*Secret Stairs* Charles Fleming, 2010-04-01 Containing walks and detailed maps from throughout the city, *Secret Stairs* highlights the charms and quirks of a unique feature of the Los Angeles landscape, and chronicles the geographical, architectural, and historical aspects of the city's staircases, as well as of the neighborhoods in which the steps are located. From strolling through the classic La Loma neighborhood in Pasadena to walking the Sunset Junction Loop in Silver Lake, to taking the Beachwood Canyon hike through "Hollywoodland" to enjoying the magnificent ocean views from the Castellammare district in Pacific Palisades, *Secret Stairs* takes you on a tour of the staircases all across the City of Angels. The circular walks, rated for duration and difficulty, deliver tales of historic homes and their fascinating inhabitants, bits of unusual local trivia, and stories of the neighborhoods surrounding the stairs. That's where William Faulkner was living when he wrote the screenplay for *To Have and Have Not*; that house was designed by Neutra; over there is a Schindler; that's where Woody Guthrie lived, where Anais Nin died, and where Thelma Todd was murdered . . . Despite the fact that one of these staircases starred in an Oscar-winning short film—Laurel and Hardy's *The Music Box*, from 1932—these civic treasures have been virtually unknown to most of the city's residents and visitors. Now, *Secret Stairs* puts these hidden stairways back on the map, while introducing urban hikers to exciting new "trails" all around the city of Los Angeles.

**Fighting Traffic** Peter D. Norton, 2011-01-21 The fight for the future of the city street between pedestrians, street railways, and promoters of the automobile between 1915 and 1930. Before the advent of the automobile, users of city streets were diverse and included children at play and pedestrians at large. By 1930, most streets were primarily a motor thoroughfare where children did not belong and where pedestrians were condemned as "jaywalkers." In *Fighting Traffic*, Peter Norton argues that to accommodate automobiles, the American city required not only a physical change but also a social one: before the city could be reconstructed for the sake of motorists, its streets had to be socially reconstructed as places where motorists belonged. It was not an evolution, he writes, but a bloody and sometimes violent revolution. Norton describes how street users struggled to define and redefine what streets were for. He examines developments in the crucial transitional years from the 1910s to the 1930s, uncovering a broad anti-automobile campaign that reviled motorists as "road hogs" or "speed demons" and cars as "juggernauts" or "death cars." He considers the perspectives of all users—pedestrians, police (who had to become "traffic cops"), street railways, downtown businesses, traffic engineers (who often saw cars as the problem, not the solution), and automobile promoters. He finds that pedestrians and parents campaigned in moral terms, fighting for "justice." Cities and downtown businesses tried to regulate traffic in the name of "efficiency." Automotive interest groups, meanwhile, legitimized their claim to the streets by invoking "freedom"—a rhetorical stance of particular power in the United States. *Fighting Traffic* offers a new look at both the origins of the automotive city in America and how social groups shape technological change.

**Curbing Traffic** Chris Bruntlett, Melissa Bruntlett, 2021-06-29 In *Curbing Traffic: The Human Case for Fewer Cars in Our Lives*, mobility experts Melissa and Chris Bruntlett chronicle their experience living in the Netherlands and the benefits that result from treating cars as visitors rather than owners of the road. They weave their personal story with research and interviews with experts and Delft locals to help readers share the experience of living in a city designed for people. Their insights will help decision makers and advocates to better understand and communicate the human impacts of low-car cities: lower anxiety and stress, increased independence, social autonomy, inclusion, and improved mental and physical wellbeing. *Curbing Traffic* provides relatable, emotional, and personal reasons why it matters and inspiration for exporting the low-car city.

