Secret Stairs Charles Fleming,2010-04-01 Containing walks and detailed maps from throughout the city, Secret Stairs highlights the charms and quirks of a unique feature of the Los Angeles landscape, and chronicles the geographical, architectural, and historical aspects of the city's staircases, as well as of the neighborhoods in which the steps are located. From strolling through the classic La Loma neighborhood in Pasadena to walking the Sunset Junction Loop in Silver Lake, to taking the Beachwood Canyon hike through "Hollywoodland" to enjoying the magnificent ocean views from the Castellammare district in Pacific Palisades, Secret Stairs takes you on a tour of the staircases all across the City of Angels. The circular walks, rated for duration and difficulty, deliver tales of historic homes and their fascinating inhabitants, bits of unusual local trivia, and stories of the neighborhoods surrounding the stairs. That's where William Faulkner was living when he wrote the screenplay for To Have and Have Not; that house was designed by Neutra; over there is a Schindler; that's where Woody Guthrie lived, where Anais Nin died, and where Thelma Todd was murdered . . . Despite the fact that one of these staircases starred in an Oscar-winning short film—Laurel and Hardy's The Music Box, from 1932—these civic treasures have been virtually unknown to most of the city's residents and visitors. Now, Secret Stairs puts these hidden stairways back on the map, while introducing urban hikers to exciting new "trails" all around the city of Los Angeles.

Away with All Cars Mr Social Control,1991 A sincere and zealous protestation against the overabundance of motorised carriages together with some suggestions towards the elimination of this discourse in the form of an open letter to all motorists and being at once a manifesto and manifestation of the outlawed Pedestrian Freedom Front

Architectonics of Game Spaces Andri Gerber,Ulrich Götz,2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

Vintage Humour Alex Rowell,2018-05-01 Abu Nuwas, the pre-eminent bacchic bard of the classical Arabic canon, was loved and reviled in equal measure for his lyrical celebration of Abbasid Baghdad's dissolute nightlife, his cutting satires of religion and the clergy, and the extraordinary range and virtuosity of his literary talent. Vintage Humour contains approximately 120 translations, each replicating the monorhyme scheme of the originals, with commentary where appropriate, a brief history of the poet's life and times, and a glossary of the key themes, motifs, and running jokes of the poems themselves. Based on extensive research with both Arabic and English source materials, Vintage Humour is an illuminating collection, of interest to both general and informed readers with an interest in Islamic studies, Arabic literature, and the history of Iraq and the Middle East.

Everything and Less Mark McGurl,2021-10-19 National Book Critics Circle Award Finalist Best Book of Fall (Esquire) and a Most Anticipated Book of 2021 (Lit Hub) What Has Happened to Fiction in the Age of Platform Capitalism? Since it was first launched in 1994, Amazon has changed the world of literature. The "Everything Store" has not just transformed how we buy books; it has affected what we buy, and even what we read. In Everything and Less, acclaimed critic Mark McGurl explores this new world where writing is no longer categorized as high or lowbrow, literature or popular fiction. Charting a course spanning from Henry James to E. L. James, McGurl shows that contemporary writing has less to do with writing per se than with the manner of its distribution. This consumerist logic—if you like this, you might also like ...—has reorganized the fiction universe so that literary prize-winners sit alongside fantasy, romance, fan fiction, and the infinite list of hybrid genres and self-published works. This is an innovation to be cautiously celebrated. Amazon's platform is not just a retail juggernaut but an aesthetic experiment driven by an unseen algorithm rivaling in the depths of its effects any major cultural shift in history. Here all fiction is genre fiction, and the niches range from the categories of crime and science fiction to the more refined interests of Adult Baby Diaper Lover erotica. Everything and Less is a hilarious and insightful map of both the commanding heights and sordid depths of fiction, past and present, that opens up an arresting conversation about why it is we read and write fiction in the first place.

