The Lightkeeper's Daughters Jean E.

Pendziwol, 2017-07-04 Jean Pendziwol's beautifully written novel captured me from the very first page. Its descriptions of the windswept lightkeeper's station of Elizabeth's and Emily's youth are so crisply rendered I felt I was standing on its shores watching the great ships cross the stormy waters of Lake Superior. Even more than its vivid evocation of a unique time and place, *The LightKeeper's Daughters* is a sensitive and moving examination of the nature of identity, the importance of family, and the possibility of second chances.—Heather Young, author of *The Lose Girls* With the haunting atmosphere and emotional power of *The Language of Flowers*, *Orphan Train*, and *The Light Between Oceans*, critically acclaimed children's author Jean E. Pendziwol's adult debut is an affecting story of family, identity, and art that involves a decades-old mystery. Though her mind is still sharp, Elizabeth's eyes have failed. No longer able to linger over her beloved books or gaze at the paintings that move her spirit, she fills the void with music and memories of her family, especially her beloved twin sister, Emily. When her late father's journals are discovered after an accident, the past suddenly becomes all too present. With the help of Morgan, a delinquent teenager performing community service at her senior home, Elizabeth goes through the diaries, a journey through time that brings the two women

closer together. Entry by entry, these unlikely friends are drawn deep into a world far removed from their own, to Porphyry Island on Lake Superior, where Elizabeth's father manned the lighthouse and raised his young family seventy years before. As the words on these musty pages come alive, Elizabeth and Morgan begin to realize that their fates are connected to the isolated island in ways they never dreamed. While the discovery of Morgan's connection sheds light onto her own family mysteries, the faded pages of the journals will shake the foundation of everything Elizabeth thinks she knows and bring the secrets of the past into the light.

A Flora of the State of New York John Torrey, New York (State). Natural History Survey, 1843

The Art of Haiku Stephen Addiss, 2022-11-29 In the past hundred years, haiku has gone far beyond its Japanese origins to become a worldwide phenomenon—with the classic poetic form growing and evolving as it has adapted to the needs of the whole range of languages and cultures that have embraced it. This proliferation of the joy of haiku is cause for celebration—but it can also compel us to go back to the beginning: to look at haiku's development during the centuries before it was known outside Japan. This in-depth study of haiku history begins with the great early masters of the form—like Basho, Buson, and Issa—and goes all the way to twentieth-century greats, like Santoka. It also focuses on an important aspect of traditional haiku that is less known in the West: haiku art. All the great haiku masters created paintings (called haiga) or calligraphy in connection with their poems, and the words and images were intended to be enjoyed together, enhancing each other, and each adding its own dimension to the reader's and viewer's understanding. Here one of the leading haiku scholars of the West takes us on a tour of haiku poetry's evolution, providing along the way a wealth of examples of the poetry and the art inspired by it.

Roman Mosaics in the J. Paul Getty Museum Alexis Belis, 2016-05-01 The mosaics in the collection of the J. Paul Getty Museum span the second through the sixth centuries AD and reveal the diversity of compositions found throughout the Roman Empire during this period. Elaborate floors of stone and glass tesserae transformed private dwellings and public buildings alike into spectacular settings of vibrant color, figural imagery, and geometric design. Scenes from mythology, nature, daily life, and spectacles in the arena enlivened interior spaces and reflected the cultural ambitions of wealthy patrons. This online catalogue documents all of the mosaics in the Getty Museum's collection, presenting their artistry in new color photography as well as the contexts of their discovery and excavation across Rome's expanding empire—from its center in Italy to provinces in southern Gaul, North Africa, and ancient Syria. The free online edition of this open-access catalogue, available at www.getty.edu/publications/romanmosaics/, includes zoomable high-resolution photography, embedded glossary terms and additional comparative images, and interactive maps drawn from the Digital Atlas of the Roman Empire. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book, CSV and JSON downloads of the object data from the catalogue, and JPG and PPT downloads of the main catalogue images.

Sinister Street (Complete) Compton

Mackenzie, 1913-01-01 From a world of daisies as big as moons and of mountainous green hillocks Michael Fane came by some unrealized method of transport to the thin red house, that as yet for his mind could not claim an individual existence amid the uniformity of a long line of fellows. His arrival coincided with a confusion of furniture, with the tramp of men backwards and forwards from a cavernous vehicle very dry and dusty. He found himself continually being lifted out of the way of washstands and skeleton chests of drawers. He was invited to sit down and keep quiet, and almost in the same breath to walk about and avoid hindrance. Finally, Nurse led him up many resonant stairs to the night-nursery which at present consisted of two square cots that with japanned iron bars stood gauntly in a wilderness of oilcloth surrounded by four walls patterned with a prolific vegetation. Michael was dumped down upon a grey pillow and invited to see how well his sister Stella was behaving. Nurse's observation was true enough: Stella was rosily asleep in an undulation of blankets, and Michael, threatened by many whispers and bony finger-shakes, was not at all inclined to wake her up. Nurse retired in an aura of importance, and Michael set out to establish an intimacy with the various iron bars of his cage. For a grown-up person these would certainly have seemed much more alike than even the houses of Carlington Road, West Kensington: for Michael each bar possessed a personality. Minute scratches unnoticed by the heedless adult world lent variety of expression: slight irregularities infused

