Latex Concrete Habitat Albert Knott, George Nez, 2005 In many war torn and poverty stricken regions, the indigenous architecture has been heavy mud and wattle roofs on thick mud walls. These structures, while cool in the summer, are of very low strength, are maintenance intensive, are time consuming to build, and are largely in massive disrepair. Replacing these mud structures with the light weight roofs of latex concrete produces a permanent architecture significantly more safe and strong, of very low maintenance, and of remarkably low cost, as the roofs can be built by available unskilled labor. The time required for reconstruction is considerably shorter than the time required to replace the older heavy construction, and the self-help characteristic of this new form of construction leads to more rapid recovery from disaster. This how-to-do-it manual teaches people how to build these new roofs.

Building Art Paul Goldberger, 2017-11-14 Here, from Pulitzer Prize-winning critic Paul Goldberger, is the first full-fledged critical biography of Frank Gehry, undoubtedly the most famous architect of our time. Goldberger follows Gehry from his humble origins—the son of working-class Jewish immigrants in Toronto—to the heights of his extraordinary career. He explores Gehry’s relationship to Los Angeles, a city that welcomed outsider artists and profoundly shaped him in his formative years. He surveys the full range of his work, from the Bilbao Guggenheim to the Walt Disney Concert Hall in L.A. to the architect’s own home in Santa Monica, which galvanized his neighbors and astonished the world. He analyzes his carefully crafted persona, in which an amiable surface masks a driving ambition. And he discusses his use of technology, not just to change the way a building looks, but to revolutionize the very practice of the field. Comprehensive and incisive, *Building Art* is a sweeping view of a singular artist—and an essential story of architecture’s modern era.

Earthbag Building Kaki Hunter, Donald Kiffmeyer, 2004-11-19 The only comprehensive, illustrated, step-by-step guide to building with earthbags. Over seventy percent of Americans cannot afford to own a code-enforced, contractor-built home. This has led to widespread interest in using natural materials—straw, cob, and earth—for building homes and other buildings that are inexpensive, and that rely largely on labor rather than expensive and often environmentally-damaging outsourced materials. *Earthbag Building* is the first comprehensive guide to all the tools, tricks, and techniques for building with bags filled with earth—or earthbags. Having been introduced to sandbag construction by the renowned Nader Khalili in 1993, the authors developed this Flexible Form Rammed Earth Technique over the last decade. A reliable method for constructing homes, outbuildings, garden walls and much more, this enduring, tree-free architecture can also be used to create arched and domed structures of great beauty—in any region, and at home, in developing countries, or in emergency relief work. This profusely illustrated guide first discusses the many merits of earthbag construction, and then leads the reader through the key elements of an earthbag building: Special design considerations Foundations, walls, and floors Electrical, plumbing, and shelving Lintels, windows and door installations Roofs, arches and domes Exterior and interior plasters. With dedicated sections on costs, making your own specialized tools, and building code considerations, as well as a complete resources guide, *Earthbag Building* is the long-awaited, definitive guide to this uniquely pleasing construction style. Earth Architecture Ronald Rael, 2009 The ground we walk on and grow crops in also just happens to be the most widely used building material on the planet. Civilizations throughout time have used it to create stable warm low-impact structures. The world's first skyscrapers were built of mud brick. Paul Revere Chairman Mao and Ronald Reagan all lived in earth houses at various points in their lives and several of the buildings housing Donald Judd's priceless collection at the Chinati Foundation in Marfa Texas are made of mud brick. While the vast legacy of traditional and vernacular earthen construction has been widely discussed, little attention has been paid to the contemporary tradition of earth architecture. Author Ronald Rael founder of Eartharchitecture.org provides a history of building with earth in the modern era focusing particularly on projects constructed in the last few decades that use rammed earth mud brick compressed earth cob and several other interesting techniques. *Earth Architecture* presents a selection of more than 40 projects that exemplify new creative uses of the oldest building material on the planet.--BOOK JACKET.

Adobe , 1985 This book explores the depths of adobe and enables the reader to build their own home intelligently and realistically. With an emphasis on adobe construction, McHenry discusses the planning of every aspect of one's home from the financing to the foundation, the floors to the fireplaces. The prospective builder must be prepared for a long period of frustration, doubt, worry, and plain hard work, but the helpful ideas found on the pages of this book will encourage readers to build despite the challenges. McHenry describes this process as a tremendous puzzle, for which one must create and arrange all the pieces, and then live with the result. McHenry begins with a brief history of adobe and then moves on to the planning of the home, emphasizing the influence of individual ideas. The intention of this book is to help bridge the gap between architects, builders, craftsmen, and the unskilled but determined individual who wants to build their own home. This book outlines the technical aspects of adobe construction with several pictures and figures to simplify production. The creation of a home, from the earliest design concepts to successful completion, is one of the most rewarding experiences one can ever have. McHenry's *Adobe* offers a realistic and straightforward guide to doing it yourself. His advice regarding adobe is useful for professionals and amateurs alike.