**Away with All Cars** Mr Social Control, 1991 A sincere and zealous protestation against the overabundance of motorised carriages together with some suggestions towards the elimination of this scourge in the form of an open letter to all motorists and being at once a manifesto and manifestation of the outlawed Pedestrian Freedom Front

**Architectonics of Game Spaces** Andri Gerber, Ulrich Götz, 2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

**High and Mighty** Keith Bradsher, 2004-01-19 SUVs have taken over America's roads. Ad campaigns promote them as safer and greener than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

**Everything and Less** Mark McGurl, 2021-10-19 National Book Critics Circle Award Finalist Best Book of Fall (*Esquire*) and a Most Anticipated Book of 2021 (Lit Hub) What Has Happened to Fiction in the Age of Platform Capitalism? Since it was first launched in 1994, Amazon has changed the world of literature. The "Everything Store" has not just transformed how we buy books; it has affected what we buy, and even what we read. In *Everything and Less*, acclaimed critic Mark McGurl explores this new world where writing is no longer categorized as high or lowbrow, literature or popular fiction. Charting a course spanning from Henry James to E. L. James, McGurl shows that contemporary writing has less to do with writing per se than with the manner of its distribution. This consumerist logic—if you like this, you might also like ...—has reorganized the fiction universe so that literary prize-winners sit alongside fantasy, romance, fan fiction, and the infinite list of hybrid genres and self-published works. This is an innovation to be cautiously celebrated. Amazon's platform is not just a retail juggernaut but an aesthetic experiment driven by an unseen algorithm rivaling in the depths of its effects any major cultural shift in history. Here all fiction is genre fiction, and the niches range from the categories of crime and science fiction to the more refined interests of Adult Baby Diaper Lover erotica. *Everything and Less* is a hilarious and insightful map of both the commanding heights and sordid depths of fiction, past and present, that opens up an arresting conversation about why it is we read and write fiction in the first place.

**Advanced Teaching Methods for the Technology Classroom** Petrina, Stephen, 2006-09-30 This book provides a comprehensive, critical approach to meeting the new challenges of technology in the classroom. It gathers together research on technology methods, principles, and content, acting as a reference source for proven and innovative methods. It presents an introduction to teaching educational technology, design, and engineering and contains strategies for innovation in technology education--Provided by publisher.

**Planet Palm** Jocelyn C. Zuckerman, 2021-01-05 Finalist, Helen Bernstein Book Award for Excellence in Journalism In the tradition of Eric Schlosser's *Fast Food Nation*, a groundbreaking global investigation into the industry ravaging the environment and global health—from the James Beard Award-winning journalist Over the past few decades, palm oil has seeped into every corner of our lives. Worldwide, palm oil production has nearly doubled in just the last decade: oil-palm plantations now cover an area nearly the size of New Zealand, and some form of the commodity lurks in half the products on U.S. grocery shelves. But the palm oil revolution has been built on

stolen land and slave labor; it's swept away cultures and so devastated the landscapes of Southeast Asia that iconic animals now teeter on the brink of extinction. Fires lit to clear the way for plantations spew carbon emissions to rival those of industrialized nations. James Beard Award-winning journalist Jocelyn C. Zuckerman spent years traveling the globe, from Liberia to Indonesia, India to Brazil, reporting on the human and environmental impacts of this poorly understood plant. The result is *Planet Palm*, a riveting account blending history, science, politics, and food as seen through the people whose lives have been upended by this hidden ingredient. This groundbreaking work of first-rate journalism compels us to examine the connections between the choices we make at the grocery store and a planet under siege.

**Urban Revolutions** Emilie Bahr, 2016-04-12 *Urban Revolutions* is a different kind of cycling book. Author Emilie Bahr draws on her own experience as an everyday cyclist and a transportation planner in New Orleans to demystify urban bicycling in this visually-compelling and fun-to-read field guide. What does it mean for a city to be bike-friendly? What makes bicycling a women's issue? What does it take to feel safe on a bike? How do you bike to work in the summer and still look professional? What is the most fun you can possibly have on two wheels without having to become an athlete? Bahr answers all these questions and more in her friendly and thoughtful essays and detailed practical tips.

