The Vintage Years of Airfix Box Art Roy Cross,2009-08-01 Airfix has been commercially producing plastic kits since 1952 and its models have been made by successive generations of young boys and men alike. In the 1960s, a talented graphic artist called Roy Cross was commissioned to paint some of the box art for Airfix, and for a ten-year-period he provided many of the glorious paintings seen on the boxes, setting new standards for realism and accuracy. Many are still being used today, a full four decades later. Inside the pages of this book are some of Roy's best artworks, shown here in full format and in superb detail, with many reproduced here in book form for the very first time. As well as his vintage box art, Roy has included many sketches and alternative versions of his Airfix box art. After Roy left Airfix in 1974, the company went through a turbulent time. The present owners are Hornby, who have ambitious plans for Airfix and the other brands it acquired including Scalextric and Corgi. The decade that Roy Cross worked for Airfix, though, could be classed as their vintage era, with some of their finest models being produced then in their millions, ready for eager youngsters to build up into detailed miniature models of their favorite aircraft, ships and locomotives.

Postwar Aircraft Jerry Scutts,2000-10-27 Postwar military aviation is dominated by the multi-role jet aircraft. This book looks at military jets from the F-86 Sabre of the Korean War through to the Tornados and F-18s of today and the key issues associated with accurate detailing, markings and camouflage schemes.

Romanesque Renaissance Konrad Adriaan Ottenheym, 2021-01-11 In the renaissance also architecture from c. 800–1200 was regarded as a useful source of inspiration for contemporary building, sometimes by misinterpreting these medieval architecture as roman structures, sometimes because that era was also regarded as a glorious 'ancient' past.

Mind-Blowing Modular Origami Byriah Loper, 2016-10-11 Modular origami is the latest craze in paper folding! These three-dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear wire frame approach, which results in a very complex-looking model that reveals the interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York, and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or shelf!

Papertoy Glowbots Brian Castleforte, 2016-08-23 Origami meets amazing creatures in a book of paper craft fun! Papertoy Glowbots introduces 46 robots that have the added cool factor of lighting up, whether using glow-in-the-dark stickers that come with the book or light sources like flashlights, Christmas tree lights, and electric tea lights. The 46 die-cut paper robots are created by Brian Castleforte, author of Papertoy Monsters, along with the hottest papertoy designers from around the world. Meet the robots and read about their entertaining backstories in the front, then turn to the card stock section in the back to build them. The templates are die-cut and ready to pop out, fold, and glue. Bold, colorful graphics ensure the robots look as amazing in the daytime as they do with the lights off.

One Place after Another Miwon Kwon, 2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many

permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

Airborne Warfare James Maurice Gavin, 2020-04-13 To every member of the 82nd Airborne Division who dropped as part of the American paratroop landings during World War Two, they breathed a little easier knowing their commander Jumpin' Jim Gavin would be jumping with them. General Gavin's paratroops drop-landed and fought in Sicily, Normandy on D-Day and during the abortive attempt to capture the Rhine bridges during Operation Market-Garden. He shared the risks of all his men parachuting into enemy territory, often only armed with his GI issue rifle. His memoirs are an outstanding addition to the literature of the Airborne in World War II.

Hardware: The Definitive SF Works of Chris Foss Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." – Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." – Alejandro Jodorowsky

Princess Labelmaker to the Rescue! (Origami Yoda #5) Tom Angleberger, 2016-08-16 In *Princess Labelmaker to the Rescue*, the war against the FunTime Menace--aka test prep--wages on at McQuarrie Middle School. Our heroes have already won one battle, with the help of surprising ally Jabba the Puppett. But to defeat the Dark Standardized Testing Forces they're going to need an even bigger, even more surprising ally: Principal Rabbski. With pressure from great forces--the school board--will this former enemy join the Rebellion, or will her transformation into Empress Rabbski, Dark Lord of the Sith, be complete? With this topical episode, Tom Angleberger demonstrates once again that his grasp of middle-school emotions, humor and behavior is spot-on (Scripps Howard News Service). Praise for *Princess Labelmaker to the Rescue* Fans will devour this satisfying and nicely realistic conclusion to the story set up in the previous volume. Characters grow, and non-Star Wars pop-culture references seep in. Readers new to the series are advised to go back to the beginning; they won't regret it. --Kirkus Reviews These books are more popular than a working droid on Tatooine. Expect the usual army of young Jedis to come out swinging for a copy. --Booklist
