Ask the Pilot Patrick Smith,2004 Though we routinely take to the air, for many of us flying remains a mystery. Few of us understand the how and why of jetting from New York to London in six hours. How does a plane stay in the air? Can turbulence bring it down? What is windshear? How good are the security checks? Patrick Smith, an airline pilot and author of Salon.com's popular column, Ask the Pilot, unravels the secrets and tells you all there is to know about the strange and fascinating world of commercial flight. He offers: A nuts and bolts explanation of how planes fly Insights into safety and security Straight talk about turbulence, air traffic control, windshear, and crashes The history, color, and controversy of the world's airlines The awe and oddity of being a pilot The poetry and drama of airplanes, airports, and traveling abroad In a series of frank, often funny explanations and essays, Smith speaks eloquently to our fears and curiosities, incorporating anecdotes, memoir, and a life's passion for flight. He tackles our toughest concerns, debunks conspiracy theories and myths, and in a rarely heard voice dares to return a dash of romance and glamour to air travel.

Airliner Models Anthony J Lawler,2019-10-08 For most of the past century, beautiful models of airliners have been made to promote their airlines' services in travel agents and their own shops. The models also illustrate the evolution of airliner design over these decades: the wood and fabric biplanes of the 1920s, the broad adoption of all-metal airliners in the 1930s, the first jet airliners of the 1950s, the first wide-body airliners of the 1970s and the pioneering small steps in supersonic air travel are all covered. The increasingly colourful exterior schemes adopted by the airlines, to ensure recognition by aspiring passengers, provide an interesting subtext. For model collectors, the airliner type, makers name, scale, approximate age and the materials used are detailed for each model illustrated. A short history of significant model-making companies is covered. With the onset of online bookings and the closure of airline offices and travel agents, the use of models is fast vanishing forever. The focus of this book is to preserve this fascinating era when models were a significant marketing tool, and to ensure that these models, at least in photographic form, survive as a record for future generations.

QF32 Richard de Crespigny,2012-08-01 QF32 is the award winning bestseller from Richard de Crespigny, author of the forthcoming Fly!: Life Lessons from the Cockpit of QF32 On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the riveting, blow-

by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013

Island Fantasia Wei-Ping Lin, 2021-10-07 The Matsu archipelago between China and Taiwan, for long an isolated outpost off southeast China, was suddenly transformed into a military frontline in 1949 by the Cold War and the Communist-Nationalist conflict. The army occupied the islands, commencing more than 40 long years of military rule. With the lifting of martial law in 1992, the people were confronted with the question of how to move forward. This in-depth ethnography and social history of the islands focuses on how individual citizens redefined themselves and reimagined their society. Drawing on long-term fieldwork, Wei-Ping Lin shows how islanders used both traditional and new media to cope with the conflicts and trauma of harsh military rule. She discusses the formation of new social imaginaries through the appearance of 'imagining subjects', interrogating their subjectification processes and varied uses of mediating technologies as they seek to answer existential questions. A Feast of Vultures Josy Joseph, 2016-07-10 'Every day, millions of people - the rich, the poor and the many foreign visitors -- are hunting for ways to get their business done in modern India. If they search in the right places and offer the appropriate price, there is always a facilitator who can get the job done. This book is a sneak preview of those searches, the middlemen who do those jobs, and the many opportunities that the fast-growing economy offers.' Josy Joseph draws upon two decades as an investigative journalist to expose a problem so pervasive that we do not have the words to speak of it. The story is big: that of treacherous business rivalries, of how some industrial houses practically own the country, of the shadowy men who run the nation's politics. The story is small: a village needs a road and a hospital, a graveyard needs a wall, people need toilets. *A Feast of Vultures* is an unprecedented, multiple-level inquiry into modern India, and the picture it reveals is both explosive and frightening. Within these covers is unimpeachable evidence against some of the country's biggest business houses and political figures, and the reopening of major scandals that have shaped its political narratives. Through hard-nosed investigations and the meticulous gathering of documentary evidence, Joseph clinically examines and irrefutably documents the non-reportable. It is a troubling narrative, but also a call to action and a cry for change. A tour de force through the

wildly beating heart of post-socialist India, the book is a must-read for anyone interested in understanding the large, unwieldy truth about this nation.