**Tactical Urbanism** Mike Lydon, Anthony Garcia, 2015-03-17 Begins with an in-depth history of the Tactical Urbanism movement and its place among other social, political, and urban planning trends. With a detailed set of case studies that demonstrate the breadth and scalability of tactical urbanism interventions, this book provides a detailed toolkit for conceiving, planning, and carrying out projects.

**More Than Words** Graeme Burton, Richard Dumbleby, 2002-09-11 The authors cover the essential elements of communication, including communication between individuals and groups, in organizations and through mass media and new technologies.

**Over Easy** Mimi Pond, 2014-04-15 A fast-paced semi-memoir about diners, drugs, and California in the 1970s *Over Easy* is a brilliant portrayal of a familiar coming-of-age story. After being denied financial aid to cover her last year of art school, Margaret finds salvation from the straightlaced world of college and the earnestness of both hippies and punks in the wisecracking, fast-talking, drug-taking group she encounters at the Imperial Café, where she makes the transformation from Margaret to Madge. At first she mimics these new and exotic grown-up friends, trying on the guise of adulthood with some awkward but funny stumbles. Gradually she realizes that the adults she looks up to are a mess of contradictions, misplaced artistic ambitions, sexual confusion, dependencies, and addictions. *Over Easy* is equal parts time capsule of late 1970s life in California—with its deadheads, punks, disco rollers, casual sex, and drug use—and bildungsroman of a young woman who grows from a naïve, sexually inexperienced art-school dropout into a self-aware, self-confident artist. Mimi Pond's chatty, slyly observant anecdotes create a compelling portrait of a distinct moment in time. *Over Easy* is an immediate, limber, and precise semi-memoir narrated with an eye for the humor in every situation.

**1001 Video Games You Must Play Before You Die** Tony Mott, 2011-12-05 In fewer than fifty years videogames have become one of the most popular forms of entertainment, but which are the best games, the ones you must play? This action packed book presents the best videogames from around the world - from 80's classic Donkey Kong to Doom, Frogger and Final Fantasy. Covering everything from old favourites to those breaking new ground, these are the games that should not be missed. Video game expert Tony Mott presents 1001 of the best video games from around the world and on all formats, from primitive pioneering consoles like Atari's VCS to modern-day home entertainment platforms such as Sony's PlayStation 3. *1001 VIDEO GAMES* defines arcade experiences that first turned video gaming into a worldwide phenomenon such as Space Invaders, Asteroids, and Pac-Man - games that made the likes of Atari, Sinclair and Commodore household names. It also includes the games that have taken the console era by storm from Nintendo Wii to Sony Playstation and beyond - games of the modern era that have become cultural reference points in their own right including

multi-million selling series such as Halo, Grand Theft Auto and Resident Evil. For aficionados this is a keepsake - charting the highlights of the past fifty years giving them key information for games they must play. For those just discovering the appeal of gaming this extensive volume will provide everything they need to ensure they don't miss out on the games that revolutionized this overwhelmingly popular medium.

*Introduction to Psychology* Jennifer Walinga, Charles Stangor, This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section.

