Little Bulldozer Beverley Randell,1994 The Little Bulldozer wants to help everybody but the Big Truck and the Fire Engine don't want his help because they think he is too small.

Does a Bulldozer Have a Butt? Derick Wilder,2022-05-24 Green Eggs and Ham meets Everyone Poops in this laugh-out-loud story that asks—and answers—the burning question in every kid's life. Does a scarecrow have a butt? Yep, you stuff him with a straw one. And does a crayon have a butt? Nope, but it can surely draw one. This silly, funny, clever book will be the most quoted text in all of elementary school. Over the course of a long walk across a city, one curious kid needs to know: Does it have a butt? Everything from sheep to ghosts to dinosaurs is subjected to this all-important question, and Dad is a never-ending source of answers. On a laugh-out-loud father-child ramble, we come to see that every butt, from a bullfrog's to a zombie's, has its own distinctive, and distinctively hilarious, quality. LAUGH-OUT-LOUD FUNNY: It's impossible to find a kid who doesn't giggle at the word butt. The repetition of the word, the varied assortment of butts, and the clever rhymes make this a book that both parents and children will return to over and over again. A SNEAKY WAY TO TEACH ABOUT CONTEXT: The book isn't simply a repetition of one joke or word. Instead, it offers a crafty way of talking about what things mean in different contexts. SILLY AND SWEET, NOT GROSS: Butt jokes can potentially cross a line and become offensive or insensitive, but the tone and choices throughout this book are sweet and innocent, making it a unique, accessible option for parents and educators who want to normalize the asking of difficult questions. COUNT THE BUTTS! This book will change how you see the world: Not only will you start wondering about all inanimate objects' butts, you'll start seeing them everywhere! There are nearly 200 butts in the illustrations that aren't even mentioned in the text. Keen-eyed young readers will delight in the most hilarious seek-and-find they could ever imagine! Perfect for: • Parents • Grandparents • Educators and librarians • Fans of funny books

Cities Under Siege Stephen Graham,2011-11-01 Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, Cities Under Siege traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism.'

Origami Flowers and Other Models Yehuda Peled,2015-02-21 Origami Flowers and Other Models contains 34 origami models: Twenty one of them are flowers, trees and stems. The models range from easy to fold models, suitable for beginners using simple origami paper, to complex models for the more experienced folders, using heavier paper. Some of the complex models the author has created represent realistic examples of the flowers which grew wild in fields near his childhood home: irises, tulips, daffodils, and cyclamens. The book also provides instructions for stems which allow the flowers to stand independently on the table without additional non-origami parts. At the end of the book there are useful instructions for folding polygons and for dividing paper.

Colossal Paper Machines Phil Conigliaro,2015-04-21 What a big idea! And what big fun: A whopping oversize book of interactive paper models to appeal to every kid who loves big machines—which pretty much covers all of them. These are the coolest big machines that kids love—each re-created in an oversize paper model that, once built, really moves. The book has everything the reader needs to pop out, fold, and create a full-color model of ten big machines: a dump truck, space shuttle, excavator, ladder truck, front loader, concrete mixer, steam locomotive, steamboat, dirigible, Chinook helicopter. Created by Phil Conigliaro, a gifted paper engineer and artist, the models are printed on sturdy card stock; perforated to pop out and fold; require only gluing (no tape or pins); and come with complete, easy-to-follow step-by-step instructions. And, worth repeating, each one moves: Wheels roll and the mixer turns, helicopter blades spin, and the excavator's boom and bucket raises and lowers. Additionally there's the story of each machine—how it works, who invented it, what it's used for. Kids will learn the history of the steam shovel—the smoking, hissing monster that dug the Panama Canal, the largest engineering feat of the 20th century; how astronauts in a space shuttle could withstand the 3,000 degrees of heat created when it returned to Earth; how the world's largest dump truck can haul a million pounds. It's big stuff!

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth,2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its

relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, Confessions of a Recovering Environmentalist gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

Which truck would you like to be?”
