French Warships in the Age of Sail, 1626–1786

Rif Winfield, Stephen S Roberts, 2017-10-30 "The first comprehensive listing of these ships in English. . . . Profusely illustrated [and] impressively informative." –Midwest Book Review

The origins of a permanent French sailing navy can be traced to the work of Cardinal Richelieu in the 1620s, but this naval force declined rapidly in the 1650s and a virtually new Marine Royale had to be re-created by Colbert from 1661. Thereafter, Louis XIV's navy grew rapidly to become the largest and most powerful in the world, at the same time establishing a reputation for the quality of its ship design that lasted until the end of sail. The eighteenth century was to see defeat and decline, revival and victory, but by 1786 the French Navy had emerged from its most successful naval war having frequently outfought or outmaneuvered the British Navy in battle, and in the process making a major contribution to American independence. This book provides significant technical and building data as well as highlights of the careers of each ship in every class. For the first time, it is possible to form a clear picture of the overall development of French warships throughout the whole of the sailing era. "A handy and quick reference to a variety of vessels . . . [A] top notch reference book." –British Tars, 1740-1790

Links in the Chain of Life Baroness

Orczy, 2021-11-09 This book tells how Baroness Orczy creates the fictitious character of the Scarlet Pimpernel. In this book, Baroness Orczy explores how she creates the character of Scarlet Pimpernel, the other characters, and the story world. The author, in this book, links the creation of the character of the Pimpernel to her love for Britain.

Philip, Prince of Greece Constantinos Lagos, John Carr, 2021-06-30 Many books have been written about the life of Prince Philip, the Duke of Edinburgh, yet there always seem to be corners of his long life that have remained unexplored. In this long look back into his early years, Constantinos Lagos and John Carr uncover hitherto unknown aspects of Philip's life as a Greek prince and his gradual transformation from a mere appendage of the troubled Greek royal family to an enduring pillar of the British monarchy. For the first time, Lagos and Carr delve into neglected Greek archives for a fascinating picture of Philip's early Greek life and the constant insecurity that dogged his steps as his father Prince Andrew of Greece and mother Princess Alice struggled to order their own lives

in the maelstrom of unstable and often violent Greek politics in a Europe sliding towards world war. The Greek royal family, in which Philip has his roots, is dealt with at length, to bring out the particular family history and circumstances that played no small part in shaping his personality. Anyone curious about how Prince Philip actually grew up will find in this book a wealth of eye-opening, often startling details that will add more brush strokes to the portrait of the often-elusive but real Prince Philip.

War at Sea in the Middle Ages and the

Renaissance John B. Hattendorf, Richard W. Unger, 2003 Wide-ranging in place and time, yet tightly focused on particular concerns, these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance. In these studies, naval historians firmly grounded in the best current understanding of the period take account of developments in ships, guns and the language of public policy on war at sea, and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe.-- BOOK JACKET.

National Museums Simon Knell, Peter Aronsson, Arne Bugge Amundsen, 2014-05-22 National Museums is the first book to explore the national museum as a cultural institution in a range of contrasting national contexts. Composed of new studies of countries that rarely make a showing in the English-language studies of museums, this book reveals how these national museums have been used to create a sense of national self, place the nation in the arts, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, ethnicity and multiculturalism which have come to the fore in national politics in recent decades. National Museums combines research from both leading and new researchers in the fields of history, museum studies, cultural studies, sociology, history of art, media studies, science and technology studies, and anthropology. It is an interrogation

of the origins, purpose, organisation, politics, narratives and philosophies of national museums.

Ships of the Royal Navy J. J. Colledge, Ben Warlow, 2010 This is the fourth fully revised edition of a book first published in 1970. This longevity is testimony to its enduring value as a reference work--indeed, 'Colledge' is still the first stop for anyone wanting more information on any British warship from the 15th century to the present day when only the name is known.

Experiments Past Jodi Reeves Flores, Roeland Paardekooper, 2014 With *Experiments Past* the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. *Experiments Past* provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history

of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures and agricultural practices, as well as narratives on how experimental archaeology has developed on a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
