Curtiss SOC Seagull Steve Ginter,2011 The Curtiss SOC Seagull was a United States single-engine scout observation biplane aircraft, designed by Alexander Solla of the Curtiss-Wright Corporation for the United States Navy. The aircraft served on battleships and cruisers in a seaplane configuration, being launched by catapult and recovered from a sea landing. The wings folded back against the fuselage for storage aboard ship. When based ashore or on carriers the single float was replaced by fixed wheeled landing gear.

The Hamlyn Concise Guide to British Aircraft of World War II David Mondey,2001-09-01 This volume provides a useful guide to the aircraft manufactured in Britain during WWII, including such fighters as Spitfire, Hurricane, and Tempest; bombers such as Blenheim, Halifax, and Wellington; and a miscellany of other aircraft such as Sunderland, Anson, Tiger Moth, and Austers.

United States Naval Aviation, 1919-1941 E.R. Johnson,2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

Air Power in the Nuclear Age M. J. Armitage,R. A. Mason,1985

Never Call Me a Hero N. Jack Kleiss,Timothy Orr,Laura Orr,2017-05-23 Hailed as the single most effective pilot at Midway (World War II magazine), Dusty Kleiss struck and sank three Japanese warships at the Battle of Midway, including two aircraft carriers, helping turn the tide of the Second World War. This is his extraordinary memoir. NATIONAL BESTSELLER • AN INSTANT CLASSIC —Dallas Morning News On the morning of June 4, 1942, high above the tiny Pacific atoll of Midway, Lt. (j.g.) Dusty Kleiss burst out of the clouds and piloted his SBD Dauntless into a near-vertical dive aimed at the heart of Japan's Imperial Navy, which six months earlier had ruthlessly struck Pearl Harbor. The greatest naval battle in history raged around him, its outcome hanging in the balance as the U.S. desperately searched for its first major victory of the Second World War. Then, in a matter of seconds, Dusty Kleiss's daring 20,000-foot dive helped forever alter the war's trajectory. Plummeting through the air at 240 knots amid blistering anti-aircraft fire, the twenty-six-year-old pilot from USS Enterprise's elite Scouting Squadron Six fixed on an invaluable target—the aircraft carrier Kaga, one of Japan's most important capital ships. He released three bombs at the last possible instant, then desperately pulled out of his gut-wrenching 9-g dive. As his plane leveled out just above the roiling Pacific Ocean, Dusty's perfectly placed bombs struck the carrier's deck, and Kaga erupted into an inferno from which it would never recover. Arriving safely back at Enterprise, Dusty was met with heartbreaking news: his best friend was missing and presumed dead along with two dozen of their fellow naval aviators. Unbowed, Dusty returned to the air that same afternoon and, remarkably, would fatally strike another enemy carrier, Hiryu. Two days later, his deadeye aim contributed to the destruction of a third Japanese warship, the cruiser Mikuma, thereby making Dusty the only pilot from either side to land hits on three different ships, all of which sank—losses that crippled the once-fearsome Japanese fleet. By battle's end, the humble young sailor from Kansas had earned his place in history—and yet he stayed silent for decades, living quietly with his children and his wife, Jean, whom he married less than a month after Midway. Now his extraordinary and long-awaited memoir, *Never Call Me a Hero*, tells the Navy Cross recipient's full story for the first

time, offering an unprecedentedly intimate look at the the decisive contest for control of the Pacific in World War II (New York Times)—and one man's essential role in helping secure its outcome. Dusty worked on this book for years with naval historians Timothy and Laura Orr, aiming to publish *Never Call Me a Hero* for Midway's seventy-fifth anniversary in June 2017. Sadly, as the book neared completion in 2016, Dusty Kleiss passed away at age 100, one of the last surviving dive-bomber pilots to have fought at Midway. And yet the publication of *Never Call Me a Hero* is a cause for celebration: these pages are Dusty's remarkable legacy, providing a riveting eyewitness account of the Battle of Midway, and an inspiring testimony to the brave men who fought, died, and shaped history during those four extraordinary days in June, seventy-five years ago.

Biomimetics for Architecture & Design Göran Pohl, Werner Nachtigall, 2015-10-30 This book provides the readers with a timely guide to the application of biomimetic principles in architecture and engineering design. As a result of a combined effort by two internationally recognized authorities, the biologist Werner Nachtigall and the architect Göran Pohl, the book describes the principles which can be used to compare nature and technology, and at the same time it presents detailed explanations and examples showing how biology can be used as a source of inspiration and "translated" in building and architectural solutions (biomimicry). Even though nature cannot be directly copied, the living world can provide architects and engineers with a wealth of analogues and inspirations for their own creative designs. But how can analysis of natural entities give rise to advanced and sustainable design? By reporting on the latest bionic design methods and using extensive artwork, the book guides readers through the field of nature-inspired architecture, offering an extraordinary resource for professional architects, engineers, designers and urban planners, as well as for university teachers, researchers and students. Natural evolution is seen throughout the book as a powerful resource that can serve architecture and design by providing innovative, optimal and sustainable solutions.

Wings of the Fleet Peter Freeman, 2012-07-01 This book covers the relatively little-documented period in US Navy and Marine Corps aviation 'between the wars' from 1919-1941', which is widely regarded as the 'Golden Era', when US Navy and Marine Corps aircraft carried some of the most striking schemes and markings ever seen. Over 550 different aircraft model designations appeared during this period, many numbering only a handful of aircraft, but of those which went in to full scale production, many were significant aircraft which contributed to the development of naval aviation worldwide. With scores of full color profile and 4-view illustrations, and some well selected representative contemporary photos, the book covers aircraft development, color schemes and markings, in a chronological format, presenting each aircraft type from its first entry into service until obsolescence, with a cutoff date of 7 December 1941 - the date that the United States of America entered World War Two - allowing the reader to appreciate the gradual evolution of the many color schemes and markings, both service and unit applied.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

B-25 Mitchell Units of the CBI Edward M. Young,2018-11-29 Flying from and between bases in China and India, the B-25s bombed every type of Japanese target during World War 2 in the China-Burma-India (CBI) Theatre, ultimately dropping more ordinance than their larger four-engined B-24 Liberator brethren. Mitchell bombers took on the task of disrupting the flow of Japanese supplies to the frontlines at medium ranges, bombing Japanese supply centres, railway depots and bridges. It was in this last capacity that the B-25 established a unique role as a 'bridge-buster'. This provided significant support for the British Fourteenth Army as they advanced into Burma. Fully illustrated with detailed cutaway artwork, this book tells the important, yet forgotten story of B-25 operations in the CBI Theatre and the important role that this aircraft played on the road to victory.
