This book presents the best 60 projects of the 2006, 2007, and 2008 Skyscraper Competition. An investigation by architects, students, and designers on the future of the skyscraper. What is the skyscraper in the beginning of the XXI Century? What is the historical and social context of these mega-structures? What is their response towards the urban fabric? Is the modern skyscraper a city in and of itself? Is the human scale lost? Talented architects have entered these competitions to explore, re-think, and speculate on this fascinating architectural genre. Each project includes a full description by the author as well as several illustrations and drawings. In addition, renowned architects were invited to present their thoughts on this fascinating architectural genre.

Mercury Pictures Presents Anthony Marra, 2023-06-27 NEW YORK TIMES BESTSELLER • Includes a behind-the-scenes conversation with bestselling novelist Amor Towles • The epic story of a brilliant woman who must reinvent herself to survive in 1940s Hollywood and fascist Europe, a timeless tale of love, deceit, and sacrifice—and a perfect book club pick—from the award-winning author of *A Constellation of Vital Phenomena* “A genuinely moving and life-affirming novel that’s a true joy to read.”—Celeste Ng, author of *Little Fires Everywhere* “A gorgeous book . . . sublime.”—The New York Times (Editors’ Choice) ONE OF THE BEST BOOKS OF THE YEAR: NPR, The Guardian, Booklist Like many before her, Maria Lagana has come to Hollywood to outrun her past. Born in Rome, where every Sunday her father took her to the cinema instead of church, Maria immigrates with her mother to Los Angeles after a childhood transgression leads to her father’s arrest. Fifteen years later, on the eve of America’s entry into World War II, Maria is an associate producer at Mercury Pictures, trying to keep her personal and professional lives from falling apart. Her mother won’t speak to her. Her boss, a man of many toupees, has been summoned to Washington by congressional investigators. Her boyfriend, a virtuoso Chinese American actor, can’t escape the studio’s narrow typecasting. And the studio itself, Maria’s only home in exile, teeters on the verge of bankruptcy. Over the coming months, as the bright lights go dark across Los Angeles, Mercury Pictures becomes a nexus of European émigrés: modernist poets trying their luck as B-movie screenwriters, once-celebrated architects becoming scale-model miniaturists, and refugee actors finding work playing the very villains they fled.

While the world descends into war, Maria rises through a maze of conflicting politics, divided loyalties, and jockeying ambitions. But when the arrival of a stranger from her father's past threatens Maria's carefully constructed facade, she must finally confront her father's fate—and her own. Written with intelligence, wit, and an exhilarating sense of possibility, Mercury Pictures Presents spans many moods and tones, from the heartbreaking to the ecstatic. It is a love letter to life's bit players, a panorama of an era that casts a long shadow over our own, and a tour de force by a novelist whose work *The Washington Post* calls "a flash in the heavens that makes you look up and believe in miracles."

The Things They Carried Tim O'Brien, 2009-10-13 Look for O'Brien's new book, *American Fantastica*, on sale October 24th A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Sonic Peace Kiriu Minashita, 2017-09-19 Even while boasting of its rapid strength and speed, Kiriu Minashita says in the afterword to *Sonic Peace*, the world is being ecstatically eroded by the violent rewriting of meaning. *Sonic Peace* is a work of extreme genius and unassailable critique, fused with beauty and

lightheartedness: a love story set against the backdrop of an apocalyptic Tokyo. Published in Japan in 2005, Sonic Peace won the celebrated Chuya Nakahara Prize in 2006, and solidified Minashita's status as one of the most important critical Japanese voices of her generation.

The Camel and the Wheel Richard W. Bulliet, 1990 Why, for many centuries, was the wheel abandoned in the Middle East in favor of the camel as a means of transport? This richly illustrated study explains this anomaly. Drawing on archaeology, art, technology, anthropology, linguistics, and camel husbandry, Bulliet explores the implications for the region's economic and social development during the Middle Ages and into modern times.

