Proxima Stephen Baxter,2014-11-04 “Stephen Baxter has been heralded, with some merit, as Arthur C. Clarke’s literary heir, and Proxima certainly reinforces this accolade in spades.”—Concatenation Mankind’s future in this galaxy could be all but infinite. There are hundreds of billions of red dwarf stars, lasting trillions of years—and their planets can be habitable for humans. Such is the world of Proxima Centauri. And its promise could mean the never-ending existence of humanity. But first it must be colonized, and no one wants to be a settler. There is no glamor that accompanies it, nor is there the ease of becoming a citizen of an already-tamed world. There is only hardship...loneliness...emptiness, even as war brews in the solar system. But that’s where Yuri comes in. Because sometimes exploration isn’t voluntary. It must be coerced.

Digital Storytelling Shilo T. McClean,2008-09-26 How digital visual effects in film can be used to support storytelling: a guide for scriptwriters and students. Computer-generated effects are often blamed for bad Hollywood movies. Yet when a critic complains that technology swamps storytelling (in a review of Van Helsing, calling it an example of everything that is wrong with Hollywood computer-generated effects movies), it says more about the weakness of the story than the strength of the technology. In Digital Storytelling, Shilo McClean shows how digital visual effects can be a tool of storytelling in film, adding narrative power as do sound, color, and experimental camera angles—other innovative film technologies that were once criticized for being distractions from the story. It is time, she says, to rethink the function of digital visual effects. Effects artists say—contrary to the critics—that effects always derive from story. Digital effects are a part of production, not post-production; they are becoming part of the story development process. Digital Storytelling is grounded in filmmaking, the scriptwriting process in particular. McClean considers crucial questions about digital visual effects—whether they undermine classical storytelling structure, if they always call attention to themselves, whether their use is limited to certain genres—and looks at contemporary films (including a chapter-long analysis of Steven Spielberg's use of computer-generated effects) and contemporary film theory to find the answers. McClean argues that to consider digital visual effects as simply contributing the wow factor underestimates them. They are, she writes, the legitimate inheritors of film storycraft.

The Men Who Would Be Kings Daniel Mersey,2016-09-22 The Men Who Would Be Kings is a set of rules designed for fighting historical or Hollywood colonial battles in the mid to late 19th Century, from the Indian Mutiny to the Boxer Rebellion. Large scale colonial clashes tended to be one-sided affairs, but there are countless reports of brief, frantic skirmishes in every colonial war, where either side could be victorious, and these are the battles that The Men Who Would Be Kings seeks to recreate. Although focusing on the British colonial wars against the Zulus, Maoris and others, these rules will also permit players to explore the empires of France, Germany, and other nations, as well as allowing for battles between rival native factions. Gameplay is very simple, and is driven by the quality of the officers leading your units, in the true spirit of Victorian derring-do and adventure, where larger than life characters such as the (real) Fred Burnaby and the (fictional) Harry Flashman led their troops to glory and medals or a horrible end at the point of a spear tip.

Broadsides Victor L. Berger,1912

Abandoned Wrecks Chris McNab,2017-07-20 From ships left high and dry after the retraction of the Aral Sea to Titanic at the bottom of the Atlantic, from a rusting railway graveyard in Bolivia to abandoned World War II cars in a Swedish forest, from aircraft frozen in time in Antarctica to streetcars sidelined in Brooklyn, New York, Abandoned Wrecks explores over 100 fascinating sites from all around the world. Aside from the peculiar beauty of rusting

hulks on forgotten battlefields, anemone-covered battleships on the seabed and cars being consumed by forests, the images and text introduce us to unusual stories: how a car standing on its nose in the Nevada desert has inspired an artist into making a design feature from junked cars, a Canadian schooner that sank in 1885 and rests preserved to this day in a harbor in Lake Huron, and a space shuttle left gathering dust in a hangar. With 170 outstanding color photographs of cars, trains, ships, submarines, tanks, aircraft and even a space shuttle, Abandoned Wrecks is a brilliant pictorial work showcasing these battered time capsules and their stories of wars, natural disasters, changing fortunes, tastes and fashions.

