French Warships in the Age of Sail, 1626–1786 Rif

Winfield,Stephen S Roberts,2017-10-30 “The first comprehensive listing of these ships in English. . . . Profusely illustrated [and] impressively informative.” —Midwest Book Review The origins of a permanent French sailing navy can be traced to the work of Cardinal Richelieu in the 1620s, but this naval force declined rapidly in the 1650s and a virtually new Marine Royale had to be re-created by Colbert from 1661. Thereafter, Louis XIV’s navy grew rapidly to become the largest and most powerful in the world, at the same time establishing a reputation for the quality of its ship design that lasted until the end of sail. The eighteenth century was to see defeat and decline, revival and victory, but by 1786 the French Navy had emerged from its most successful naval war having frequently outfought or outmaneuvered the British Navy in battle, and in the process making a major contribution to American independence. This book provides significant technical and building data as well as highlights of the careers of each ship in every class. For the first time, it is possible to form a clear picture of the overall development of French warships throughout the whole of the sailing era. “A handy and quick reference to a variety of vessels . . . [A] top notch reference book.” —British Tars, 1740-1790

The Mystery of Easter Island Katherine Routledge,1998 Heavily illustrated with a wealth of old photos, this book is a treasury of information on the most mysterious of islands, Easter Island (Rapa

Nui).

Philip, Prince of Greece Constantinos Lagos, John Carr, 2021-06-30
Many books have been written about the life of Prince Philip, the Duke of Edinburgh, yet there always seem to be corners of his long life that have remained unexplored. In this long look back into his early years, Constantinos Lagos and John Carr uncover hitherto unknown aspects of Philip's life as a Greek prince and his gradual transformation from a mere appendage of the troubled Greek royal family to an enduring pillar of the British monarchy. For the first time, Lagos and Carr delve into neglected Greek archives for a fascinating picture of Philip's early Greek life and the constant insecurity that dogged his steps as his father Prince Andrew of Greece and mother Princess Alice struggled to order their own lives in the maelstrom of unstable and often violent Greek politics in a Europe sliding towards world war. The Greek royal family, in which Philip has his roots, is dealt with at length, to bring out the particular family history and circumstances that played no small part in shaping his personality. Anyone curious about how Prince Philip actually grew up will find in this book a wealth of eye-opening, often startling details that will add more brush strokes to the portrait of the often-elusive but real Prince Philip.

War at Sea in the Middle Ages and the Renaissance John B. Hattendorf, Richard W. Unger, 2003 Wide-ranging in place and time, yet tightly focused on particular concerns, these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance. In these studies, naval historians firmly grounded in the best current understanding of the period take account of developments in ships, guns and the language of public policy on war at sea, and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe.--BOOK JACKET.

National Museums Simon Knell, Peter Aronsson, Arne Bugge Amundsen, 2014-05-22 National Museums is the first book to explore the national museum as a cultural institution in a range of contrasting national contexts. Composed of new studies of countries that rarely

make a showing in the English-language studies of museums, this book reveals how these national museums have been used to create a sense of national self, place the nation in the arts, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, ethnicity and multiculturalism which have come to the fore in national politics in recent decades. National Museums combines research from both leading and new researchers in the fields of history, museum studies, cultural studies, sociology, history of art, media studies, science and technology studies, and anthropology. It is an interrogation of the origins, purpose, organisation, politics, narratives and philosophies of national museums.

Ships of the Royal Navy J. J. Colledge, Ben Warlow, 2010 This is the fourth fully revised edition of a book first published in 1970. This longevity is testimony to its enduring value as a reference work--indeed, 'Colledge' is still the first stop for anyone wanting more information on any British warship from the 15th century to the present day when only the name is known.

National Museums and Nation-building in Europe 1750-2010 Peter Aronsson, Gabriella Elgenius, 2014-12-05 Europe's national museums have since their creation been at the centre of on-going nation making processes. National museums negotiate conflicts and contradictions and entrain the community sufficiently to obtain the support of scientists and art connoisseurs, citizens and taxpayers, policy makers, domestic and foreign visitors alike. National Museums and Nation-building in Europe 1750-2010 assess the national museum as a manifestation of cultural and political desires, rather than that a straightforward representation of the historical facts of a nation. National Museums and Nation-building in Europe 1750-2010 examines the degree to which national museums have created models

and representations of nations, their past, present and future, and proceeds to assess the consequences of such attempts. Revealing how different types of nations and states – former empires, monarchies, republics, pre-modern, modern or post-imperial entities – deploy and prioritise different types of museums (based on art, archaeology, culture and ethnography) in their making, this book constitutes the first comprehensive and comparative perspective on national museums in Europe and their intricate relationship to the making of nations and states.

Experiments Past Jodi Reeves Flores, Roeland Paardekooper, 2014

With *Experiments Past* the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. *Experiments Past* provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures and agricultural practices, as well as narratives on how experimental archaeology has developed on

a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.

The Mastery of the Sea Cyril Field, 2008-10 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good

trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, - the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