Towers of Gold Frances Dinkelspiel, 2010-01-05 Isaias Hellman, a Jewish immigrant, arrived in California in 1859 with very little money in his pocket and his brother Herman by his side. By the time he died, he had effectively transformed Los Angeles into the modern metropolis we see today. In Frances Dinkelspiel's groundbreaking history, the early days of California are seen through the life of a man who started out as a simple store owner only to become California's premier money-man of the late 19th and early 20th century. Growing up as a young immigrant, Hellman quickly learned the use to which capital could be put, founding LA's Farmers and Merchants Bank, that city's first successful bank, and transforming Wells Fargo into one of the West's biggest financial institutions. He invested money with Henry Huntington to build trolley lines, lent Edward Doheney the funds that led him to discover California's huge oil reserves, and assisted Harrison Gary Otis in acquiring full ownership of the Los Angeles Times. Hellman led the building of Los Angeles' first synagogue, the Wilshire Boulevard Temple, helped start the University of Southern California and served as Regent of the

University of California. His influence, however, was not limited to Los Angeles. He controlled the California wine industry for almost twenty years and, after San Francisco's devastating 1906 earthquake and fire, calmed the financial markets there in order to help that great city rise from the ashes. With all of these accomplishments, Isaias Hellman almost single-handedly brought California into modernity. Ripe with great historical events that filled the early days of California such as the Gold Rush and the San Francisco earthquake, *Towers of Gold* brings to life the transformation of California from a frontier society whose economy was driven by the barter of hides and exchange of gold dust into a vibrant state with the strongest economy in the nation.

Art Deco Mailboxes: An Illustrated Design History Karen Greene, Lynne Lavelle, 2014-12-29 A great gift book for lovers of unsung urban decorative art and unique architectural details. Mailboxes and their chutes were once as essential to the operation of any major hotel, office, civic, or residential building as the front door. In time they developed a decorative role, in a range of styles and materials, and as American art deco architecture flourished in the 1920s and 1930s they became focal points in landmark buildings and public spaces: the GE Building, Grand Central Terminal, the Woolworth Building, 29 Broadway, the St. Regis Hotel, York & Sawyer's Salmon Tower, the Waldorf Astoria, and many more. While many mailboxes have been removed, forgotten, disused, or painted over (and occasionally repurposed), others are still in use, are polished daily, and hold a place of pride in lobbies throughout the country. A full-color photographic survey of beautiful early mailboxes, highlighting those of the grand art deco

period, together with a brief history of the innovative mailbox-and-chute system patented in 1883 by James Cutler of Rochester, New York, Art Deco Mailboxes features dozens of the best examples of this beloved, dynamic design's realization in the mailboxes of New York City as well as Chicago, Philadelphia, Indianapolis, Cincinnati, and beyond.

Geology of the San Francisco Bay Region Doris

Sloan,2006-06-27 You can't really know the place where you live until you know the shapes and origins of the land around you. To feel truly at home in the Bay Area, read Doris Sloan's intriguing stories of this region's spectacular, quirky landscapes.—Hal Gilliam, author of *Weather of the San Francisco Bay Region* This is a fascinating look at some of the world's most complex and engaging geology. I highly recommend this book to anyone interested in an understanding of the beautiful landscape and dynamic geology of the Bay Area.—Mel Erskine, geological consultant This accessible summary of San Francisco Bay Area geology is particularly timely. We are living in an age where we must deal with our impact on our environment and the impact of the environment on us. Earthquake hazards, and to a lesser extent landslide hazards, are well known, but the public also needs to be aware of other important engineering and environmental impacts and geologic resources. This book will allow Bay Area residents to make more intelligent decisions about the geological issues affecting their lives.—John Wakabayashi, geological consultant

The War of the Worlds Illustrated H G Wells,2020-11-13 The

War of the Worlds is a science fiction novel by English author H. G. Wells, first serialized in 1897 by Pearson's Magazine in the UK and by Cosmopolitan magazine in the US. The novel's first appearance in hardcover was in 1898 from publisher William Heinemann of London. Written between 1895 and 1897, it is one of the earliest stories to detail a conflict between mankind and an extraterrestrial race. The novel is the first-person narrative of both an unnamed