Nicolaes Witsen and Shipbuilding in the Dutch Golden Age A. J. Hoving, Diederick Wildeman, 2012-03-29 In 1671, Dutch diplomat and scientist Nicolaes Witsen published a book that served, among other things, as an encyclopedia for the “shell-first” method of ship construction. In the centuries since, Witsen’s rather convoluted text has also become a valuable source for insights into historical shipbuilding methods and philosophies during the “Golden Age” of Dutch maritime trade. However, as André Wegener Sleeswyk’s foreword notes, Witsen’s work is difficult to access not only for its seventeenth-century Dutch language but also for the vagaries of its author’s presentation. Fortunately for scholars and students of nautical archaeology and shipbuilding, this important but chaotic work has now been reorganized and elucidated by A. J. Hoving and translated into English by Alan Lemmers. In *Nicolaes Witsen and Shipbuilding in the Dutch Golden Age*, Hoving, master model builder for the Rijksmuseum in Amsterdam, sorts out the steps in Witsen’s method for building a seventeenth-century pinas by following them and building a model of the vessel. Experimenting with techniques and materials, conducting research in other publications of the time, and rewriting as needed to clarify and correct some vital omissions in the sequence, Hoving makes Witsen’s work easier to use and understand. *Nicolaes Witsen and Shipbuilding in the Dutch Golden Age* is an indispensable guide to Witsen’s work and the world of his topic: the almost forgotten basics of a craftsmanship that has been credited with the flourishing of the Dutch Republic in the seventeenth century. To view a sample of Ab Hoving’s ship model drawings, please visit: <http://nautarch.tamu.edu/shiplab/AbHoving.htm>

Patterns of India Christine Chitnis, 2020-03-03 It’s the trip of a lifetime—a textile-based tour of colorful Rajasthan, India featuring more than 200 lush photographs depicting everyday life in one of the most vibrant regions in the world. “Get lost in the beauty of the photographs in *Patterns of India*, a striking journey through the colorful Indian state of Rajasthan.”—BuzzFeed *Patterns of India* is a visual experience that offers intimate insights into the diverse and richly hued Western Indian culture. Color is the thread that binds the vast country together, defining every aspect of life from religion and politics to food and dress. Organized by the five dominant colors royal blue, sandstone, marigold, ivory, and rose, this book explores how deeply color and pattern exist in a symbiotic relationship and are woven into every part of the culture. For instance, the fuchsia found in the draping fabric of a sari is matched by the vibrant chains of roses offered at temple, and the burnt orange spices in the marketplaces are reflected in the henna tattoos given to brides and wedding guests. While every color is imbued with meaning, it is often within the details of patterns that the full story comes to light. Photographer and writer Christine Chitnis spent over a decade traveling through, getting to know, and falling in love with the intricate patterns of everyday Rajasthani life. With history and culture-based essays woven throughout the more than 200 stunning photographs of architecture, markets, cuisine, art, textiles, and everyday goings-on, *Patterns of India* captures the beauty and essence of this unique part of the world.

The Traditional Crafts of Egypt Menha el-Batraoui, Minhah Baṭrāwī, 2016 Many traditional crafts practiced in contemporary Egypt can be traced back hundreds, if not thousands, of years. Scenes inscribed on the

walls of ancient temples and tombs depict the earliest Egyptians making pottery and papyrus and working with stone, wood, and other materials. The eleven chapters of this volume explore these and other crafts that continue to flourish in Egypt. From copper and glass works to jewelry, woodwork, and hand-woven carpets and fabric, each chapter offers an in-depth look at one material or craft and the artisans who keep its traditions alive. The authors, drawing on historical sources and documentary research, sketch the evolution of each craft, looking into its origins, the development of tools and methods used in the craft, and the diverse influences that have shaped the form and function of craft items produced today, ranging widely through the pharaonic, Coptic, Islamic, and modern periods. This historical examination is complemented by extensive field research and interviews with craftsmen and women, which serve to set these crafts into a living cultural context and offer a window into the modern craft economy, the lives of craftspeople, and the local communities and traditions they express and sustain. The volume is amply illustrated with vivid photographs of contemporary craft items and artisans at work, from the coastal town of Damietta to the far-flung deserts and the ancient alleyways of Cairo. It is a narrative and visual tour that provides valuable insight into contemporary Egypt as seen through its material culture and the legions of unsung artists who nourish and enrich it.

