clouds and is determined to obliterate the decent, gentlemanly outlook of his young, public school-educated pilots--for their own good. But as the war goes on he is forced to throw greener and greener pilots into the meat grinder. Goshawk Squadron finds its gallows humor and black camaraderie no defense against a Spandau

bullet to the back of the head.

General Kenney Reports: A Personal History of the Pacific War, 1997 General Kenney Reports is a classic account of a combat commander in action. General George Churchill Kenney arrived in the South-west Pacific theater in August 1942 to find that his command, if not in a shambles, was in dire straits. The theater commander, General Douglas MacArthur, had no confidence in his air element. Kenney quickly changed this situation. He organized and energized

the Fifth Air Force, bringing in operational commanders like Whitehead and Wurtsmith who knew how to run combat air forces. He fixed the logistical swamp, making supply and maintenance supportive of air operations, and encouraging mavericks such as Pappy Gunn to make new and innovative weapons and to explore new tactics in airpower application. The result was a disaster for the Japanese. Kenney's airmen used air power-particularly heavily armed B-25 Mitchell bombers used as commerce destroyers-to savage Japanese supply lines, destroying numerous ships and effectively isolating Japanese garrisons. The classic example of Kenney in action was the Battle of the Bismarck Sea, which marked the attainment of complete Allied air dominance and supremacy over Japanese naval forces operating around New Guinea. In short, Kenney was a brilliant, innovative airman, who drew on his own extensive flying experiences to inform his decision-making. General Kenney Reports is a book that has withstood the test of time, and which should be on the shelf of every airman.

Indigenous and Decolonizing Studies in Education Linda Tuhiwai Smith, Eve Tuck, K. Wayne Yang, 2018-06-14 Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, Indigenous and Decolonizing Studies in Education features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and

education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices, refusals of state policies, and land-based and water-based pedagogies.