The Shard Ken Powell, 2013 Designed by the internationally renowned architect Renzo Piano and developed by Irvine Sellar, The Shard is one of the world's most striking new skyscrapers and is now, at 310m, the tallest building in Western Europe. From 1 February 2013, people will be able to visit The View on floors 68, 69 and 72 - almost twice the height of any other viewing gallery in London - from where they will experience a 360-degree, 40-mile view over one of the world's most historic and exciting cities. Organized spread by spread, easy to navigate and as elegantly designed as the building itself, the official guidebook sets The Shard in the context of Southwark, one of the capital's most historic boroughs, before outlining the design principles and construction story of the building. Also included are Q&As with both the architect and the developer and fascinating facts and stats relating to this extraordinary building. Central to the book's purpose as the official guidebook are a series of twelve high-resolution double-page panoramic photographs of the views from The Shard (three per compass point: looking left, looking right and looking down), each annotated to identify London's key buildings, monuments and landmarks. An informative souvenir for visitors to The Shard, the book will also be available in the trade, making it available to all Londoners and visitors to the capital.

Regeneration Paul Hawken, 2021-09-21 A radically new understanding of and practical approach to climate change by noted environmentalist Paul Hawken, creator of the New York Times bestseller Drawdown Regeneration offers a visionary new approach to climate change, one that weaves justice, climate, biodiversity, equity, and human dignity into a seamless tapestry of action, policy, and transformation that can end the climate crisis in one generation. It is the first book to describe and define the burgeoning regeneration movement spreading rapidly throughout

the world. Regeneration describes how an inclusive movement can engage the majority of humanity to save the world from the threat of global warming, with climate solutions that directly serve our children, the poor, and the excluded. This means we must address current human needs, not future existential threats, real as they are, with initiatives that include but go well beyond solar, electric vehicles, and tree planting to include such solutions as the fifteen-minute city, bioregions, azolla fern, food localization, fire ecology, decommodification, forests as farms, and the number one solution for the world: electrifying everything. Paul Hawken and the nonprofit Regeneration Organization are launching a series of initiatives to accompany the book, including a streaming video series, curriculum, podcasts, teaching videos, and climate action software. Regeneration is the inspiring and necessary guide to inform the rapidly spreading climate movement.

A Visual Inventory John Pawson, 2012-03-05 John Pawson's career as an architect and designer spans a variety of sizes and programs: from bowls to bridges, and monasteries to Calvin Klein stores. In addition to his acclaimed design work, he is the author of Phaidon's successful *Minimum*, a book that paired images and captions to illustrate the notion of simplicity in a beautiful and inspirational manner. *Visual Inventory* presents some of the images from Pawson's personal collection of over 200,000 digital snapshots. The book opens with an essay explaining the importance of photography as a tool for Pawson's work, and the images are set one per page with illuminating captions. Covering a huge range of subjects, the photographs form a remarkable body of reference material. Some of the images illustrate a particular idea out form, material or space; others reflect the author's interest in returning repeatedly to certain subjects, capturing the changes brought by different weather, light conditions, seasons and patterns of use. Each image has been chosen for the book because it is useful, offering a lesson in visual thinking. None of the photographs in the book have been cropped or altered; it is the

selection, arrangement and captioning of the images that make this book unique, valuable and attractive to any architect, designer, artist or student who wants to see the world around them with a stronger eye.

This Model World Anthony Byrt, 2016-09-12 In April 2011, Anthony Byrt was living in Berlin and building a career as a critic, writing about contemporary art for magazines like *frieze* and *Artforum International*. Then one day his world turned upside down. A baby boy, two weeks in intensive care, and Byrt, his wife and new-born son suddenly found themselves booked on a one-way trip home to New Zealand. *This Model World* is a portrait of what Byrt found when he came back. Built around hundreds of hours spent in galleries, artists' studios and on the road from Brisbane to Detroit to Venice, this is a deeply personal journey through the contemporary New Zealand art world. It's a book about major figures like Yvonne Todd, Shane Cotton, Billy Apple, Peter Robinson, Judy Millar and Simon Denny, and emerging artists such as Luke Willis Thompson, Shannon Te Ao and Ruth Buchanan. It's about severed heads and failed cities; about hot young things and old men with a final point to prove; about looking for God and finding Edward Snowden; and it's about what it means to investigate the boundary where our bodies hit the world.
