Zen in English Literature and Oriental Classics

R. H. Blyth, 2016-06-12 It was R.H Blyth's belief that all that is good in European literature and culture is simply and solely that which is in accordance with the Spirit of Zen. He thereafter applied himself to the task of searching the writings of East and West in an attempt to discover that Spirit. *Zen in English Literature and Oriental Classics* embraces the classical literature of China and Japan and the whole extent of English literature, with numerous quotations not only from English but also from French, German, Italian, and Spanish writing. *Don Quixote* has a chapter all to himself, and the author considers him possibly the purest example in all of world literature of a man who lives by Zen. In English, the Zen attitude toward life is found most consistently in Shakespeare, Wordsworth, Dickens, and Stevenson. This book is essential reading for anyone interested in Zen, haiku, or indeed English literature. R.H. Blyth was born in London in 1898 and studied English literature at London University. He traveled extensively in the East before moving first to Korea and then Japan and teaching English at several universities. Blyth eventually became the English tutor to the Crown Prince of Japan. He also studied Zen Buddhism under Kayama Taigi Roshi. Blyth was interned during the war years, and it was during this time that he wrote his first book, *Zen in English Literature*. He went on to write numerous other books on Zen, haiku, senryu, and humor. Blyth was a man whose sensibility took root in two

disparate cultures and found a harmony that he beautifully and effectively communicated in his writing.

Appellate Practice Handbook Edward J. Horowitz, 1982

Radar at Sea Derek Howse, 1993-02-09 This book tells in non-technical language how the British Navy contributed to the development of naval radar in World War 2. Addressed to the general reader, it tells not only the technical story in simple terms, but also of the operational use of shipborne radar at sea - for warning, for fire control, for fighter direction, for navigation, in all theatres of war - and particularly about the people who designed and fitted the equipment, and those who used it at sea.

The Watery Maze Bernard Fergusson, 1961 During Britain's darkest hour, in 1940, extraordinary measures were necessary for survival. This bleak period of defense against the Axis led to the formation of Combined Operations, a semi-independent unit composed of admirals, generals, and air marshals. It became Britain's offensive team which, in the end, was instrumental in the successful invasions of North Africa, Sicily, and Normandy. Here is the complete story of the creation of that unit, beginning with a series of daring raids on the coasts of Norway, France, Africa, and Madagascar. These raids often resulted in great loss of life, but the lessons they taught the command led to dramatic successes. Combined Operations grew up with the war and played a part in the ultimate Allied victory in Europe and also in the Suez campaign of 1956--Taken from the book

South Asia in the New World Order Shahid Javed Burki, 2011-03-24 Rapid changes have taken place in the structure of the global economy, and this book looks at how South Asia can take advantage of these changes. The author argues that the developing global economy will be more complex than originally thought, that instead of a bipolar model with two countries, the US and China, at the centre, it will be multipolar with eight centres of economic activity, including India. The book goes on to suggest that in the context of such a model, there should be regional cooperation between India and its immediate neighbouring countries for South Asia to advance as an economic region. It argues that South Asia will need to look at its history, and that changes in attitudes, particularly in India and Pakistan, are necessary. The possible benefits to the region, in terms of increases in the rates of economic growth if the regional approach is adopted, are discussed. The book presents a useful contribution to studies in South Asia, as well as Asian Economics.

Oliver Hazard Perry David C Skaggs, 2013-07-31
Hailed for his decisive victory over a Royal Navy squadron on Lake Erie in September 1813 and best known for his after-action report proclamation We have met the enemy and they are ours, Oliver Hazard Perry was one of the early U.S. Navy's most famous heroes. In this modern, scholarly reassessment of the man and his career, Professor David Skaggs emphasizes Perry's place in naval history as an embodiment of the code of honor, an exemplar of combat courage, and a symbol of patriotism to his fellow officers and the American public. It is the first biography of Perry to be published in more than a quarter of a century and the first to offer an even-handed analysis of his career. After completing a thorough examination of primary sources, Skaggs traces Perry's development from a midshipman to commodore where he personified the best in seamanship, calmness in

times of stress, and diplomatic skills. But this work is not a hagiographic treatment, for it offers a candid analysis of Perry's character flaws, particularly his short temper and his sometimes ineffective command and control procedures during the battle of Lake Erie. Skaggs also explains how Perry's short but dramatic naval career epitomized the emerging naval professionalism of the young republic, and he demonstrates how the Hero of Lake Erie fits into the most recent scholarship concerning the role of post-revolutionary generation in the development of American national identity. Finally, Skaggs explores in greater detail than anyone before the controversy over the conduct of his Lake Erie second, Jesse Duncan Elliott, that raged on for over a quarter century after Perry's death in 1819.

Asia-Pacific Rebalance 2025 Michael Green, Kathleen Hicks, Mark F. Cancian, 2016-02-04 In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This CSIS study fulfills that congressional requirement.

Defense Acquisitions James F. Wiggins, 2000-10 The proliferation of sophisticated anti-ship cruise missiles (ACM) threatens the ability of Navy ships to operate and survive close to hostile shores. The Navy directed a review of ship self-defense requirements. That study identified the capabilities needed by each ship class to defend against ACM threats. Since then, the Navy has

spent \$3.8 bill. to improve its ship self-defense capabilities against cruise missile attacks, and it plans to spend another \$5 bill. over the next 6 years. Assesses the Navy's progress in improving the self-defense capability of surface ships against ACM; and evaluates Navy plans for meeting future ACM self-defense requirements.

No Higher Honor Bradley Peniston,2006 The USS Samuel B. Roberts (FFG 58) was a small warship built for escort duty much like its namesake vessel, one of the tin can heroes of Leyte Gulf. But its commanding officer imbued his brand-new crew with their forebears' fighting spirit, and when the guided missile frigate was thrust into the Persian Gulf at the height of the Iran-Iraq War, there was no better ship for the job. Journalist Bradley Peniston draws on hundreds of documents and interviews to present the first book about the Roberts heroic actions.--BOOK JACKET.

Missile Inbound Jeffrey L. Levinson,Randy L. Edwards,1997 *Missile Inbound* examines the rules of engagement and how they were changed after the incident, as well as the formal inquiry that sought answers to why the Iraqi fighter had been labeled a friend by the American AWACS overhead and why the Stark's defense systems never warned that missiles had been fired.
