Ask the Pilot Patrick Smith,2004 Though we routinely take to the air, for many of us flying remains a mystery. Few of us understand the how and why of jetting from New York to London in six hours. How does a plane stay in the air? Can turbulence bring it down? What is windshear? How good are the security checks? Patrick Smith, an airline pilot and author of Salon.com's popular column, Ask the Pilot, unravels the secrets and tells you all there is to know about the strange and fascinating world of commercial flight. He offers: A nuts and bolts explanation of how planes fly Insights into safety and security Straight talk about turbulence, air traffic control, windshear, and crashes The history, color, and controversy of the world's airlines The awe and oddity of being a pilot The poetry and drama of airplanes, airports, and traveling abroad In a series of frank, often funny explanations and essays, Smith speaks eloquently to our fears and curiosities, incorporating anecdotes, memoir, and a life's passion for flight. He tackles our toughest concerns, debunks conspiracy theories and myths, and in a rarely heard voice dares to return a dash of romance and glamour to air travel.

Financing New Ventures Geoffrey Gregson,2014-01-31 Many business ventures today are looking to attract external financing, with an emphasis on business angel investment. Inside this text, the author incorporates the views of business angels, venture capitalists, entrepreneurs, and legal advisors; and draws upon the latest academic thinking on financing new ventures, providing comparisons between business angel and venture capital investing to further inform the reader. The concepts, principles, and guidelines presented can help you and any entrepreneur, business support agency, business student, and others interested in raising external investment and in developing an “investable” business. The book is organized into seven chapters covering: • Fundamental concepts of entrepreneurial venturing and entrepreneurial finance • Market conditions from which investable businesses emerge • The investment process • Deal negotiations • The post-investment relationship between entrepreneur and investor • Recent trends affecting how entrepreneurs raise finance that include strategic exits, “super angels,” and the emergence of “crowdfunding”

Assessment of Wingtip Modifications to Increase the Fuel Efficiency of Air Force Aircraft National Research Council,Division on Engineering and Physical Sciences,Air Force Studies Board,Committee on Assessment of Aircraft Winglets for Large Aircraft Fuel Efficiency,2007-08-06 The high cost of aviation fuel has resulted in increased attention by Congress and the Air Force on improving military aircraft fuel efficiency. One action considered is modification of the aircraft's wingtip by installing, for example, winglets to reduce drag. While common on commercial aircraft, such modifications have been less so on military aircraft. In an attempt to encourage greater Air Force use in this area, Congress, in H. Rept. 109-452, directed the Air Force to provide a report examining the feasibility of modifying its aircraft with winglets. To assist in this effort, the Air Force asked the NRC to evaluate its aircraft inventory and identify those aircraft that may be good candidates for winglet modifications. This report—which considers other wingtip modifications in addition to winglets—presents a review of wingtip modifications; an examination of previous analyses and experience with such modifications; and an assessment of wingtip modifications for various Air Force aircraft and potential investment strategies.

Flying High in a Competitive Industry Loizos Th Heracleous,Jochen Wirtz,Nitin Pangarkar,2009 Singapore Airlines (SIA) is widely acknowledged as one of the world's leading airlines, if not the best airline, globally. This book provides insights into a simple but intriguing question: How has SIA managed to outperform other flag-carriers for decades in an industry where it is notoriously difficult to succeed consistently? This updated second edition of Flying High in a Competitive Industry begins with an analysis of the airline industry and its key trends, moving on to a broad outline of SIA's strategic drivers of success. Empirical research was conducted at SIA to gain a deeper understanding of its strategy, core competencies and internal organisation, innovation processes and human resource practices, in order to instill strategy lessons that can inform the strategies of any organisation competing in intensely competitive industries. This book ends with some strategic lessons that apply to any organisation that aims to achieve sustainable success in hypercompetitive markets.

Fundamentals of Airline Marketing Scott Ambrose,Blaise Waguespack,2021-05-27 Applying fundamentals of marketing to commercial passenger air transportation, this textbook puts the emphasis on marketing principles and illustrative ways in which airlines can distinguish themselves within the highly competitive global marketplace. Fundamentals of Airline Marketing begins with a survey of current airline business strategies and the macro forces that have shaped the airline industry in the past and will continue to do so in the future. The growing importance of technology is discussed both from the perspective of better understanding customer needs and engaging more effectively with them. The central role of the customer is explored through the lens of modern segmentation and branding approaches. Coverage then shifts to the tactical decision areas consisting of the 4Ps—product, place, promotion, and price—in which marketers shape and execute their strategies. The book concludes with a focus on executing marketing initiatives internally through customer-facing employee groups and externally through the measurement and management of the customer experience. Fundamentals of Airline Marketing: • is an accessible textbook on the fundamentals of marketing for commercial passenger air transportation; • chronicles the marketing innovations and controversies that have been central to the historic shift in airline fortunes; • demonstrates how airline decisions fit within the fundamentals of marketing and how the marketplace is continuing to evolve; • provides a bridge between key marketing principles and their specific application to the airline industry in each chapter. This textbook is written primarily for undergraduate college students enrolled in aviation business administration programs and related courses. It will also serve as an accessible primer on airline marketing for industry professionals not presently working in marketing and for frontline airline employees seeking to learn more about marketing.

Business Model Innovation Nicolai J. Foss,Tina Saebi,2015 This volume examines the organisational dimension of business model innovation. Drawing on organisational theory and empirical observation, the contributors specifically highlight organisational design aspects of business model innovation, focusing on how reward systems, power distributions, routines and standard operating procedures, the allocation of

authority, and other aspects of organisational structure and control should be designed to support the business model the firm chooses.

Advanced Aircraft Flight Performance Antonio Filippone,2012-12-17 This book discusses aircraft flight performance, focusing on commercial aircraft but also considering examples of high-performance military aircraft. The framework is a multidisciplinary engineering analysis, fully supported by flight simulation, with software validation at several levels. The book covers topics such as geometrical configurations, configuration aerodynamics and determination of aerodynamic derivatives, weight engineering, propulsion systems (gas turbine engines and propellers), aircraft trim, flight envelopes, mission analysis, trajectory optimisation, aircraft noise, noise trajectories and analysis of environmental performance. A unique feature of this book is the discussion and analysis of the environmental performance of the aircraft, focusing on topics such as aircraft noise and carbon dioxide emissions.

The Global Airline Industry Peter Belobaba,Amedeo Odoni,Cynthia Barnhart,2015-07-06 Extensively revised and updated edition of the bestselling textbook, provides an overview of recent global airline industry evolution and future challenges Examines the perspectives of the many stakeholders in the global airline industry, including airlines, airports, air traffic services, governments, labor unions, in addition to passengers Describes how these different players have contributed to the evolution of competition in the global airline industry, and the implications for its future evolution Includes many facets of the airline industry not covered elsewhere in any single book, for example, safety and security, labor relations and environmental impacts of aviation Highlights recent developments such as changing airline business models, growth of emerging airlines, plans for modernizing air traffic management, and opportunities offered by new information technologies for ticket distribution Provides detailed data on airline performance and economics updated through 2013