A Pilot's Guide for Fearful Flyers Chris Manno, 2017-09-09 For fearful flyers yearning to join family and friends winging off to faraway adventures, knowledge is power: what to expect, how to prepare, coping mechanisms and a flight walk-through with an insider view. Environmental Barrier Coatings Kang N. Lee , 2020-12-29 The global increase in air travel will require commercial vehicles to be more efficient than ever before. Advanced engine hot section materials are a key technology required to keep fuel consumption and emission to a minimum in next-generation gas turbines. Ceramic matrix composites (CMCs) are the most promising material to revolutionize gas turbine hot section materials technology because of their excellent high-temperature properties. Rapid surface recession due to volatilization by water vapor is the Achilles heel of CMCs. Environmental barrier coatings (EBCs) is an enabling technology for CMCs, since it protects CMCs from water vapor. The first CMC component entered into service in 2016 in a commercial engine, and more CMC components are scheduled to follow within the next few years. One of the most difficult challenges to CMC components is EBC durability, because failure of EBC leads to a rapid reduction in CMC component life. Key contributors to EBC failure include recession, oxidation, degradation by calcium-aluminum-magnesium silicates (CMAS) deposits, thermal and thermo-mechanical strains, particle erosion, and foreign object damage (FOD). Novel EBC chemistries, creative EBC designs, and robust processes are required to meet EBC durability challenges. Engine-relevant testing, characterization, and lifing methods need to be developed to improve EBC reliability. The aim of this Special Issue is to present recent advances in EBC technology to address these issues. In particular, topics of interest include but are not limited to the following: • Novel EBC chemistries and designs; • Processing including plasma spray, suspension plasma spray, solution precursor plasma spray, slurry process, PS-PVD, EB-PVD, and CVD; • Testing, characterization, and modeling; • Lifing.

Trailblazer in Flight Yvonne Pope Sintes, Graham M. Simons, 2013-10-27 Yvonne Pope Sintes only ever wanted to fly. But in the 1950s, very few women were allowed into the male dominated world of aviation. Whilst many women were consigned to the role of house-wife, Yvonne chose a different path. Her dream was to join the ranks of the Royal Air Force, crisscrossing international skies. Despite an awareness of the pitfalls that might await her, she embarked upon her mission. Her story, told here for the first time and in her own words, is one characterized by gritty determination against the odds, a startling level of achievement and a continually modest approach to life and her own accomplishments.??A career trajectory marked by such landmark achievements as becoming the first female Air Traffic Controller with the Ministry of Aviation, the first female civil airline pilot in the UK, and the first female jet airline captain in Britain are relayed in this inspiring autobiography. ??Bomb scares, engine failures and other perilous episodes

punctuated Yvonne's experience. All are enlivened during the course of the narrative. A raft of prestigious awards including the Brabazon Cup, the International Owner and Pilots Association award for best Air Traffic Controller in Europe, the Amelia Earhart memorial Scholarship for licensed pilots to advance in aviation, the Whitney Straight Award for courage and determination in pursuit of an aviation career (awarded by Princess Anne) and the British Airline Pilots Association Award for work towards air safety – all were awarded to Yvonne during the course of a spectacular career, the details of which make for a truly inspiring and engrossing read.??Yvonne has taken this opportunity to record the pitfalls and landmark successes of her career for posterity. She does so in a style that is at once both humble and immensely celebratory of a profession that has meant so much to her.??I first met Yvonne and her husband Miguel in Mahon during September 1992 when I was researching my book on Dan-Air. It was immediately clear that she had a rare and fascinating story that deserved telling in its entirety to reach a much wider audience. I am pleased and proud to have played a small part in making that happen! - Graham M. Simons, Editor??As featured in the Surrey Advertiser, Essence Magazine and Discover Your History

