Chance Vought F7U-1 Cutlass Tommy H. Thomason, 2012 In 1946, the Navy embarked on the development of the Chance Vought F7U-1 Cutlass, a high-performance, carrier-based jet fighter that would be equal, if not superior, to any land-based fighter. It was tailless for compactness and weight reduction and incorporated afterburning jet engines for transonic speed performance and unparalleled rate of climb. This is a detailed account of how its bright promise went unrealized because the technology required to fulfill it was not yet mature. More than 200 pictures, many not previously published, and almost 70 illustrations, most created for this monograph by the author, augment the 44,000 words of text.

The First Combat Bomb Wing in World War II Ron Mackay, 2014 This is a study of one of the 8th USAAF's sub-units. The 1st Combat Bomb Wing (1CBW), created on 13 September 1943, was preceded first by the 1st Bomb Wing, and then the 101st Provisional Bomb Wing, which included the 91BG as an element. By then, the 91BG was joined by the 351BG and 381BG, with the 351BG later displaced by the 398BG. The operational experience of these units virtually spanned the entire 33 months of the Mighty Eighth's existence and the often costly but finally successful campaign to deny Hitler's Germany the means with which to pursue its warped dreams of conquest.

Grumman F8F Bearcat Corwin H. Meyer, Steve Ginter, 2008 By the last half of World War II, most new US fighter designs were much heavier and more complex than earlier fighters. When planning a replacement for their successful F6F Hellcat carrier fighter, however, Grumman chose to build as lightweight a design as possible around the most reliable large radial engine. The result was the F8F Bearcat, which was often called a hot rod by its pilots for its fantastic acceleration and climbing ability. Using the well-proven Pratt & Whitney R-2800 engine, the first Bearcat prototype flew on August 21, 1944. After minor modifications, including the addition of a dorsal fin, early production F8F-1s began armament tests and carrier qualification trials in early 1945. By May of 1945, the Bearcat was cleared for operations, with very few restrictions on its flight operations over its wide speed range. A total of 654 F8F-1s were delivered, all fitted with the 2,100 hp R-2800-34W engine.

Genda's Blade Henry Sakaida, Koji Takaki, 2003 Captain Minoru Genda was the mastermind behind the raid on Pearl Harbor. He was commander of the 343 Kokutai—an elite unit of handpicked pilots chosen to fly Japan's newest and most advanced fighter, the Shiden-Kai (George), in the bitter defensive air battles over the Japanese homeland during the first half of 1945. The authors have spent years tracing and interviewing former pilots of both the 343 Kokutai and the American carrier and bomber groups that they encountered, to piece together this dramatic story and tell it largely from the personal perspective. The narrative is spiced with 300 remarkable photographs, most of

which are published for the first time in an English language book. Accompanied by color artwork and written by acknowledged experts on Japanese military aviation, this book will be an essential requirement for any student of the Pacific air war.

British Warplanes of World War II Daniel J. March, 2000 Fully illustrated analysis of all World War II aircraft in British military service, including full descriptions and specifications, hundreds of action photos and highly accurate, full-color artwork.

United States Naval Aviation, 1910-1995 Roy A. Grossnick, 1997 This book was donated as a part of the David H. Hugel Collection, a collection of the Special Collections & Archives, University of Baltimore.

American Fighters Over Europe David Page Morgan, 2007 This informative guide describes colors and markings for U.S. Army Air Force fighters in the European and Mediterranean theaters of WWII. With more than 300 illustrations and 140 photographs, the book makes an excellent reference for modelers and aviation buffs alike.

P-36 Hawk Aces of World War 2 Lionel Persyn, Kari Stenman, Andrew Thomas, 2012-12-20 The Curtiss P-36 was considered a revolution in performance design in comparison to other US fighters. Yet by the time of the Japanese attack on Pearl Harbor the P-40 was increasingly supplanting the P-36, which the US then exported to France under the guise of the Hawk 75. Flown by the French, captured by the Germans, sold to the Finns, transferred to India and Africa, and even incorporated into the RAF, the Hawk 75 saw service in every theatre of operations and in a variety of combat environments. This book depicts the fascinating life of a plane that fought on both sides in the war, with colour artwork, photographs and first-hand accounts.

Round-engine Racers Nicholas A. Veronico, Nick Veronico, A. Kevin Grantham, 2002 The second title in the new RaceplaneTech series examines two of the most competitive types of air racers flown at the Cleveland Air Races (1946-1949) and today's National Championship Air Races, held each year at Reno, Nevada. Bearcats, often modified with engines nearly twice their original horsepower, have dominated the Reno air races since the early 1960s. Heavily modified Corsairs were the dominant aircraft in the post World War Two races, and at Reno, the Super Corsair is the bent-wing bird to beat. Racing Bearcats and Corsairs includes great photos and illustrations of Reno racing planes and explores the complex design and development work that is required to produce a racer. It details modifications made to the powerplants and airframes, and based on interviews with the pilots and crew chiefs, provides a first-hand account of this fascinating area of aviation.

Second Eden Carlton Austin, 2004-05 Envy. Deceit. Murder. War. Can human nature ever change? Will mankind take a fateful evolutionary leap and become a new species? Or are we doomed by our genes to forever spin on what the Hindus term the Wheel of Life? In *Second Eden*, the crew of the space shuttle Discovery II, sent to retrieve the Mars probe Areopagus, make an indisputable UFO sighting. Back on Earth they're held incommunicado on orders from CIA Director Carl Snow. Soon they're all dead, victims of a mysterious fire. But the shuttle pilot's best friend, ex-fighter pilot, defense analyst and legendary Cracker Jack fanatic Peter MacKenzie, hears rumors that HAM radio operators picked up transmissions from the Discovery II mentioning UFOs. Suspecting a cover-up, he vows to find out why his friend had to die.

Meanwhile, Professor Miles Lavisch discovers an enigmatic book locked inside a rock brought back by the Areopagus. Set to announce the shocking news at a Smithsonian Museum symposium, he is assassinated and the book disappears. Soon his daughter, Dr. Molly Lavisch, becomes a target too. Molly, a gene researcher who has a fetish for hotdogs and who clings stubbornly to her virginity without understanding why, meets Peter, who has never met a woman he hasn't conquered-until now. Thrust together in an uneasy alliance, Peter and Molly desperately race to recover the book and trade it for their lives, as a secret CIA cadre and Saudi double agent and terrorist financier Bandar Bliss doggedly pursue them. But a chance translation of the ancient book reveals that the Reconciliation Project, which will determine the fate of Earth and take the measure of every human soul, is well underway, fulfilling Judgment-Day prophecies from every major world religion in a way no one could have imagined.

The de Havilland Mosquito Michael John Hardy,1977

Thud Ridge Jack Broughton,Hanson Baldwin,2006 This is the story of a special breed of warrior, the fighter-bomber pilot; the story of valiant men who flew the F-105 Thunderchief 'Thud' Fighter-Bomber over the hostile skies of North Vietnam. From the briefing rooms to the bombing runs, Vice-Wing Commander Colonel Jack Broughton, recounts the tragedy and heartache, the high drama and flaming terror, the exhilaration and thrill of life on the edge. He relives the incredible feeling of high-speed, low-level sorties where SAM missiles, flak and MiGs were all in a day's work. The bravery of the pilots and their commitment to each other in times of extreme fear, crisis and catastrophe are highlighted by vivid, fast moving flying sequences. *Thud Ridge* is a fascinating and graphic memorial to the courage of the men, the power of their machines and their dedication to their mission.
