Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Dragon and the Dazzle Marco Pellitteri,Jean-Marie Bouissou,Gianluca Di Fratta,Cristiano Martorella,Bounthavy Suvilay,2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts. Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995, the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover
