The Mystery of Easter Island Katherine Routledge,1998 Heavily illustrated with a wealth of old photos, this book is a treasury of information on the most mysterious of islands, Easter Island (Rapa Nui).

French Warships in the Age of Sail, 1626-1786 Rif Winfield,Stephen S Roberts,2017-10-30 "The first comprehensive listing of these ships in English. . . . Profusely illustrated [and] impressively informative." —Midwest Book Review The origins of a permanent French sailing navy can be traced to the work of Cardinal Richelieu in the 1620s, but this naval force declined rapidly in the 1650s and a virtually new Marine Royale had to be re-created by Colbert from 1661. Thereafter, Louis XIV's navy grew rapidly to become the largest and most powerful in the world, at the same time establishing a reputation for the quality of its ship design that lasted until the end of sail. The eighteenth century was to see defeat and decline, revival and victory, but by 1786 the French Navy had emerged from its most successful naval war having frequently outfought or outmaneuvered the British Navy in battle, and in the process making a major contribution to American independence. This book provides significant technical and building data as well as highlights of the careers of each ship in every class. For the first time, it is possible to form a clear picture of the overall development of French warships throughout the whole of the sailing era. "A handy and quick reference to a variety of vessels . . . [A] top notch reference book." —British Tars, 1740-1790

Philip, Prince of Greece Constantinos Lagos,John Carr,2021-06-30 Many books have been written about the life of Prince Philip, the Duke of Edinburgh, yet there always seem to be corners of his long life that have remained unexplored. In this long look back into his early years, Constantinos Lagos and John Carr uncover hitherto unknown aspects of Philip's life as a Greek prince and his gradual transformation from a mere appendage of the troubled Greek royal family to an enduring pillar of the British monarchy. For the first time, Lagos and Carr delve into neglected Greek archives for a fascinating picture of Philip's early Greek life and the constant insecurity that dogged his steps as his father Prince Andrew of Greece and mother Princess Alice struggled to order their own lives in the maelstrom of unstable and often violent Greek politics in a Europe sliding towards world war. The Greek royal family, in which Philip has his roots, is dealt with at length, to bring out the particular family history and circumstances that played no small part in shaping his personality. Anyone curious about how Prince Philip actually grew up will find in this book a wealth of eye-opening, often startling details that will add more brush strokes to the portrait of the often-elusive but real Prince Philip.

Our Navy at War Josephus Daniels,1922

War at Sea in the Middle Ages and the Renaissance John B. Hattendorf,Richard W. Unger,2003 Wide-ranging in place and time, yet tightly focused on particular concerns, these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance. In these studies, naval historians firmly grounded in the best current understanding of the period take account of developments in ships, guns and the language of public policy on war at sea, and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe.--BOOK JACKET.

The Universal Geography Elisée Reclus,1876

Ships of the Royal Navy J. J. Colledge,Ben Warlow,2010 This is the fourth fully revised edition of a book first published in 1970. This longevity is testimony to its enduring value as a reference work--indeed, 'Colledge' is still the first stop for anyone wanting more information on any British warship from the 15th century to the present day when only the name is known.

National Museums Simon Knell,Peter Aronsson,Arne Bugge Amundsen,2014-05-22 National Museums is the first book to explore the national museum as a cultural institution in a range of contrasting national contexts. Composed of new studies of countries that rarely make a showing in the English-language studies of museums, this book reveals how these national museums have been used to create a sense of national self, place the nation in the arts, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, ethnicity and multiculturalism which have come to the fore in national politics in recent decades. National Museums combines research from both leading and new researchers in the fields of history, museum studies, cultural studies, sociology, history of art, media studies, science and technology studies, and anthropology. It is an interrogation of the origins, purpose, organisation, politics, narratives and philosophies of national museums.

Experiments Past Jodi Reeves Flores,Roeland Paardekooper,2014 With Experiments Past the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. Experiments Past provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures and agricultural practices, as well as narratives on how experimental archaeology has developed on a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.

National Museums and Nation-building in Europe 1750-2010 Peter Aronsson,Gabriella Elgenius,2014-12-05 Europe's national museums have since their creation been at the centre of on-going nation making processes. National museums negotiate conflicts and contradictions and entrain the community sufficiently to obtain the support of scientists and art connoisseurs, citizens and taxpayers, policy makers, domestic and foreign visitors alike. National Museums and Nation-building in Europe 1750-2010 assess the national museum as a manifestation of cultural and political desires, rather than that a straightforward representation of the historical facts of a nation. National Museums and Nation-building in Europe 1750-2010 examines the degree to which national museums have created models and representations of nations, their past, present and future, and proceeds to assess the consequences of such attempts. Revealing how different types of nations and states - former empires, monarchies, republics, pre-modern, modern or post-imperial entities - deploy and prioritise different types of museums (based on art, archaeology, culture and ethnography) in their making, this book constitutes the first comprehensive and comparative perspective on national museums in Europe and their intricate relationship to the making of nations and states.

Big Gun Monitors Ian Buxton,2008-03-30 "Extremely well researched . . . a total account of the design, building, service, refits, and fates of the big gun monitors built for WW1 and WW2." —Malcolm Wright, author of *British and Commonwealth Warship Camouflage of WWII* In the history of naval warfare probably no type of ship has provided more firepower per ton than the monitor—indeed they were little more than a huge gun mounting fitted on a simple, self-propelled raft. Designed and built rapidly to fulfil an urgent need for heavy shore-bombardment during World War I, they were top secret in conception, and largely forgotten when the short-lived requirement was over. Nevertheless, they were important ships, which played a significant role in many Great War campaigns and drove many of the advances in long-range gunnery later applied to the battle fleet. Indeed, their value was rediscovered during the Second World War when a final class was built. Monitors were largely ignored by naval historians until Ian Buxton produced the first edition of this book in 1978. Although published privately, this became an established classic and copies of the first edition are now almost unobtainable, so this new edition will be welcomed by many. It has been completely revised, extended and redesigned to a generous large format which allows material deleted from the original edition for lack of space to be restored. "This book looks in detail at the technical and economic aspects of the 42 monitors built, and is, without a doubt, the definitive work on the subject." —Ships Monthly "Ian Buxton's work has set the standard

in celebrating these big gun ships . . . It makes an invaluable contribution to the study of naval and land operations.” —Warships International

Steam navigation and its relation to the commerce of Canada and the United States James Croil,1898

The Anthony Roll of Henry VIII's Navy D.M. Loades,2017-09-29 Here for the first time complete in print is the famous pictorial survey of Henry VIII's navy compiled in 1546 by Anthony Anthony, a clerk in the ordnance office. Originally comprising three rolls of vellum, the MS features paintings of each of the king's 58 ships, below which are set details of their guns, shot, and related equipment. Two of the original rolls were allegedly given by Charles II to Samuel Pepys, who had them cut to form a volume which is one of the treasures of his library, now at Magdalene College, Cambridge. The other roll remains in the British Library. Several of the illustrations have become familiar, especially that of the Mary Rose, herself already a wreck when Anthony presented his work to the king. The present edition re-assembles the three parts of the Anthony Roll, allowing the document to be seen in its original sequence for the first time in over 300 years. The fleet which Henry VIII created is revealed as the king saw it in the last year of his life. Because of the unusual format of the MS, a complete facsimile is not presented here. Anthony's paintings at Magdalene and in the British Library are reproduced in full colour from newly commissioned photographs. Adjacent to each ship illustration is the relevant text, given in its original spelling. In the Introduction Anthony's personal and professional career is set out for the first time, and the subsequent history of his MS is revealed as a subject of interest in its own right. In order to explore the many facets of this remarkable document, a work of art as well as an administrative record, the Introduction includes essays by experts in the field of ordnance, art history, heraldry and fabric, and on the oared vessels which were so distinctive a feature of the navy of the time. Marine archaeologists from the Mary Rose Trust examine the accuracy of Anthony's representation and inventory of the Mary Rose in the light of the excavation of the ship. In the second part of this

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Lost Ranger Noel Frederick Mehlo, Jr.,2014-08-27 This is the story of a United States Army Ranger. It is the story of his service in World War II. It is the story of an American Infantryman in World War II. It is the story of the 5th Infantry Battalion from its creation through September 1944 ... It is the story of how a man became lost to the consciousness of his unit. It is about how a soldier was lost to history. This story is about the research to find him in and of itself and what the journey yielded. Most importantly however, it is about how with the help of some determined individuals, he was brought home to his brothers in the 5th Ranger Infantry Battalion, to his rightful place in the unit history--Page 4.