The Small Adobe House Agnesa Reeve,2001 This book is both an introduction to adobe structures and an idea book for those who want to remodel a classic home or build a new one. 80 photos, 75 in full color.

Lessons from Vernacular Architecture Willi Weber,Simos Yannas,2013-08-15 The architectural community has had a strong and continuing interest in traditional and vernacular architecture. Lessons from Vernacular Architecture takes lessons directly from traditional and vernacular architecture and offers them to the reader as guidance and inspiration for new buildings. The appropriate technical and social solutions provided by vernacular and traditional architecture are analysed in detail. International case studies focus on environmental design aspects of traditional architecture in a broad range of climatic conditions and building types.

Seismic Stabilization of Historic Adobe Structures Getty Conservation Institute,2000-11-30 This book describes tests performed on model adobe buildings to evaluate seismic damage mitigation techniques applicable to the retrofitting of historic and culturally significant adobe structures. Part of the Getty Seismic Adobe Project (GSAP), the three-year program outlined in this volume was designed to develop and test minimally invasive, inexpensive, and easily implemented methods of protecting such structures from severe earthquake damage. Small- and large-scale models were tested on computer-controlled shaking tables at Stanford University and at the IIZIS Earthquake Engineering Laboratory in the Republic of Macedonia, respectively. The authors identify typical failure modes of adobe structures and describe specific retrofit techniques to help minimize such failures. Extensive photographic documentation is included.

Research Methods for the Architectural Profession Ajla Aksamija,2021-03-03 Research Methods for the Architectural Profession introduces research as a systematic process, describes how to formulate research questions, provides an in-depth explanation of different research methods (qualitative, quantitative, and experimental), and explains how to select appropriate research methods and execute research studies. It describes the process of documentation, knowledge dissemination, and application of research results in architectural design and practice. Most importantly, it provides guidelines for integrating research into profession and uses extensive case-studies and practice-relevant examples to illustrate main concepts, procedures, and applications. Integrating research into practice is essential for developing new knowledge, solving design and technical problems, overcoming different types of challenges present in the contemporary profession, and improving the design outcomes. Innovation requires a much stronger correlation between research and design, and it is pertinent for the future of architectural practice that research becomes an integral part of architectural profession. This book provides a roadmap for successfully integrating research into architectural design and for establishing innovative practices, regardless of a firm's size. Written by an architecture professor with an extensive research and professional background—specifically focusing on integrating research into practice—and richly illustrated with over 150 color images, this reference will be useful for both students and practitioners.

Shahnameh Abolqasem Ferdowsi,2016-03-08 The definitive translation by Dick Davis of the great national epic of Iran—now newly revised and expanded to be the most complete English-language edition A Penguin Classic Dick Davis—"our pre-eminent translator from the Persian" (The Washington Post)—has revised and expanded his acclaimed translation of Ferdowsi's masterpiece, adding more than 100 pages of newly translated text. Davis's elegant combination of prose and verse allows the poetry of the Shahnameh to sing its own tales directly, interspersed sparingly with clearly marked explanations to ease along modern readers. Originally composed for the Samanid princes of Khorasan in the tenth century, the Shahnameh is among the greatest works of world literature. This prodigious narrative tells the story of pre-Islamic Persia, from the

mythical creation of the world and the dawn of Persian civilization through the seventh-century Arab conquest. The stories of the Shahnameh are deeply embedded in Persian culture and beyond, as attested by their appearance in such works as The Kite Runner and the love poems of Rumi and Hafez. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Mud Ball - How I Dug Myself Out of the Daily Grind Atulya K. Bingham,2015-07-09 I couldn't teach another lesson. Nor could I tolerate another day with a boss, a punch card, and the indigestion I suffered from bolting my muesli. This was why I'd spent the past five months camping in a remote Turkish field. Then the first winter storm crashed through the valley, turning my tent into a canvas pole dancer. It dawned on me I might need a house. There were only two problems: I had just \$6000 left in my account, and 6 weeks before winter. Despite having very little money, almost no building experience, and endless naysayers who told her she would fail, Atulya K. Bingham completed her lovely earthbag home. Her personal, inspirational story shows how anyone can build their own sustainable home with earthbags. Dr. Owen Geiger, Director of the Geiger Research Institute of Sustainable Building, author of the Natural Building Blog and Earthbag Building website. A joy from beginning to end - a brave, funny, moving account of building a new life and a new home out of mud in Turkey's mountain wilderness. Sara Crowe, author of Bone Jack (Nominated for the Carnegie Medal in 2015).