High and Mighty Keith Bradsher,2004-01-19 SUVs have taken over America's roads. Ad campaigns promote them as safer and greener than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In High and Mighty, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect—for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of Unsafe at Any Speed and Fast Food Nation, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

Over Easy Mimi Pond,2014-04-15 A fast-paced semi-memoir about diners, drugs, and California in the 1970s Over Easy is a brilliant portrayal of a familiar coming-of-age story. After being denied financial aid to cover her last year of art school, Margaret finds salvation from the straightlaced world of college and the earnestness of both hippies and punks in the wisecracking, fast-talking, drug-taking group she encounters at the Imperial Café, where she makes the transformation from Margaret to Madge. At first she mimics these new and exotic grown-up friends, trying on the guise of adulthood with some awkward but funny stumbles. Gradually she realizes that the adults she looks up to are a mess of contradictions, misplaced artistic ambitions, sexual confusion, dependencies, and addictions. Over Easy is equal parts time capsule of late 1970s life in California—with its deadheads, punks, disco rollers, casual sex, and drug use—and bildungsroman of a young woman who grows from a naïve, sexually inexperienced art-school dropout into a self-aware, self-confident artist. Mimi Pond's chatty, slyly observant anecdotes create a compelling portrait of a distinct moment in time. Over Easy is an immediate, limber, and precise semi-memoir narrated with an eye for the humor in every situation.

The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section.

The Miracle Pill Peter Walker,2021-01-21 'This book is pretty life-changing – encouraging, optimistic, rich with information. It got me off the sofa.' Jeremy Vine 'This is such a lovely, ambitious, fascinating book. Essential lockdown reading. It allows us to reimagine our world and our bodies: we can move more.' Dr Xand van Tulleken, TV presenter 'Truly uplifting' Chris Boardman What is the 'miracle pill', the simple lifestyle change with such enormous health benefits that, if it was turned into a drug, would be the most valuable drug in the world? The answer is movement and the good news is that it's free, easy and available to everyone. Four in ten British adults, and 80% of children, are so sedentary they don't meet even the minimum recommended levels for movement. What's going on? The answer is simple: activity became exercise. What for centuries was universal and everyday has become the fetishised pursuit of a minority, whether the superhuman feats of elite athletes, or a chore slotted into busy schedules. Yes, most people know physical activity is good for us. And yet 1.5 billion people around the world are so inactive they are at greater risk of everything from heart disease to diabetes, cancer, arthritis and depression, even dementia. Sedentary living now kills more people than obesity, despite receiving much less attention, and is causing a pandemic of chronic ill health many experts predict could soon bankrupt the NHS. How did we get here? Daily, constant exertion was an integral part of humanity for millennia, but in just a few decades movement was virtually designed out of people's lives through transformed workplaces, the dominance of the car, and a built environment which encourages people to be static. In a world now also infiltrated by ubiquitous screens, app-summoned taxis and shopping delivered to your door, it can be shocking to realise exactly how sedentary many of us are. A recent study found almost half of middle-aged English people don't walk continuously for ten minutes or more in an average month. At current trends, scientists forecast, the average US adult will expend little more energy in an average week than someone who spent all their time in bed. This book is a chronicle of this very modern and largely unexplored catastrophe, and the story of the people trying to turn it around. Through interviews with experts in various fields - doctors, scientists, architects and politicians - Peter Walker explores how to bring more movement into the modern world and, most importantly, into your life. Forget the gym, introducing quick and easy lifestyle changes can slow down the ageing process and even reverse many illnesses and increase mental wellbeing.

Storyplaying Sebastian Domsch,2013-08-28 Incontestably, Future Narratives are most conspicuous in video games: they combine narrative with the major element of all games: agency. The persons who perceive these narratives are not simply readers or spectators but active agents with a range of choices at their disposal that will influence the very narrative they are experiencing: they are players. The narratives thus created are realizations of the multiple possibilities contained in the present of any given gameplay situation. Surveying the latest trends in the field, the volume discusses the complex relationship of narrative and gameplay.
