The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Soar! T. D. Jakes, 2017-10-10 Take your career to the next level, realize your greatest dreams, and embrace your God-given talents with this practical game plan for your professional and personal life. Too often we remain in jobs that stifle our souls and leave us on the runway of opportunity with the engine of our deepest passion stalled, watching others make their personal vision a reality and build a legacy for their children. But it's never too late to get your dreams off the ground -- God sees great things in your future! If you long to amplify your unique abilities, if you

strive to balance personal fulfillment and professional satisfaction, if you dream of fulfilling God's destiny for you, then you are ready to Soar! In *Soar!* T.D. Jakes reveals how to transform your own unique vision into a powerful contribution to the world. Blending a CEO's practical business acumen with a life coach's dynamic inspiration, *Soar!* will stir your imagination into action, challenge you to embrace your God-given purpose, and align your character and creativity with your career. Bridging both the corporate and nonprofit worlds, *Soar!* is a practical and easy-to-follow flight plan for launching the entrepreneurial drive inside of you. You'll learn how to adopt the mindset of people who don't wait to see what will happen but strategically build the wings that will take them to new heights. So buckle your seat belt and prepare for liftoff -- you have been cleared to fly beyond your fears, to absolutely soar!

One-Piece Flow vs. Batching Charles Protzman, Joe McNamara, Dan Protzman, 2017-07-27 Although batching often appears more efficient than one-piece flow for individual tasks, the practice creates waste for other parts of the organization that more than offset its perceived benefits. A silent productivity killer, batching is an extremely difficult mindset to overcome and, as a result, numerous Lean initiatives have been destroyed by

Building a House Byron Barton, 1990-05-23 A machine digs a big hole. A cement mixer pours cement. Carpenters put up walls. Bricklayers, electricians, plumbers, and painters do their part. Through brilliantly simple words and pictures we follow each step, and before our eyes a house is built.

Politics in India Subrata K. Mitra, 2012-07-26 Providing a comprehensive analysis of the broad spectrum of India's politics, this undergraduate textbook explains the key features of politics in India in a comparative and accessible narrative, illustrated with relevant maps, life stories, statistics and opinion data. Familiar concepts of comparative politics are used to highlight the policy process, with a focus on anti-poverty measures, liberalisation of the economy, nuclearisation and relations with the United States and Asian neighbours such as Pakistan and China. The author raises several key questions relevant to Indian politics, including:

- Why has India succeeded in making a relatively peaceful transition from colonial rule to a resilient, multi-party democracy in contrast to her neighbours?
- How has the interaction of modern politics and traditional society contributed to the resilience of post-colonial democracy?
- How did India's economy – moribund for several decades following independence – make a breakthrough into rapid growth, and, can India sustain it?
- And finally, why have collective identity and nationhood emerge as the core issue of India in the 21st century?

Introducing the novice to India, this accessible, genuinely comparative account of India's political evolution also engages the expert in a deep contemplation of the nature of strategic manoeuvring within

India's domestic and international context. In addition to pedagogical features such as text boxes, a set of further readings is provided as a to guide readers who wish to go beyond the remit of this text.

Gender and the Violence(s) of War and Armed Conflict Stacy Banwell, 2020-10-16 The ebook edition of this title is Open Access, thanks to Knowledge Unlatched funding, and freely available to read online. Drawing on historical and contemporary case studies, this book delves into visual and text-based materials to unpack gender-based violence(s) perpetrated and experienced by both sexes within and beyond the conflict zone.

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard key-

board, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better.

Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Canoeecraft Ted Moores, 2000 Back in print: A revised second edition of a classic how-to book on canoe building. The new edition is updated to include advances in glues and techniques since the original was published, as well as five new canoe plans, builder tips and paddle carving.

Organizational Behavior Christopher P. Neck, Jeffery D.

Houghton, Emma L. Murray, 2023-04-04 **Organizational Behavior: A Skill-Building Approach**, Third Edition examines how individual characteristics, group dynamics, and organizational factors affect performance, motivation, and job satisfaction. Translating the latest research into practical applications and best practices, authors Christopher P. Neck, Jeffery D. Houghton, and Emma Murray unpack how managers can develop their managerial skills to unleash the potential of their employees.

eLearning with Dreamweaver MX Betsy Bruce, 2002 Learn how to create compelling online learning applications with Dreamweaver MX. When designing online learning applications, concepts such as interactivity levels, user tracking, and audience level must be understood before a developer can start coding a single web page. **eLearning with Dreamweaver MX: Building Online Learning Applications** begins by teaching readers the basic instructional design concepts that they will need to know to create successful online learning applications. Bruce then walks you through the development process step by step, beginning with planning and prototype creation. Then, she shows you how to add content, emphasizing methods that take advantage of Dreamweaver's templates and libraries. Next, the book delves into the CourseBuilder extension to add quizzes and actions. The next step is to track user progress with Learning Management Systems. Finally, Bruce shows users best practices for collaboration and optimization. The web site (www.newriders.com) will provide code and extensions referenced in the book.