*The Miracle Pill* Peter Walker, 2021-01-21 'This book is pretty life-changing - encouraging, optimistic, rich with information. It got me off the sofa.' Jeremy Vine 'This is such a lovely, ambitious, fascinating book. Essential lockdown reading. It allows us to reimagine our world and our bodies: we can move more.' Dr Xand van Tulleken, TV presenter 'Truly uplifting' Chris Boardman What is the 'miracle pill', the simple lifestyle change with such enormous health benefits that, if it was turned into a drug, would be the most valuable drug in the world? The answer is movement and the good news is that it's free, easy and available to everyone. Four in ten British adults, and 80% of children, are so sedentary they don't meet even the minimum recommended levels for movement. What's going on? The answer is simple: activity became exercise. What for centuries was universal and everyday has become the fetishised pursuit of a minority, whether the superhuman feats of elite athletes, or a chore slotted into busy schedules. Yes, most people know physical activity is good for us. And yet 1.5 billion people around the world are so inactive they are at greater risk of everything from heart disease to diabetes, cancer, arthritis and depression, even dementia. Sedentary living now kills more people than obesity, despite receiving much less attention, and is causing a pandemic of chronic ill health many experts predict could soon bankrupt the NHS. How did we get here? Daily, constant exertion was an integral part of humanity for millennia, but in just a few decades movement was virtually designed out of people's lives through transformed workplaces, the dominance of the car, and a built environment which encourages people to be static. In a world now also infiltrated by ubiquitous screens, app-summoned taxis and shopping delivered to your door, it can be shocking to realise exactly how sedentary many of us are. A recent study found almost half of middle-aged English people don't walk continuously for ten minutes or more in an average month. At current trends, scientists forecast, the average US adult will expend little more energy in an average week than someone who spent all their time in bed. This book is a chronicle of this very modern and largely unexplored catastrophe, and the story of the people trying to turn it around. Through interviews with experts in various fields - doctors, scientists, architects and politicians - Peter Walker explores how to bring more movement into the modern world and, most importantly, into your life. Forget the gym, introducing quick and easy lifestyle changes can slow down the ageing process and even reverse many illnesses and increase mental wellbeing.

**Storyplaying** Sebastian Domsch, 2013-08-28 Incontestably, Future Narratives are most conspicuous in video games: they combine narrative with the major element of all games: agency. The persons who perceive these narratives are not simply readers or spectators but active agents with a range of choices at their disposal that will influence the very narrative they are experiencing: they are players. The narratives thus created are realizations of the multiple possibilities contained in the present of any given gameplay situation. Surveying the latest trends in the field, the volume discusses the complex relationship of narrative and gameplay.

**Jacked** David Kushner, 2012-04-03 Inside the making of a videogame that defined a generation: Grand Theft Auto Grand Theft Auto is one of the biggest and most controversial videogame franchises of all time. Since its first release in 1997, GTA has pioneered the use of everything from 3D graphics to the voices of top Hollywood actors and repeatedly transformed the world of gaming. Despite its incredible innovations in the \$75 billion game industry, it has also been a lightning rod of

debate, spawning accusations of ethnic and sexual discrimination, glamorizing violence, and inciting real-life crimes. Jacked tells the turbulent and mostly unknown story of GTA's wildly ambitious creators, Rockstar Games, the invention and evolution of the franchise, and the cultural and political backlash it has provoked. Explains how British prep school brothers Sam and Dan Houser took their dream of fame, fortune, and the glamor of American pop culture and transformed it into a worldwide videogame blockbuster Written by David Kushner, author of Masters of Doom and a top journalist on gaming, and drawn from over ten years of interviews and research, including firsthand knowledge of Grand Theft Auto's creators and detractors Offers inside details on key episodes in the development of the series, including the financial turmoil of Rockstar games, the infamous Hot Coffee sex mini-game incident, and more Whether you love Grand Theft Auto or hate it, or just want to understand the defining entertainment product of a generation, you'll want to read Jacked and get the real story behind this boundary-pushing game.

*Sakahàn* Greg A. Hill, Candice Hopkins, Christine Lalonde, 2013 This book celebrates a growing international commitment to the collection, study and exhibition of Indigenous art. Featuring more than 75 artists from around the world, this remarkable project places indigenous art squarely at the centre of contemporary art produced today. As well as providing an outstanding opportunity to see work by some of the most innovative contemporary artists, this ambitious publication allows us to build knowledge and further understanding. These artworks cite histories, stories and perspectives that emerge from specific local contexts, and as we live in an increasingly globalized world, these events affect us all. Unexpected and challenging, this profusely illustrated publication features over 150 artworks by artists from a wide range of countries, notably, Canada, the United States, Mexico, Australia, India, Japan, Finland and Guatemala and many more.
