The Great Race Levi Tillemann,2016-01-19 The Great Race recounts the exciting story of a century-long battle among automakers for market share, profit, and technological dominance—and the thrilling race to build the car of the future. The world's great manufacturing juggernaut—the \$3 trillion automotive industry—is in the throes of a revolution. Its future will include cars Henry Ford and Karl Benz could scarcely imagine. They will drive themselves, won't consume oil, and will come in radical shapes and sizes. But the path to that future is fraught. The top contenders are two traditional manufacturing giants, the US and Japan, and a newcomer, China. Team America has a powerful and little-known weapon in its arsenal: a small group of technology buffs and regulators from California. The story of why and how these men and women could shape the future—how you move, how you work, how you live on Earth—is an unexpected tale filled with unforgettable characters: a scorned chemistry professor, a South African visionary who went for broke, an ambitious Chinese ex-pat, a quixotic Japanese nuclear engineer, and a string of billion-dollar wagers by governments and corporations. “To explain the scramble for the next-generation auto—and the roles played in that race by governments, auto makers, venture capitalists, environmentalists, and private inventors—comes Levi Tillemann's The Great Race...Mr. Tillemann seems ideally cast to guide us through the big ideas percolating in the world's far-flung workshops and labs” (The Wall Street Journal). His account is incisive and riveting, explaining how America bounced back in this global contest and what it will take to command the industrial future.

Automotive Development Processes Julian Weber,2009-06-22 The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed. Be it OEMs developing new models, suppliers integrating themselves deeper into the development processes of different OEMs, analysts estimating economical risks and opportunities of automotive investments, or even governments creating and evaluating scenarios for financial aid for suffering automotive companies: At the end of the day, it is absolutely indispensable to comprehensively understand the processes of automotive development – the core subject of this book. Let's face it: More than a century after Carl Benz, Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles, the overall concept of passenger cars has not changed much. Even though components have been considerably optimized since then, motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road surface via gearboxes, transmission shafts and wheels, which together with spring-damper units allow driving stability and ride comfort. Vehicles are still navigated by means of a steering wheel that turns the front wheels, and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat.

Echte Innovation schafft sich ihren Markt selbst Dr. Klaus Reichert,2014-04-15 Innovationsberater Dr. Klaus Reichert beschreibt anschaulich und unterhaltsam, wie sich Innovationen erfolgreich am Markt etablieren. Hierfür sind sieben Bestandteile (sowie eine geheime Zutat) von besonderer Bedeutung. Den Schwerpunkt legt der Autor weniger auf kontinuierliche, schrittweise Innovationsprozesse, sondern auf disruptive Innovationen. Beispiele aus den Bereichen Elektromobilität, Internet, IT und Telekommunikation aber auch aus dem Konsumgüter- und Modebereich werden zur Verdeutlichung herangezogen. Innovationsteams in mittelständischen und DAX-Unternehmen, sowie in Start-ups, die mit einem neuen Produkt oder Dienstleistung an den Markt gehen wollen, ist dieses kompakte Buch eine Anregung. Disruptive Innovation hat den Vorteil des freien Feldes. Beispielsweise hatten die Walkman- oder iPhone-Erfinder ein großartiges Produkt als Ziel und mussten nicht auf die Angebote des Wettbewerbs reagieren. Klaus Reichert beschreibt klar und gut diese grundsätzlichen Bestandteile für echte Innovation. Dr. Rolf Kunisch, Mr. Nivea & CEO Beiersdorf AG (1994-2005) Wir haben unser eigenes Konzept komplett neu erfunden, über 100 Jahre nach dem ursprünglichen Entwurf des Zeppelins. Ohne gutes Team, Begeisterung und die Menschen, die an den Erfolg glauben, wäre auch der Zeppelin NT nicht entstanden. Die im Buch genannten Bestandteile von Innovation treffen auch bei uns zu. You Gotta Want It Jake Paul,2016-10-11 In this extremely positive, motivational, and often laugh-out-loud memoir, Jake Paul pauses long enough from his supercharged day-to-day as a nineteen year old social media heartthrob and costar on the Disney Channel series Bizaardvark to share his takes on life, love, fame, and shooting for the moon. Growing up as a regular kid in Ohio, Jake Paul always knew he wanted to do something big, but he wasn't sure what that thing was—that is, until he found his calling as one of Vine's most famous comedians. As a high school sophomore, Jake began making comedy videos with his older brother, Logan, and posting them online. With every carefully staged prank, Jake and Logan's following grew—and after a few stumbling blocks, Jake finally forged his own way. Eventually, he traded his childhood home in Cleveland for sunny, sparkling Hollywood. In You Gotta Want It, Jake reflects on the path that led him to stardom. From learning the value of a disciplined work ethic, to achieving his goals and aspirations along the way to digital celebrity, to the crazy behind-the-scenes details of his journey as a creator and actor, Jake relates the most hysterical and intimate details of his life thus far—all with the signature humor, honesty, and unstoppable attitude that have won him millions of devoted followers.

