Dollar Origami Won Park,2013-03-04 Make your money into something more! With Dollar Origami, you'll learn how to fold your dollars into frogs, scorpions, and other creatures and objects. We handle money every day. We're used to handing over a few bills for a coffee or a few more bills for a book or a new item of clothing. But it's fairly rare these days to be able to turn just one dollar into anything. A dollar won't buy you a camera or a shark--but there is a way to make it into one! Dollar Origami teaches you how to turn your currency into almost anything with just a few folds. With simple instructions, full-color photos, and 100 sheets of paper to practice on before you use your own money, you'll be crafting beautiful butterflies, adorable penguins, and more in your own home in no time. Sometimes, your money can go farther than you think--and with Dollar Origami, it can also provide you with much more fun!

The Architecture of the Jumping Universe Charles Jencks,1997-06-02 Charles Jencks has the uncanny capacity to announce a new movement in architecture before it has begun. With Post-Modernism, he was looking to the past. Now, for the first time, with his new book on morphogenesis he is taking a look at the future. There is no question that his argument will have an important critical effect on architecture at the beginning of the new millennium. Peter Eisenman. Architect A new paradigm is sweeping through science, changing both our view of the universe and of mankind. Charles Jencks is one of a handful of thinkers with the courage to embrace the emerging paradigm and interpret it architecturally. This inspired synthesis of art, design, science and philosophy charts a bold new course not only for architecture, but for Post-Modern thought. Paul Davies, Professor of Natural Philosophy, University of Adelaide, author of *The Cosmic Blueprint*, *Superforce*, *The Mind of God* and other books on contemporary science. Who else could have written a book that opens up such cosmic perspectives and still make such neat, sharply focused comments on particular architects and particular styles of architecture? Who else could range with such zest, ease and elegance from Chaos to Bruce Goff, from Coleridge to Frank Gehry, from Complexity Theory to Green Buildings? The old question of in which style should we build can never be addressed in the same way again. Charles Jencks has brought purpose back into architecture. His teleology may transcend what architects are used to, but Jencks manages to make far more sense out of our contemporary architectural dilemmas than practically all the other books in the RIBA book shop.
