Dennis Oliver

Tiger I, German Army Heavy Tank Dennis Oliver, 2021-12-30 This illustrated guide examines the famous WWII German tank and its operations in the Eastern Front, with extensive resources for modeling enthusiasts. The Tiger I tank might have been a break-through—and even war-winning—weapon if Germany had produced it in sufficient numbers and introduced it earlier on the Eastern Front. Instead, the Tiger played a mainly defensive role as the Wehrmacht struggled to withstand the advances of the Red Army. In his third book on the Tiger in the TankCraft series, Dennis Oliver focuses on this fascinating period in the tank's short history. Oliver uses archive photos and extensively researched color illustrations to examine the tanks and units of the German army's heavy panzer battalions. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of the Tigers of 1943.

Tiger I: German Army Heavy Tank Dennis Oliver, 2019-10-30 The Tiger I tank, probably the most famous German armoured vehicle of the Second World War, might have been a war-winning, break-through weapon if it had been produced in sufficient numbers and if it had been introduced earlier on the Eastern Front, before the balance of strength had tipped towards the Soviet Union. At the Battle of Kursk there were not enough Tigers to make a decisive difference and thereafter the Tiger was forced to play a mainly defensive role as the Wehrmacht struggled to withstand the advances of the Red Army. And it is this period in the Tiger tank's short history that Dennis Oliver concentrates on in this, his third book on the Tiger in the TankCraft series. He uses archive photos

and extensively researched colour illustrations to examine the tanks and units of the German army's heavy panzer battalions. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of the Tigers of 1943.

Tiger I Dennis Oliver, 2018-04-30 A fully illustrated guide to the German Tiger I tank and its operations in the field by the renowned expert on WWII armored vehicles. At Hitler's insistence, the first Tiger I tanks drove into action in Tunisia in December 1942. Despite their lack of reliability and the small number deployed, they quickly gained a fierce reputation. With its heavy armor and 88mm gun, the Tiger I outclassed all the Allied tanks then in service. Beyond their deployment in North Africa, they also operated in Sicily and Italy between 1943 and 1945. In his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tank and the German army units that first took them into combat. Perfect for model enthusiasts, Tiger I showcases available model kits and aftermarket products. It also includes a gallery of beautifully constructed and painted models in various scales. Technical details, as well as modifications introduced during production and in the field, are also examined providing everything the modeler needs to recreate an accurate representation of the tanks.

Panzerkampfwagen VI Tiger Slawomir Zajackowski, 2019-09-19 The German heavy tank Panzerkampfwagen VI Tiger is a vehicle known even to laymen. It was heavily armored and armed with a deadly 88 mm gun. Despite their legend, the Tigers were plagued by several technical problems, especially with propulsion, which often did not allow them to fully use their combat

potential. The main motivator for designing the Pz.Kpfw. VI was eager to install a Flak 36 anti-aircraft gun 36 caliber 88 in the turret. It was a weapon that could destroy Soviet tanks on long distances. In addition, it was necessary to build a tank able to withstand fire from the T-34/76 guns, which effectively eliminated the German medium tanks Pz.Kpfw. III and IV. A competition for a tank that fulfills these requirements was set, and in April 1942 the prototypes of Porsche and Henschel went for the final duel. After a series of tests, the tank developed by Henschel proved to be better. It received the designation Sd.Kfz. 181 Pz.Kpfw. VI Tiger Ausf. H1 and went into production at the plants in Kassel-Mittelfeld and Wegmann AG. The tank was plagued by many teething problems, and as a result, many subsequent construction changes were introduced in the course of production. Considering the periods of their implementation, it is possible to extract Tigers of early production series, vehicles after modification and vehicles of late production series.

Tiger I & Tiger II Tanks Dennis Oliver, 2020-08-31 "Will be of great interest to modelers that plan to build a Tiger tank and to military historians alike." —AMPS Indianapolis By the first weeks of 1945, the Eastern Front had been pushed back to the Carpathian mountain passes in the south and Warsaw on the Vistula River in the center, while in the north, the German army was fighting in East Prussia. The Wehrmacht's armored and mobile formations were now employed exclusively as fire brigades, rushed from one crisis to the next as the Red Army pushed inexorably westward. Critical to the German defense were the army's heavy Panzer battalions, whose Tiger tanks, with their 8.8 cm guns, were almost invincible on the open plains of central Europe. In his latest book in the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and units of the German Army and Waffen-SS heavy Panzer battalions that struggled to resist the onslaught of Soviet armor during the last days of the conflict that culminated

in the battle for Berlin. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to create an accurate representation of these historic tanks.

Modelling a Tiger I s.Pz.Abt.501, Tunisia 1943 Steve van Beveren,2012-04-20 Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title is a detailed modelling guide on the '121', s.Pz.Abt. 501, Tunisia 1943 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

Hitler's Heavy Tiger Tank Battalions, 1942-1945 Ian Baxter, 2020-02-28 The heavy tanks and other armored vehicles of WWII Germany come vividly to life in this informative volume of detailed wartime photos. With rare, often unpublished photographs and enlightening captions, Hitler's Heavy Tiger Tank Battalions provides a superb record of the Wehrmacht's Schwere Panzerabteilung. In addition to the Tiger I and II heavy tanks, these battalions were equipped with Panzer III medium tanks; Flakpanzer IV self-propelled anti-aircraft guns, halftrack special purpose vehicles, Kettenkrad gun tractors, and Berge Panther armored recovery vehicles. Between 1942 and 1945, heavy tank battalions saw action on the Eastern Front, Italy and North West Europe before being pushed back to Berlin for the final defensive battles. This volume features graphic photographs and descriptions of vehicles on operations in all these theatres. Modelers and equipment buffs in particular will find this Images of War book extremely useful and fascinating.

