Modelling the Rare Curtiss Fighters Jim Norfolk,1999-05-01 The second in a series of model aircraft plans books, this book tells the story of the successful and not so good aircraft that Curtiss Wright Aircraft Corp developed shortly before WW2. They started off well with the P-36, a breakthrough in fighter design and carried on with the famous P-40. They then tried to keep it going with various experimentals; the P-37, the P-42, P-46 and P-53, then finishing off with a near hit in the P-60 which turned out to be too little too late. These aircraft are designed for free flight powered with a rubber band but could be adapted to a small gas or electric motor. These models are around 1/24 th scale. The Book contains a brief description of the aircraft, design, construction and trimming and flying instructions. The book is well illustrated with photos showing each step of the way to successfully building the model. This book has been reviewed in several model magazines including Cartens Publications FLYING MODELS, MODEL FLYER (Br), Model Airplane News and MAAC Magazine.

You Suck at Racing Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

Salisbury, David Santiuste, and the volume editors, April Harper and Caroline Proctor. The volume concludes with a useful selection of further reading.

56th Fighter Group Roger Freeman,2000-10-25 One of the first Thunderbolt groups to see action in the European Theatre of Operations (ETO) with the US Army Air Forces, the 56th Fighter Group (FG) was also the only fighter unit within the Eighth Air Force to remain equipped with the mighty P-47 until war's end. Led by the inspirational 'Hub' Zemke, this group was responsible for devising many of the bomber escort tactics employed by VIII Fighter Command between 1943 and 1945. By VE-Day the 56th FG had shot down 100 more enemy aircraft than any other group in the Eighth Air Force, its pilots being credited with 677 kills during 447 missions. The exploits of this elite fighter unit are detailed in this volume together with photographs, their aircraft profiles and insignia.

The Greene Papers Wallace Martin Greene (Jr.),2016-03-24 General Wallace M. Greene Jr. was the 23d Commandant of the Marine Corps, serving from 1964 to 1967, a period in which American involvement in Vietnam increased dramatically. The Greene Papers: General Wallace M. Greene Jr. and the Escalation of the Vietnam War, January 1964-March 1965 contains more than 100 documents from the personal papers of General Greene and is the first edited volume of personal papers to be published by the Marine Corps History Division as a monograph. Produced by a member of the Joint Chiefs of Staff, General Greene's notes provide readers with a firsthand account from one of the main participants in the decision-making process that led to the commitment of a large-scale American expeditionary force in Southeast Asia. Because of President Lyndon B. Johnson's reticence to regularly consult the Joint Chiefs on military matters, however, the notes also give readers a second point of view: that of a frustrated advisor kept on the outside and forced to look in, observe, and reflect on major military decisions often made without his input or support. Also apparent are the tensions between Greene and President Johnson's aggressive and domineering Secretary of Defense, Robert S. McNamara. This volume begins in January 1964 and ends just before the landing of the 9th Marine Expeditionary Brigade at Da Nang on 8 March 1965, a pivotal moment that marked the official transition from the United States' advisory mission to a more active combat mission. In doing so, it traces Greene's growing frustration with McNamara's and Johnson's equivocation and uncertainty about Southeast Asia. Along with a series of commemorative pamphlets, this book is part of the Marine Corps History Division's effort to mark the fiftieth anniversary of the Vietnam War. Other publications available from the United States Marine Corps can be found here: <https://bookstore.gpo.gov/agency/922> Other publications about the Vietnam War can be found here: <https://bookstore.gpo.gov/catalog/us-military-history/battles-wars/vietnam-war>

All 10 key concepts of the syllabus have been developed in varied contexts along with an extensive range of mandatory and elective key ideas.Key Features:A contextual approach throughout--each chapter begins with questions, problems or situations that experienced teachers have found to spark students' interestA familiar format allowing students to quickly find information, whatever the context they may be studyingTeachers can develop contexts of their own choosing without restriction to a narrow set of pre-chosen contextsAn easy to follow progression through focus questions to the underlying key concepts and ideasMany and varied contextualised questions, problems and puzzles, including traditional closed-response questions as well as open-ended and stimulus-response questions - all essential for understanding'Novel Challenge' questions - drawn from unfamiliar