certain groups with an air of deliberate consultation. From the four corners royal bars, crowned with brass, dominated their subjects. Passions, intrigues, rumours, ambitions, revenges were perceived by Michael to be seething below the rigid exterior of these iron bars: even military operations were sometimes discernible. This cot was guarded by a romantic population, with one or two of whose units Michael could willingly have dispensed: one bar in particular, set very much askew, seemed sly and malignant. Michael disliked being looked at by anybody or anything, and this bar had a persistent inquisitiveness which already worried him. 'Why does he look at me?' Michael would presently ask, and 'Nobody wants to look at such an ugly little boy,' Nurse would presently reply. So one more intolerable question would overshadow his peace of mind. Meanwhile, far below, the tramp of men continued, until suddenly an immense roar filled the room. Some of the bars shivered and clinked, and Michael's heart nearly stopped. The roar died away only to be succeeded by another roar from the opposite direction. Stella woke up crying. Michael was too deeply frightened so to soothe himself, as he sat clutching the pointed ears of the grey pillow. Stella, feeling that the fretful tears of a sudden awakening were insufficient, set up a bellow of dismay. Michael was motionless, only aware of a gigantic heart that shook him horribly. At last the footsteps of Nurse could be heard, and over them, the quick 'tut-tut-tuts' that voiced her irritation.

The Bat Illustrated Mary Roberts

Rinehart,2020-08-06 **The Bat** is a three-act play by Mary Roberts Rinehart that was first produced by Lincoln Wagenhals and Collin Kemper in 1920. The Extraordinary Voyage of Kamome Lori Dengler,2017-01-31 This sweet story, intended for lower elementary grades, is intended to provide a window for discussing earthquakes, tsunamis, marine debris, preparedness and cultural awareness in the classroom and within families. On April 7, 2013, a little over two years after the magnitude 9 Tohoku-oki Japan earthquake triggered a massive tsunami off the coast of northeastern Japan, a lone boat washed up on the shores of Crescent City, California. The confirmation of the boat as

belonging to a high school in Rikuzentakata was first step in an amazing story that has linked two tsunami-vulnerable communities on opposite sides of the Pacific and initiated friendships between high school students in Rikuzentakata.

Digital Light Daniel Palmer, Sean Cubitt, Nathaniel Tkacz, 2020-10-09 Light symbolises the highest good, it enables all visual art, and today it lies at the heart of billion-dollar industries. The control of light forms the foundation of contemporary vision. Digital Light brings together artists, curators, technologists and media archaeologists to study the historical evolution of digital light-based technologies. Digital Light provides a critical account of the capacities and limitations of contemporary digital light-based technologies and techniques by tracing their genealogies and comparing them with their predecessor media. As digital light remediates multiple historical forms (photography, print, film, video, projection, paint), the collection draws from all of these histories, connecting them to the digital present and placing them in dialogue with one another. Light is at once universal and deeply historical. The invention of mechanical media (including photography and cinematography) allied with changing print technologies (half-tone, lithography) helped structure the emerging electronic media of television and video, which in turn shaped the bitmap processing and raster display of digital visual media. Digital light is, as Stephen Jones points out in his contribution, an oxymoron: light is photons, particulate and discrete, and

therefore always digital. But photons are also waveforms, subject to manipulation in myriad ways. From Fourier transforms to chip design, colour management to the translation of vector graphics into arithmetic displays, light is constantly disciplined to human purposes. In the form of fibre optics, light is now the infrastructure of all our media; in urban plazas and handheld devices, screens have become ubiquitous, and also standardised. This collection addresses how this occurred, what it means, and how artists, curators and engineers confront and challenge the constraints of increasingly normalised digital visual media. While various art pieces and other content are considered throughout the collection, the focus is specifically on what such pieces suggest about the intersection of technique and technology. Including accounts by prominent artists and professionals, the collection emphasises the centrality of use and experimentation in the shaping of technological platforms. Indeed, a recurring theme is how techniques of previous media become technologies, inscribed in both digital software and hardware. Contributions include considerations of image-oriented software and file formats; screen technologies; projection and urban screen surfaces; histories of computer graphics, 2D and 3D image editing software, photography and cinematic art; and transformations of light-based art resulting from the distributed architectures of the internet and the logic of the database. Digital Light brings together high profile figures in diverse but increasingly convergent fields,

from academy award-winner and co-founder of Pixar, Alvy Ray Smith to feminist philosopher Cathryn Vasseleu. Hot to Cold Bjarke Ingels, 2015 Architecture is the art and science of accommodating the lives we want to live. Our cities and buildings aren't givens; they are the way they are because that is as far as we have come to date. They are the best efforts of our ancestors and fellow planetizens, and if they have shortcomings, it is up to us to continue that effort, pick up where they left off. Bjarke Ingels Group's (BIG) grand mission is to find a pragmatic utopia, shaping not only a particular structural entity, but the kind of world we wish to inhabit. This book examines BIG's odyssey of architectural adaptation