Inside the Painter's Studio Joe Fig,2012-06-19 Inside an art gallery, it is easy to forget that the paintings there are the end products of a process involving not only creative inspiration, but also plenty of physical and logistical details. It is these cruder, more mundane aspects of a painter's daily routine that motivated Brooklyn artist Joe Fig to embark almost ten years ago on a highly unorthodox, multilayered exploration of the working life of the professional artist. Determined to ground his research in the physical world, Fig began constructing a series of diorama-like miniature reproductions of the studios of modern art's most legendary painters, such as Jackson Pollock and Willem de Kooning. A desire for firsthand references led Fig to approach contemporary artists for access to their studios. Armed with a camera and a self-made Artist's Questionnaire, Fig began a journey through the workspaces of some of today's most exciting contemporary artists.

Citygami London Clockwork Clockwork Soldier,Soldier Clockwork,2018-05 London's skyline springs to life in this ingeniously crafted book that lets you build your own paper city. Citygami London is a craft project, a diorama, a study in architecture, and, when it's finished, a stand-alone piece of art. Inspired by one of the world's great architectural cities, Clockwork Soldier have created a unique experience that lets readers replicate London's most famous buildings, while also gaining fascinating insight into their histories and significance. Here, scale models of the Shard, Tower Bridge, St. Paul's Cathedral, the London Eye, and other structures are presented in die-cut, pre-folded, cardstock pages. Clear, easy-to-follow instructions show you how to assemble each building. Accompanying the models are a set of detachable cards of the buildings, allowing readers to play against each other by comparing facts and figures about the structures. Best of all, when every building has been constructed, the result is a display-ready cityscape of London. As fun as it is educational, this craft book promises hours of absorbing activity and a lasting keepsake for years to come.

Great Space Battles Stewart Cowley,Charles Herridge,1979

The Great Dune Trilogy Frank Herbert,2018 Three of the greatest SF novels in the world in one bumper omnibus, and the inspiration for the spectacular cinematic events Dune: Part One and Dune: Part Two. 'An astonishing science fiction phenomenon' WASHINGTON POST 'I know nothing comparable to it except The Lord of the Rings' Arthur C Clarke Herbert's evocative, epic tales are set on the desert planet Arrakis, the focus for a complex political and military struggle with galaxy-wide repercussions. Arrakis is the source of spice, a mind-enhancing drug which makes interstellar travel possible; it is the most valuable substance in the galaxy. When Duke Atreides and his family take up court there, they fall into a trap set by the Duke's bitter rival, Baron Harkonnen. The Duke is poisoned, but his wife and her son Paul escape to the vast and arid deserts of Arrakis, which have given the planet its nickname of Dune. Paul and his mother join the Fremen, the Arrakis natives, who have learnt to live in this harsh and complex ecosystem. But learning to survive is not enough - Paul's destiny was mapped out long ago and his mother is committed to seeing it fulfilled. Read the books which inspired the Academy Award-winning and jaw-dropping cinematic events Dune: Part One (2021) and Dune: Part Two (2024), starring Timothee Chalamet, Florence Pugh, Jessica Ferguson and Austin Butler. A science fiction spectacular like no other, this is a deeply climate conscious novel, and a compelling family saga for the ages. * * * * * 'This is - quite simply - the most magnificent Sci-Fi epic ever written . . . The scope of Asimov's Foundation, the attention to detail and context of Tolkien's LotR, coupled with an unmatched visionary socio-ecological messianic narrative that is scarily relevant today ' Goodreads reviewer, ☆ ☆ ☆ ☆ ☆ 'Frank Herbert's immortal space opera that created many of the tropes we take for granted inside them is a book that doesn't need my endorsement . . . the nobility is some of the most decadent and depraved in fiction . . . It's a fantastic book, amazing story' Goodreads reviewer, ☆ ☆ ☆ ☆ ☆ 'The blend of science-aversion, exploitation of the naive by systematic manipulation of religion and witchcraft, and the harsh realities of life in a barren and mineral depleted desert is astounding. I love these books!' Goodreads reviewer, ☆ ☆ ☆ ☆ ☆ 'Herbert succeeds at juxtaposing so many different elements: ecology, religion, consciousness, feudalism, space travel... gawsh, I could go on! . . . It is a mainly character-driven plot, with the three books in this trilogy focusing on the Atreides family on Dune . . . I think everyone should delve into this world, let themselves be absorbed by it. It makes you question your reality, your choices, your relationships and the impact you have on the world, or the impact the world has on you' Goodreads reviewer, ☆ ☆ ☆ ☆ ☆ 'Dune perhaps epitomises science-fiction. The willingness to embrace big ideas and show them playing out on a broad canvas . . . You have to read it to believe it' Goodreads reviewer