Nuts! Kevin Freiberg, Jackie Freiberg, 1998-02-17 Twenty-five years ago, Herb Kelleher reinvented air travel when he founded Southwest Airlines, where the planes are painted like killer whales, a typical company maxim is Hire people with a sense of humor, and in-flight meals are never served--just sixty million bags of peanuts a year. By sidestepping reengineering, total quality management, and other management philosophies and employing its own brand of business success, Kelleher's airline has turned a profit for twenty-four consecutive years and seen its stock soar 300 percent since 1990. Today, Southwest is the safest airline in the world and ranks number one in the industry for service, on-time performance, and lowest employee turnover rate; and Fortune magazine has twice ranked Southwest one of the ten best companies to work for in America. How do they do it? With unlimited access to the people and inside documents of Southwest Airlines, authors Kevin and Jackie Freiberg share the secrets behind the greatest success story in commercial aviation. Read it and discover how to transfer the Southwest inspiration to your own business and personal life.

The Evolution of the Airline Industry James Baldwin, 2019-08-18 This book gives a brief but concise narrative on the evolution of the airline industry from its beginnings to the present day. The focus is on regulations, historic events and influencing factors that shaped the industry. Starting with the Wright Flyer, the book details the early conventions and regulatory framework, the development of the commercial airline industry through the 1930s, World War II and the Chicago Convention, that created the current regulatory framework of the industry. The book then goes into the regulated and protectionist era and developments that eventually led to the deregulation and liberalization of the industry. At this point, the industry transcended from heavy government involvement to an industry driven by economic factors. Following this change, the industry experienced unprecedented growth leading to the formation of the so-called Sixth Freedom airlines, the airline alliances and the low-cost and ultra-low-cost carriers. This book is an excellent guide to how the airline industry evolved into what it is today.

Douglas Twinjets Thomas Becher, 2002 The Douglas twinjet family, the DC-9; MD-80; MD-90 and Boeing 717, is beaten only by the Boeing 737 to the title of most popular airliner. In this book the author describes the background, design, development and use of these popular and easily recognizable aircraft, from their origins in the 1960s to the 21st century.

MiG-21 Fishbed Hans-Heiri Stapfer, 2004 The MiG-21 resulted from a 1953 Soviet Air Force specification. The MiG-21 began production in 1959 and would continue in production until 1985, making it not only the most produced supersonic jet aircraft ever, but also the longest production run of any combat aircraft. It has been in use with nearly fifty different countries around the world and remains in use by some countries even today. This title includes inside and out coverage of the MiG-21 SM/M (Fishbed J), M/SM (Modified) (Fishbed J), MF (Fishbed J), bis Lazur (Fishbed L), and bis SAU (Fishbed N) variants: with details on the airframes, cockpits, landing gear, engines and weapons. Illustrated with over 123 b/w and 97 color photos, 12 color drawings, 11 b/w drawings.

The Legacy of the DC-3 Henry M. Holden, 1996 Discover the remarkable history of the airplane that changed the world. Featuring almost 500 photographs and illustrations, The Legacy of the DC-3, is an exciting, detailed account of the development of the DC-3/C-47. Considered the most beloved and historically-important aircraft ever manufactured, the DC-3 flew over 100 billion miles and carried 700 million passengers. From the beginning of Donald Douglas' career through the war years to the DC-3s of today, this book captures the DC-3's many amazing accomplishments, as well as interesting behind-the-scenes stories of the personalities and struggles that shaped the airplane dubbed 'Queen of the Skies.' Author Henry M. Holden's extensive research includes a roster of every surviving DC-3/C-47 he could locate, as well as details on each variant product. The Legacy of the DC-3, is a 'must-have' book for the aviation historian, researcher, engineer, casual reader and 'buff'.