Tiger I and Tiger II Tanks Dennis Oliver, 2019-02-28 An in-depth overview of these fearsome heavy tanks, including photos, illustrations, and modeling information. Tiger tanks were among the most-feared fighting vehicles of the Second World War. They gained almost legendary status—yet they never fulfilled their potential, because they were not produced in sufficient numbers and the tide of the war had turned against the German army by the time they were introduced. Often they were deployed in difficult circumstances and in defensive battles, struggling against the odds. Nowhere was this truer than in western Europe during the Allied advance across France and into Germany, and it is the Tigers of this phase of the war that Dennis Oliver portrays in his third volume on the Tiger in the TankCraft series. Using archive photos and extensively researched color illustrations, he examines the Tiger tanks and units of the German Army and Waffen-SS heavy panzer battalions that struggled to resist the onslaught of Allied armor and air attacks during the last days of the conflict. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks.

Tiger I Dennis Oliver, 2018-04-30 When at Hitler's insistence the first Tiger I tanks went into action in Tunisia in December 1942 they rapidly gained a formidable fighting reputation despite their lack of reliability and the small number deployed. With its heavy armour and 88mm gun, it outclassed all the Allied tanks then in service and forced the Allies to accelerate the introduction of improved anti-tank guns and tanks that could match the Tiger in terms of firepower and protection.

In this, his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and German army units that first took them into combat in North Africa and then operated them as they fell back through Sicily and Italy between 1943 and 1945. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of the tanks that made such an immediate impact on the southern front during the Second World War.

Pz. Kpfw IV Family Marek Jaszczolt, Jacek Pasieczny, 2013-01-17 *Illustrated color reference guide to the Pz.Kpfw. VI Tiger Tiger I is the common name of a German heavy tank developed in 1942 and used in World War II. The final official German designation was Panzerkampfwagen Tiger Ausf. E, often shortened to Tiger. It was an answer to the unexpectedly formidable Soviet armor encountered in the initial months of the Axis invasion of the Soviet Union, particularly the T-34 and the KV-1. The Tiger I design gave the Wehrmacht its first tank mounting the 88 mm gun, in its initial armored fighting vehicle-dedicated version, which in its Flak version had previously demonstrated its effectiveness against both air and ground targets. During the course of the war, the Tiger I saw combat on all German battlefronts. It was usually deployed in independent tank battalions, which proved to be quite formidable. While the Tiger I was feared by many of its opponents, it was over-engineered, used expensive and labor intensive materials and production methods, and was time-consuming to produce. Only 1,347 were built between August 1942 and August 1944. The Tiger was prone to certain types of track failures and immobilizations, and limited in range by its huge fuel

consumption. It was, however, generally mechanically reliable but expensive to maintain. It was also complicated to transport, and vulnerable to immobilization when mud, ice and snow froze between its overlapping and interleaved road wheels in winter weather conditions, often jamming them solid. In 1944, production was phased out in favor of the Tiger II. A big decal sheet with 1:72, 1:48 and 1:35 individual and national markings for 16 Pz.Kpfw. VI Tiger tanks. The decal sheet was printed by Cartograf. Each painting scheme is depicted on beautifully drawn color profile and described in the guidebook with English and Polish text.

The Combat History of German Tiger Tank Battalion 503 in World War II Franz-Wilhelm Lochmann, Alfred Rubbel, Von Richard Freiherr Rosen, 2008-04-16 Hundreds of photos of Tiger tanks in action. Text chronicles the unit's combat operations in the East and West. Personal accounts from the men who rode in these battlefield behemoths.

Tiger! David Fletcher, 1986 2. Verdenskrig. Beskrivelse af den tyske kampvogn Tiger herunder kampvognens ydeevne og teknik. Beskrivelsen er udarbejdet på grundlag af britiske efterretningsrapporter.

Modelling the Tiger I Gary Edmundson, David Parker, Steve van Beveren, Dinesh Ned, Darren Thompson, 2007-07-24 The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. Probably the most famous tank of World War II, the Tiger was designed in response to the German Army's fighting experience in Western Europe, North Africa and Russia. Armed with the most powerful German gun, the famous 88mm, the Panzer VI Tiger was intended to dominate the battlefield from the East to the West. In this book, some of the world's most talented modellers cover six separate Tiger projects, their work illustrated by a collection of step-by-step color photographs

detailing everything from insignia to battle damage in a variety of combat theaters to illustrate the Tiger's full wartime experience. With varying degrees of difficulty, this will appeal to both experienced modelling enthusiasts and newcomers attempting their first project.

Tiger I on the Battlefield Chris Brown, 2014 In the seventh part of PeKo Publishing's photo-monograph series, we deal with the popular German heavy tank, the Tiger I. This publication shows the tank's major and minor changes through the 105 black-and-white photographs in the book.

Tiger Tanks at War Michael Green, James D. Brown, 2008-02-15 The first prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production. This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably. His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.
