French Warships in the Age of Sail, 1626-1786 Rif Winfield,Stephen S Roberts,2017-10-30 “The first comprehensive listing of these ships in English. . . . Profusely illustrated [and] impressively informative.” —Midwest Book Review The origins of a permanent French sailing navy can be traced to the work of Cardinal Richelieu in the 1620s, but this naval force declined rapidly in the 1650s and a virtually new Marine Royale had to be re-created by Colbert from 1661. Thereafter, Louis XIV’s navy grew rapidly to become the largest and most powerful in the world, at the same time establishing a reputation for the quality of its ship design that lasted until the end of sail. The eighteenth century was to see defeat and decline, revival and victory, but by 1786 the French Navy had emerged from its most successful naval war having frequently outfought or outmaneuvered the British Navy in battle, and in the process making a major contribution to American independence. This book provides significant technical and building data as well as highlights of the careers of each ship in every class. For the first time, it is possible to form a clear picture of the overall development of French warships throughout the whole of the sailing era. “A handy and quick reference to a variety of vessels . . . [A] top notch reference book.” —British Tars, 1740-1790

**Links in the Chain of Life** Baroness Orczy,2021-11-09 This book tells how Baroness Orczy creates the fictitious character of the Scarlet Pimpernel. In this book, Baroness Orczy explores how she creates the character of Scarlet Pimpernel, the other characters, and the story world. The author, in this book, links the creation of the character of the Pimpernel to her love for Britain.

**Philip, Prince of Greece** Constantinos Lagos,John Carr,2021-06-30 Many books have been written about the life of Prince Philip, the Duke of Edinburgh, yet there always seem to be corners of his long life that have remained unexplored. In this long look back into his early years, Constantinos Lagos and John Carr uncover hitherto unknown aspects of Philip's life as a Greek prince and his gradual transformation from a mere appendage of the troubled Greek royal family to an enduring pillar of the British monarchy. For the first time, Lagos and Carr delve into neglected Greek archives for a fascinating picture of Philip's early Greek life and the constant insecurity that dogged his steps as his father Prince Andrew of Greece and mother Princess Alice struggled to order their own lives in the maelstrom of unstable and often violent Greek politics in a Europe sliding towards world war. The Greek royal family, in which Philip has his roots, is dealt with at length, to bring out the

particular family history and circumstances that played no small part in shaping his personality. Anyone curious about how Prince Philip actually grew up will find in this book a wealth of eye-opening, often startling details that will add more brush strokes to the portrait of the often-elusive but real Prince Philip.

**James Madison** Lynne Cheney,2014-05-06 A major new biography of the fourth president of the United States by New York Times bestselling author Lynne Cheney Lin-Manuel Miranda's play Hamilton has reignited interest in the founding fathers; it features James Madison among its vibrant cast of characters. This majestic new biography of James Madison explores the astonishing story of a man of vaunted modesty who audaciously changed the world. Among the Founding Fathers, Madison was a true genius of the early republic. Outwardly reserved, Madison was the intellectual driving force behind the Constitution and crucial to its ratification. His visionary political philosophy and rationale for the union of states—so eloquently presented in The Federalist papers—helped shape the country Americans live in today. Along with Thomas Jefferson, Madison would found the first political party in the country's history—the Democratic Republicans. As Jefferson's secretary of state, he managed the Louisiana Purchase, doubling the size of the United States. As president, Madison led the country in its first war under the Constitution, the War of 1812. Without precedent to guide him, he would demonstrate that a republic could defend its honor and independence—and remain a republic still.

**War at Sea in the Middle Ages and the Renaissance** John B. Hattendorf,Richard W. Unger,2003 Wide-ranging in place and time, yet tightly focused on particular concerns, these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance. In these studies, naval historians firmly grounded in the best current understanding of the period take account of developments in ships, guns and the language of public policy on war at sea, and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe.--BOOK JACKET.

*Experiments Past* Jodi Reeves Flores,Roeland Paardekooper,2014 With Experiments Past the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. Experiments Past provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures

and agricultural practices, as well as narratives on how experimental archaeology has developed on a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.
