A Blind Guide to Stinkville Beth Vrabel, 2016-08-02 Before Stinkville, Alice didn't think albinism—or the blindness that goes with it—was a big deal. Sure, she uses a magnifier to read books. And a cane keeps her from bruising her hips on tables. Putting on sunscreen and always wearing a hat are just part of life. But life has always been like this for Alice. Until Stinkville. For the first time in her life, Alice feels different—like she's at a disadvantage. Back in her old neighborhood in Seattle, everyone knew Alice, and Alice knew her way around. In Stinkville, Alice finds herself floundering—she can't even get to the library on her own. But when her parents start looking into schools for the blind, Alice takes a stand. She's going to show them—and herself—that blindness is just a part of who she is, not all that she can be. To prove it, Alice enters the Stinkville Success Stories essay contest. No one, not even her new friend Kerica, believes she can scout out her new town's stories and write the essay by herself. The funny thing is, as Alice confronts her own blindness, everyone else seems to see her for the first time. This is a stirring small-town story that explores many different issues—albinism, blindness, depression, dyslexia, growing old, and more—with a light touch and lots of heart. Beth Vrabel's characters are complicated and messy, but they come together in a story about the strength of community and friendship. This paperback edition includes a Q&A with the author and a sneak peak at the upcoming *The Blind Guide to Normal*. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Aramis, or The Love of Technology Bruno Latour,1996-04-01 Bruno Latour has written a unique and wonderful tale of a technological dream gone wrong. The story of the birth and death of Aramis--the guided-transportation system intended for Paris--is told in this thought-provoking and fictional account by several different parties: an engineer and his professor; company executives and elected officials; a sociologist; and finally Aramis itself, who delivers a passionate plea on behalf of technological innovations that risk being abandoned by their makers. As the young engineer and professor follow Aramis's trail--conducting interviews, analyzing documents, assessing the evidence--perspectives keep shifting: the truth is revealed as multilayered, unascertainable, comprising an array of possibilities worthy of Rashomon. This charming and profound book, part novel and part sociological study, is Latour at his thought-provoking best.

Fundamental Principles of Optical Lithography Chris Mack,2011-08-10 The fabrication of an integrated circuit requires a variety of physical and chemical processes to be performed on a semiconductor substrate. In general, these processes fall into three categories: film deposition, patterning, and semiconductor doping. Films of both conductors and insulators are used to connect and isolate transistors and their components. By creating structures of these various components millions of transistors can be built and wired together to form the complex circuitry of modern microelectronic devices. Fundamental to all of these processes is lithography, ie, the formation of three-dimensional relief images on the substrate for subsequent transfer of the pattern to the substrate. This book presents a complete theoretical and practical treatment of the topic of lithography for both students and researchers. It comprises ten detailed chapters plus three appendices with problems provided at the end of each chapter. Additional Information: Visiting <http://www.lithoguru.com/textbook/index.html> enhances the reader's understanding as the website supplies information on how you can download a free laboratory manual, Optical Lithography Modelling with MATLAB®, to accompany the textbook. You can also contact the author and find help for instructors.

A History of the World Andrew Marr,2012-09-27 Fresh, exciting and vividly readable, this is popular history at its very best. Our understanding of world history is changing, as new discoveries are made on all the continents and old prejudices are being challenged. In this truly global journey, political journalist Andrew Marr revisits some of the traditional epic stories, from classical Greece and Rome to the rise of Napoleon, but surrounds them with less familiar material, from Peru to the Ukraine, China to the Caribbean. He looks at cultures that have failed and vanished, as well as the origins of today's superpowers, and finds surprising echoes and parallels across vast distances and epochs. A History of the World is a book about the great change-makers of history and their times, people such as

Cleopatra, Genghis Khan, Galileo and Mao, but it is also a book about us. For 'the better we understand how rulers lose touch with reality, or why revolutions produce dictators more often than they produce happiness, or why some parts of the world are richer than others, the easier it is to understand our own times.'

