Scale Spacecraft Modelling Mat Irvine, 2007-02-01 Rockets and spacecraft were among the very first models made as commercial kits, and although never as numerous as aircraft, ships or road vehicles, the many kits produced over the years provide a fascinating niche in the world of model-making. The build-ups in this book reflect the current situation with spacecraft modelling; although there are still a number of conventional all-plastic kits available, there is also a growing range that uses more specialist materials, especially resins. The book explains the various techniques required when

dealing with these non-traditional materials. Scale Spacecraft Modelling also covers scratch building and adaptation, the techniques needed to make those pristine models really dirty to match the ones you see in the movies, and the design and construction of realist dioramas and settings.

Goldfish on Vacation Sally Lloyd-Jones, 2018-04-10 From a New York Times bestselling author and a rising-star illustrator comes a humorous tale based on an amazing-but-true story about the summer a city fountain was used as a goldfish pond. H, Little O, and Baby Em are stuck in the city for the summer with only their pet goldfish—Barracuda, Patch, and Fiss—for company. It's

looking like it might be a pretty boring vacation, but one day, something exciting happens. Someone starts fixing up the old fountain down the street—the one Grandpa says horses used to drink from before everyone had cars—and a sign appears: Calling All Goldfish Looking for a Summer Home. H, Little O, and Baby Em can't wait to send their goldfish on vacation, and the fish, well, they seem pretty excited too. Based on the true story of Hamilton Fountain in New York City, this charming tale of one special summer will delight readers young and old. Author's Note included. Praise for How to Be a Baby . . . by Me, the Big Sister by Sally Lloyd-Jones: This book is adorable, original, well-illustrated and fabulous. —The New York Times Praise for Jackrabbit McCabe and the Electric Telegraph, illustrated by Leo Espinosa: Espinosa creates colorful, dynamic images that burst from the page. —Booklist

The Assignment Liza Wiemer, 2021-08-31 Inspired by a real-life incident, this riveting novel explores the dangerous impact discrimination and antisemitism have on one community when a school assignment goes terribly wrong. Would you defend the indefensible? That's what seniors Logan March and Cade Crawford are asked to do when a favorite teacher instructs a group of students to argue for the Final Solution--the Nazi plan for the genocide of the Jewish people. Logan and Cade decide they must take a stand, and soon their actions draw the attention of the student body, the administration, and the community at large. But not everyone feels as Logan and Cade do--after all, isn't a school debate just a school debate? It's not long before the

situation explodes, and acrimony and anger result. Based on true events, The Assignment asks: What does it take for tolerance, justice, and love to prevail? An important look at a critical moment in history through a modern lens showcasing the power of student activism. --SLJ

Continuous Delivery Jez Humble, David Farley, 2010-07-27 Winner of the 2011 Jolt Excellence Award! Getting software released to users is often a painful, risky, and time-consuming process. This groundbreaking new book sets out the

principles and technical practices that enable rapid, incremental delivery of high quality, valuable new functionality to users. Through automation of the build, deployment, and testing process, and improved collaboration between developers, testers, and operations, delivery teams can get changes released in a matter of hours—sometimes even minutes—no matter what the size of a project or the complexity of its code base. Jez Humble and David Farley begin by presenting the foundations of a rapid, reliable, low-risk delivery process. Next, they introduce the “deployment pipeline,” an automated process for managing all changes, from check-in to release. Finally, they discuss the “ecosystem” needed to support continuous delivery, from infrastructure, data and configuration management to governance. The authors introduce state-of-the-art techniques, including automated infrastructure management and data migration, and the use of virtualization. For each, they review key issues, identify best practices, and demonstrate how to mitigate risks. Coverage includes

- Automating all facets of building, integrating, testing, and deploying software
- Implementing deployment pipelines at team and organizational levels
- Improving collaboration between developers, testers, and operations
- Developing features incrementally on large and distributed teams
- Implementing an effective configuration management strategy
- Automating acceptance testing, from analysis to implementation
- Testing capacity and other non-functional requirements
- Implementing continuous deployment and zero-downtime releases
- Managing infrastructure, data,

components and dependencies • Navigating risk management, compliance, and auditing Whether you're a developer, systems administrator, tester, or manager, this book will help your organization move from idea to release faster than ever—so you can deliver value to your business rapidly and reliably.

Useful features of the book include: the different uses of models in various disciplines; the sequence of making; planning and construction, creating surfaces, painting and finishing; methods of casting, modelling and working with metals; step-by-step accounts of the making of specially selected examples; simple techniques without the need for expensive tools or workshop facilities; a 'Directory' of a full range of materials, together with an extensive list of suppliers. This book is intended for students of theatre production, art & architecture, animation and theatre/television set

designers where accurate scale models are necessary, and is also of interest to anyone involved with the process of making forms in 3D and the challenge of making small-scale forms in general. Superbly illustrated with 185 colour photographs.
