Confessions of a Mask Yukio Mishima,1958 The story of a man coming to terms with his homosexuality in traditional Japanese society has become a modern classic.

Deadly Dialectics Roy Starrs,1994-10-01 Although Mishima's main literary ambition was to write philosophical novels in the tradition of Goethe and Thomas Mann, *Deadly Dialectics* is the first critical study to take this objective seriously: it also provides the first adequate account of Mishima's intellectual background and characteristic modes of thought and it is the first book to show the intimate and integral relation between his thought and his psychology and militant politics - or, more specifically, between his nihilism, his sexuality and his propensity to violence.

The most ambitious architectural programme of its kind worldwide, the Serpentine's annual Pavilion commission is one of the most anticipated events on the cultural calendar. We are thrilled to be working with one of the most fascinating architects in the world today. A visionary, who has conceived an extraordinary response to our invitation to design the Serpentine Gallery Pavilion, Sou Fujimoto has designed a structure that will enthral everyone that encounters it throughout the summer. --Julia Peyton-Jones, Director, and Hans Ulrich Obrist, Co-Director, Serpentine Gallery

American Framing Paul Andersen,Jayne Kelley,Paul Preissner,2023-03-23 From its origins in the Midwest in the early nineteenth century, the technique of light timber framing-also known at the time as Chicago construction-quickly came to underwrite the territorial and ideological expansion of the United States. Softwood construction was inherently practical, as its materials were readily available and required little skill to assemble. The result was a built environment that erased typological and class distinctions: no amount of money can buy you a better 2 x 4. This fundamental sameness paradoxically underlies the American culture of individuality, unifying all superficial differences. It has been both a cause and effect of the country's high regard for novelty, in contrast with the stability that is often assumed to be essential to architecture. *American Framing* is a visual and textual exploration of the social, environmental, and architectural conditions and consequences of this ubiquitous form of construction. For architecture, it offers a story of an American project that is bored with tradition, eager to choose economy over technical skill, and accepting of a relaxed idea of craft in the pursuit of something useful and new-the forming of an architecture that enables architecture.

Tomorrow-Land Joseph Tirella,2013-12-23 Motivated by potentially turning Flushing Meadows, literally a land of refuse, into his greatest public park, Robert Moses—New York's Master Builder—brought the World's Fair to the Big Apple for 1964 and '65. Though considered a financial failure, the 1964-65 World's Fair was a Sixties flashpoint in areas from politics to pop culture, technology to urban planning, and civil rights to violent crime. In an epic narrative, the New York Times bestseller *Tomorrow-Land* shows the astonishing pivots taken by New York City, America, and the world during the Fair. It fetched Disney's empire from California and Michelangelo's La Pieta from Europe; and displayed flickers of innovation from Ford, GM, and NASA—from undersea and outerspace colonies to personal computers. It housed the controversial work of Warhol (until Governor Rockefeller had it removed); and lured Ken Kesey and the Merry Pranksters. Meanwhile, the Fair—and its house band, Guy Lombardo and his Royal Canadians—sat in the musical shadows of the Beatles and Bob Dylan, who changed rock-and-roll right there in Queens. And as Southern civil rights efforts turned deadly, and violent protests also occurred in and around the Fair, Harlem-based Malcolm X predicted a frightening future of inner-city racial conflict. World's Fairs have always been collisions of eras, cultures, nations, technologies, ideas, and art. But the trippy, turbulent, Technicolor, Disney, corporate, and often misguided 1964-65 Fair was truly exceptional.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Discovering Craft Villages in Vietnam Sylvie Fanchette,Nicholas Stedman,2018-11-19 With their festivals and traditional industries, their commun halls, pagodas, temples, and vernacular buildings, the villages around Hà Nội possess a rich body of cultural, architectural and craft heritage. Less than one hour from the capital are over 500 specialist craft villages, producing an array of religious or artistic objects, as well as food products, industrial goods, textiles, basketware and much more. Despite the trials and tribulations Vietnam has endured, these traditions have remained alive; today they constitute the basis of material, social and spiritual culture among the village communities of the Red River delta. The artisans themselves, and their local institutions, see cultural tourism as a way of further improving the fortunes of the craft village communities and bringing their heritage to wider attention. Until recently, few guides or tourists had forayed into these settlements, some of which are lost in the maze of routes and tracks that criss-cross the rice paddies of the Hà Nội hinterland. The history and skills they harbour have been inaccessible to all but a few specialists. Few of the villages are signposted, yet between them they are home to three quarters of the architectural, religious and craft heritage of the upper delta. This book, the fruit of several years' research by specialists working in northern Vietnam, comprises ten itineraries, blending potted histories, legends, descriptions of craft techniques, signposted walks and maps, designed to introduce travellers and lovers of Vietnamese culture to forty or so villages around Hà Nội. Many of us have seen their wares on sale in shops in and around the 36 streets of Hà Nội Old Quarter or in other cities in West. This book is about the true lives and enduring skills of the nameless artisans who made them.

The Genius of Japanese Carpentry Azby Brown,2014-01-07 The Genius of Japanese Carpentry tells the story of the 1200-year-old Yakushiji monastery in Nara and the dedicated modern-day craftsmen who are working to restore what has been lost to the depredations of time, fire and warfare. Although the full monastery reconstruction will not be completed until 2030, one of the main temples, the Picture Hall, has been completely restored employing the same woodworking technology used to create the original building. This new edition of an architectural classic is by Azby Brown—one of the world's leading experts on Japanese architecture. It contains a new preface and many new text materials and photographs—most of them now available in color for the first time. Azby Brown chronicles the painstaking restoration of the temple through extensive interviews with the carpenters and woodworkers along with original drawings based on the plans of master carpenter Tsunekazu Nishioka. An inspiring testament to the dedication of these craftsmen and their philosophy of carpentry work as a form of personal fulfillment, The Genius of Japanese Carpentry offers detailed documentation of this singular project and a moving reminder of the unique cultural continuity found in Japan.