Welcome to Bayou Town! Schadler, Cherie D., 2010-09-23 I know a place not very far away where we can dance with crawfish and play 'Alligator-Keep-Away!' We can fish on the bayou, and climb the live oak trees. I'd be very pleased to show you if you'd like to come with me. The name of this wonderful place is Bayou Town, and it is the home of the Boudreaux family. They are some of the nicest people in the world. Mr. Boudreaux, his wife Miss Marie, and their son Toby love to welcome visitors to Bayou Town. And then there is the Boudreauxs' family pet-an alligator named Alfons! He always plays pranks on unsuspecting people in Bayou Town. When he steals somebody's hat, then everybody knows that it's time for a game of Alligator-Keep-Away. The animals, people, and games all make Bayou Town a very fun, and very special, place. Cherie D. Schadler, with her husband, entertains children throughout the South with puppet shows featuring the characters from Welcome to Bayou Town! She has long been interested in producing wholesome, quality family entertainment. Ann Biedenharn Jones, a native of Vicksburg, Mississippi, is a naturalist painter and a portrait painter.

Acting One/Acting Two Robert Cohen, 2007-01-17 The new, fifth edition of Robert Cohen's Acting One, the text used to teach acting on more campuses than any other, has now been combined for the first time with his Acting Two, (the second edition of his previously-titled Advanced Acting). Together, Acting One/Acting Two provides a comprehensive and fully integrated system of all acting, from the most realistic to the most stylized. Part One (Acting One) covers basic skills such as talking, listening, tactical interplay, physicalizing, building scenes, and making powerful acting choices. Part Two (Acting Two) provides a series of exercises that encourage the student actor's self-extension into radically different styles (historical, literary, fantastical) and characterizations; then coaches the student through

scenework in a variety of historical periods (Greek, Commedia, Elizabethan, Molière, Restoration, Belle Epoque), as well as modern hyper-realistic theatrical forms such as the theatres of alienation and the absurd, and exemplary recent dramas by Tony Kushner, Margaret Edson, August Wilson and Doug Wright.

Along the way, Chin shares behind-the-scenes details about how he captured such astounding images in impossible conditions, and tells the stories of the legendary adventurers and remarkable athletes he has photographed, including Alex Honnold, the star of his Academy Award-winning documentary film *Free Solo*; ski mountaineer Kit DesLauriers; snowboarder Travis Rice; and mountaineers Conrad Anker and Yvon Chouinard. These larger-than-life images, coupled with stories of outsized drive and passion, of impossible goals with life or death stakes, of partnerships forged through incredible hardship, are sure to inspire wonder and awe.

Audiovisual Translation: Subtitling Jorge Díaz-Cintas, Aline Remael, 2014-06-03 Audiovisual Translation: Subtitling is an introductory textbook which provides a solid overview of the world of subtitling. Based on sound research and first-hand experience in the field, the book focuses on generally accepted practice but identifies current points of contention, takes regional and medium-bound variants into consideration, and traces new developments that may have an influence on the evolution of the profession. The individual chapters cover the rules of good subtitling practice, the linguistic and semiotic dimensions of subtitling, the professional environment, technical considerations, and key concepts and conventions, providing access to the core skills and knowledge needed to subtitle for television, cinema and DVD. Also included are graded exercises covering core skills. Audiovisual Translation: Subtitling can be used by teachers and students as a coursebook for the classroom or for self-learning. It is also aimed at translators and other language professionals wishing to expand their sphere of activity. While the working language of the book is English, an accompanying DVD contains sample film material in Dutch, English, French, Italian and Spanish, as well as a range of dialogue lists and a key to some of the exercises. The DVD also includes WinCAPS, SysMedia's professional subtitling preparation software package, used for broadcast television around the world and for many of the latest multinational DVD releases of major Hollywood projects.

Cortical Visual Impairment Christine Roman-Lantzy, 2007 The current leading cause of visual impairment among children is not a disease or condition of the eyes, but cortical visual impairment (CVI)-also known as cerebral visual impairment-in which visual dysfunction is caused by damage or injury to the brain. The definition, nature, and treatment of CVI are the focus of great concern and widespread debate, and this complex condition poses challenges to professionals and families seeking to support the growth and development of visually impaired children. On the basis of more than 30 years' experience in working with hundreds of children of all ages with CVI, Christine Roman-Lantzy has developed a set of unique assessment tools and systematic, targeted principles whose use has helped children learn to use their vision more effectively. This one-of-a-kind resource provides readers with both a conceptual framework with which to understand working with CVI and concrete strategies to apply directly in their work.