situations and designed to develop the higher order thinking (HOT) skillsEnd-of-chapter review questions - ranging from simpler practice questions requiring straight-forward use of principles and problem-solving (one and two star difficulty) to more challenging extension questions (three stars) requiring HOT skillsA focus on the tentative nature of scientific knowledge where throughout history accidents and serendipity have gone hand-in-hand with scientific investigationAn open, 'chatty' writing style that speaks directly to students but with sufficient depth to cover information they will need for tertiary studies in science and other physics-related areas such as engineering, medical science, computing, human movement etc.Gender-balanced contexts using material drawn from boys' and girls' spheres of experience vicon-coded stimulus ideas for experimental and non-experimental investigations suggested by physics teachers throughout the stateOnline SupportVisit the authors' Web Page containing on-line worked solutions to the end-of-chapter extension (challenging, complex, novel) questions and the Novel Challenge text-box questions, suggestions for Extended Experimental Investigations and hints to students who are about to undertake them, as well as a host of other resource material useful in developing a school work program.Go to seniorphysics.com and select the textbook webpage.

AERIAL NATIONALISM YOUNG EDWARD M,1995 In 1911 aviation was introduced to Thailand (then Siam) through a traveling air show. This dramatic form of technological innovation quickly became integral to the country's program of modernization as a means of gaining international respect. In this first detailed study of the development of aviation in Thailand, Edward M. Young, focusing on the pivotal years 1911-1945, traces the nationalistic impulses that drove the Thai quest for air power, first under the Thai royalty and then under the military regime that followed the coup d'etat in 1932. The book also examines the later development of the Thai air force, when it helped regain territory ceded to the French, participated in the Japanese advance in Burma, and later provided clandestine support to the Allies in World War II. Young shows how economic, technological, and political issues affected the country's choice of airplanes. The government's purchase of aviation equipment from such American companies as Curtiss Aeroplane and Consolidated in the 1920s, for example, reflected in part a growing desire to draw away from the influence of England and France. Aerial Nationalism details the benefits of an independent Thai air fleet, including modernization of the country and greatly improved communications. The book also discusses the problems involved in the rise of Thai aviation, including the challenges of fostering technology in a traditional society without a modern industrial base, allocating resources in a developing nation, and striking a balance between civil and military aviation.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. China's Wings Gregory Crouch,2012-02-28 From the acclaimed author of Enduring Patagonia comes a dazzling tale of aerial adventure set against the roiling backdrop of war in Asia. The incredible real-life saga of the flying band of brothers who opened the skies over China in the years leading up to World War II—and boldly safeguarded them during that conflict—China’s Wings is one of the most exhilarating untold chapters in the annals of flight. At the center of the maelstrom is the book’s courtly, laconic protagonist, American aviation executive William Langhorne Bond. In search of adventure, he arrives in Nationalist China in 1931, charged with turning around the turbulent nation’s flagging airline business, the China National Aviation Corporation (CNAC). The mission will take him to the wild and lawless frontiers of commercial aviation: into cockpits with daredevil pilots flying—sometimes literally—on a wing and a prayer; into the dangerous maze of Chinese politics, where scheming warlords and volatile military officers jockey for advantage; and into the boardrooms, backrooms, and corridors of power inhabited by such outsized figures as Generalissimo and Madame Chiang Kai-shek; President Franklin Delano Roosevelt; foreign minister T. V. Soong; Generals Arnold, Stilwell, and Marshall; and legendary Pan American Airways founder Juan Trippe. With the outbreak of full-scale war in 1941, Bond and CNAC are transformed from uneasy spectators to active participants in the struggle against Axis imperialism. Drawing on meticulous research, primary sources, and extensive personal interviews with participants, Gregory Crouch offers harrowing accounts of brutal bombing runs and heroic evacuations, as the fight to keep one airline flying becomes part of the larger struggle for China’s survival. He plunges us into a world of perilous night flights, emergency water landings, and the constant threat of predatory Japanese warplanes. When Japanese forces capture Burma and blockade China’s only overland supply route, Bond and his pilots must battle shortages of airplanes, personnel, and spare parts to airlift supplies over an untried five-hundred-mile-long aerial gauntlet high above the Himalayas—the infamous “Hump”—pioneering one of the most celebrated endeavors in aviation history. A hero’s-eye view of history in the grand tradition of Lynne Olson’s Citizens of London, China’s Wings takes readers on a mesmerizing journey to a time and place that reshaped the modern world.
