Robert Pęczkowski

Lockheed P-38 J-L Lightning Robert Pęczkowski,2013

The P-38 was the only American fighter aircraft in production throughout American involvement in the war, from Pearl Harbor to VJ Day. With its unusual twin-boom design, this was one of the most distinctive fighters of WW2, and saw action in all theaters of the war, being especially effective in the Pacific area. This book describes the development of the later versions of this iconic warplane, with full technical details and many detail photos. Profusely illustrated with photos, including a comprehensive walk-around section showing all aspects of the airframe, and diagrams from official manuals. Includes 1/72nd and 1/48th scale plans, and color profiles showing many of the colorful schemes applied to the P-38 by its users.

STRIKES--THE LOCKHEED P-38 is a comprehensive history of one of the most successful and versatile aircraft of the Second World War. The book covers its design, production and technical details as well as its service in every USAAF combat theatre, with foreign air forces and as postwar civilian aircraft--supplemented by detailed appendices.

Lockheed P-38 Lightning Frederick A. Johnsen,1996 One

of a series of books designed for the layman which looks at military aircraft that have recently arrived in the marketplace. Special emphasis is placed on the design and performance aspects of the aircraft and detailed technical specifications are included.

Lockheed P-38 Lightning Jerry Scutts,2006 Lightning!

One of the best-named aircraft of WW2, the Lockheed P-38

was also one of the few fighters in production throughout hostilities. Immediately recognizable by its twin-boom tail layout, the P-38 Lightning was one of the mainstays of the USAAF's fighter inventory. Deployed in all theaters, Lightnings excelled in most, being one of the few American fighters armed with cannon. Subject to lengthy development throughout the war, the P-38 exemplified the technical peak reached by aeronautical engineers in the 1940s.