Uncrate Magazine, Issue 1 Uncrate LLC,2015-07-21 For Uncrate Magazine Issue 01, we prowled up and down the West Coast and Pacific Northwest, from Big Sur all the way up to Cape Flattery, the northwesternmost point of the United States. We test drove the BMW i8, Tesla Model S, and an old Toyota Land Cruiser, as well as a fleet of rebuilt DeLoreans. We ransacked Aaron Draplin's office and got a special look at a very special Adventure Mobile. And, of course, there's also a bevy of gear — everything from a flamethrower to a robot lawn mower — plus guides full of jackets, sneakers, chinos, tees, sunglasses, and summer beer.

The Barbican Estate Stefi Orazi,2020-10-08 A beautifully produced book to celebrate the 50th anniversary of the Grade II listed brutalist icon, the Barbican Estate. 2019 marks the 50th anniversary of the first residents moving into the Barbican Estate in London. This new book is a celebration of this unique complex – looking at the design of the individual flats as well as its status as a brutalist icon. Author and designer Stefi Orazi interviews residents past and present, giving an insight into how life on the estate has changed over the decades. The complex, designed by Chamberlin, Powell and Bon, is now Grade II listed, and is one of the world's most well-known examples of brutalist architecture. Its three towers – Cromwell, Shakespeare and Lauderdale – are among London's tallest residential spaces and the estate is a landmark of the city. This is a beautifully illustrated, comprehensive guide to the estate, with newly commissioned photography by Christoffer Rudquist. It will show in detail each of the 140 different flat types, including newly drawn drawings of the flats as well as original plans and maps. Includes fascinating texts by leading architects and design critics, including John Allan of Avanti Architects on the unique building materials and fittings of the flats, and Charles Holland of Charles Holland Architects (and FAT co-founder) on the home and how these concrete towers have become such an integral part of Britain's domestic and architectural history.

Off-Road with Clarkson, Hammond and May Phillipa Sage,2021-05-13 'Amazing adventures. Apparently I was there.' Richard Hammond For over 12 years Phillipa Sage worked alongside Jeremy Clarkson, Richard Hammond and James May as their PA, gofer, and fixer where she saw the boys at their best and, hilariously, at their worst. A closet petrol head, Phillipa started working in the motor industry on live events over 20 years ago and first worked with Jeremy Clarkson in 1997. She proved to be a loyal, trusted friend and colleague to all the presenters—from back in the beginning with Tiff Needell, Vicki Butler-Henderson and Quentin Wilson—to the now infamous trio of Clarkson, Hammond and May, and was a key member of what became known as 'The Bubble', the exclusive, dysfunctional working family that toured the world. With an enormous budget, they travelled like rock stars—with super cars, yachts, private jets, helicopters, and five-star wining and dining—taking their unique brand of motoring madness to 18 countries, 31 cities and to over 2 million fans in arenas and at festivals from New Zealand to Norway. Supported by a large crew and their personal entourage, Clarkson, Hammond and May, when not performing in their extraordinary, high octane, live action, motoring theatre, indulged in extravagant holidays. They and their 'Bubble' family relaxed in luxury resorts or private houses entertaining themselves with pool parties, drinking, heli-sightseeing, drinking, private motorboat cruises, drinking, jet skiing, sailing, drinking and eating, and drinking. In Off-Road with Clarkson, Hammond & May, Phillipa shares the tour highs, lows and laughter of three clever, funny, and very stupid motoring journalists.