Self-Organizing Systems Thrasyvoulos Spyropoulos, Karin Anna Hummel, 2009-12-01 This book constitutes the refereed proceedings of the 4th International Workshop on Self-Organizing Systems, IWSOS 2009, held in Zurich, Switzerland, in December 2009. The 14 revised full papers and 13 revised short papers presented were carefully selected from the 34 full and 27 short paper submissions. The papers are organized in topical sections

on ad hoc and sensor networks; services, storage, and internet routing; peer-to-peer systems; theory and general approaches; overlay networks; peer-to-peer systems and internet routing; wireless networks; and network topics.

Resilience in the Digital Age Fred S. Roberts, Igor A. Sheremet, 2021-02-19 The growth of a global digital economy has enabled rapid communication, instantaneous movement of funds, and availability of vast amounts of information. With this come challenges such as the vulnerability of digitalized sociotechnological systems (STSs) to destructive events (earthquakes, disease events, terrorist attacks). Similar issues arise for disruptions to complex linked natural and social systems (from changing climates, evolving urban environments, etc.). This book explores new approaches to the resilience of sociotechnological and natural-social systems in a digital world of big data, extraordinary computing capacity, and rapidly developing methods of Artificial Intelligence. Most of the book's papers were presented at the Workshop on Big Data and Systems Analysis held at the International Institute for Applied Systems Analysis in Laxenburg, Austria in February, 2020. Their authors are associated with the Task Group "Advanced mathematical tools for data-driven applied systems analysis" created and sponsored by CODATA in November, 2018. The world-wide COVID-19 pandemic illustrates the vulnerability of our healthcare systems, supply chains, and social infrastructure, and confronts our notions of what makes a system resilient. We have found that use of AI tools can lead to problems when unexpected events occur. On the other hand, the vast amounts of data available from sensors, satellite images, social media, etc. can also be used to make modern systems more resilient. Papers in the book explore disruptions of complex networks and algorithms that minimize departure from a previous state after a disruption; introduce a multigrammatical framework for the technological and resource bases of today's large-scale industrial systems and the

transformations resulting from disruptive events; and explain how robotics can enhance pre-emptive measures or post-disaster responses to increase resiliency. Other papers explore current directions in data processing and handling and principles of FAIRness in data; how the availability of large amounts of data can aid in the development of resilient STSs and challenges to overcome in doing so. The book also addresses interactions between humans and built environments, focusing on how AI can inform today's smart and connected buildings and make them resilient, and how AI tools can increase resilience to misinformation and its dissemination.

GIS and Housing Laxmi Ramasubramanian,Jochen Albrecht,Deborah Rojas De Leon,2023-12-29 GIS and Housing: Principles and Practices discusses one of the challenges that has not been addressed by Geographic Information Science thus far: how can we use GIS to deal with the complex issues underlying the housing crisis? This book provides GIS technicians and analysts with an overview of US housing challenges and examples of how to effectively integrate spatial thinking to address housing policy questions, while simultaneously introducing housing policy analysts to advanced GIS concepts and techniques to create livable neighborhoods that include housing alternatives beyond the single family. Through numerous examples, the authors advocate for a collaborative approach that encourages professionals, policymakers, and analysts, across different ideological and political perspectives, to confront the multifaceted housing crisis. Features: Examines the historical aspects of housing provision, societal attitudes, demographic shifts, and government policies Bridges the gaps between housing professionals and GIS experts, facilitating an interdisciplinary approach to address the housing crisis Explores different challenges that are facing urban, suburban, and rural

neighborhoods in different US regions Provides professionals with the necessary tools for informed decision-making Proposes solutions that leverage the integrative capacity of GIS to address established housing issues. Advocates for denser housing alternatives to address issues of affordability, supply shortages, and homelessness This book is intended for graduate students and professionals in housing, community development, urban planning, architecture, and GIS, and anyone curious about learning more about the American housing crisis.

Atomic Bomb: The Story of the Manhattan Project Bruce Cameron Reed,2015-06-01 This volume, prepared by an acknowledged expert on the Manhattan Project, gives a concise, fast-paced account of all major aspects of the project at a level accessible to an undergraduate college or advanced high-school student familiar with some basic concepts of energy, atomic structure, and isotopes. The text describes the underlying scientific discoveries that made nuclear weapons possible, how the project was organized, the daunting challenges faced and overcome in obtaining fissile uranium and plutonium, and in designing workable bombs, the dramatic Trinity test carried out in the desert of southern New Mexico in July 1945, and the bombings of Hiroshima and Nagasaki.
