Thomas Paul Odom

*Panhard Armoured Car* Simon Dunstan,2019-03-05 In the history of armoured fighting vehicles, there have been few that have been so successful or so extensively employed as the Panhard AML armoured car. Based on the British Ferret armoured car, the French-built Panhard AML was first used in combat during the war in Algeria in the early 1960s. Thereafter the AML has fought in numerous wars, notably in Africa, up until the present day with ongoing operations against Boko Haram in Nigeria and Chad. It also fought on the side of the Argentinians during the Falklands War in 1982, and the war on ISIS in 2016. Now with an experienced military author, who was given full and exclusive access to an AML armoured car, this is the latest modern armoured fighting vehicle to receive the Haynes treatment. The Panhard Armoured Car Enthusiasts' Manual is fully illustrated with archive photos, technical drawings and detailed photography.

A Photo History of Armoured Cars in Two World Wars George Forty,1984 Shows armored cars produced by the U.S., Great Britain, and Europe for use in World Wars I and II

Ford M8 and M20 David Doyle,2021-04-28 Developed to provide the US military with a fast-moving reconnaissance vehicle sufficiently armed to knock out WWII-era armored vehicles. The M8 Armored Car and its sibling, the M20 Armored Utility Vehicles, were the most widely used armored vehicles built by Ford. These vehicles saw use with the US Army as well as Allied nations during WWII and well into the 1960s. This book chronicles the development and use of the vehicle from concept to combat. Through dozens of archival photos, many never before published, as well as detailed photographs of some of the finest existent examples of these vehicles, this iconic tank is explored, and its history is explained.

Italian Armoured & Reconnaissance Cars 1911–45 Filippo Cappellano,Pier Paolo Battistelli,2018-07-26 The first Italian armoured cars were used in the war in Libya in 1911-12 against the Ottoman Empire. With few tanks being developed, the Italians relied instead on the development of more mobile armoured cars like the Ansaldo Lancia 1 Z, during World War I, but post-war the army, focusing on the Alpine battlegrounds of Italy's northern borders, did not consider armoured cars suitable for reconnaissance duties. The experience of the Spanish Civil War would provide the much needed last push for the Italians to develop modern armoured cars. The result were the famous AB 41-43 models, which fought against the British in North Africa and Marshall Tito's forces in Yugoslavia, along with other vehicles such as the AS 36 light armoured car. Using detailed colour plates and contemporary photographs, this book examines the development of the Italian armoured car in the two world wars and the inter-war years, from the deserts of North Africa to the slopes of the Alps.

*The AMX 13 Light Tank* M.P. Robinson,Peter Lau,Guy Gibeau,2017-09-30 The AMX 13 was originally designed in the immediate aftermath of the Second World War. It represents French ambitions for national resurgence and withdrawal from wartime dependence on American military technology. Being a light tank it was an ambitious and far sighted departure from conventional tank design and it found a ready export market as well as being a critical part in the French Army arsenal. Its basic hull design lent itself to the development of a vast list of variants. French designers progressively modernized, and indeed reinvented, the AMX13 and enabled it to claim to be one of the most successful armored vehicle programs of the postwar period. It proved its worth in numerous small wars worldwide in the service of many countries. This, the first commercially published work on the AMX13 in English, examines in detail the technical industrial and tactical story of this remarkably successful armored fighting vehicle. The authoritative text is backed by an impressive selection of images

AMX30 Main Battle Tank Enthusiasts' Manual M.P. Robinson,Col. Thomas Seignon,2020-02-18 The AMX30 Char de Bataille was the standard French Main Battle Tank during the Cold War era. Armed with a smoothbore 105mm main armament (the OBUS-G), AMX30 was lighter and more mobile than other main battle tanks, with excellent acceleration and cross-country agility (which later came into its own during the First Gulf War). For this reason it found a ready export market for those armies that did not want a fully-fledged Main Battle Tank. Foreign customers included Greece, Spain, Saudi Arabia, UAE, Iraq, Chile, Venezuela, Cyprus, Qatar and Bosnia. French AMX30 tanks saw combat with Division Daguet in the Gulf War and with the Qataris at the Battle of Khafji in the First Gulf War in 1991. Later versions of the tank were still in service in the Middle East in 2019--

**South African Armour of the Border War 1975–89** Kyle Harmse,Simon Dunstan,2017-02-23 The Border War saw the biggest armoured battles in Africa since World War II. Starting as a counter-insurgency operation by the South African Defence Force (SADF) against the South West Africa People's Organisation, South Africa became embroiled in the complex Angolan Civil War, where they came up against enemies well supplied with equipment and armoured vehicles from the Soviet Union. With the aid of stunning illustrations and photographs, this study details the characteristics, capabilities and performance of the wide variety of armoured vehicles deployed by the SADF, from the Eland armoured car to the Ratel infantry combat vehicle and the Olifant tank. Designed for the unique conditions of the region, South Africa's armour was distinctive and innovative, and has influenced the design of counterinsurgency armoured vehicles around the world. Frequently requested by Osprey readers, and written by two renowned experts on armoured vehicles, this will appeal to all those interested in modern armour and the Cold War proxy wars.

**The Volkswagen Kübelwagen Type 82 in World War II** Janusz Piekalkiewicz,2008 The famed World War II vehicle - the German equivalent of the American Jeep is presented here in a superb collection of vintage photographs, and detailed text included testing, production, guidebooks, and technical manuals. Included are the many variants that saw use on a variety of war fronts throughout the Second World War with special coverage of its extensive use in North Africa.

*The Rolls-Royce Armoured Car* David Fletcher,2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the

Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

*Leopard 1 Main Battle Tank Owners' Workshop Manual* Michael Shackleton, Michael K. Cecil, 2020 The Leopard 1 family became the first fully-German developed series of armoured combat vehicles to be built since the end of the Second World War. Using the German-built version of the British L7 105mm gun the Leopard focused on firepower and with its impressive cross-country performance it was unmatched by most other tank designs of the era--

**The Tank Book** DK, 2017-04-03 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armoured vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or Mother as it was known, had arrived. In *The Tank Book* you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat - the fastest armoured fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men - such as Mikail Koshkin and Sir William Tritton - who designed these awe-inspiring beasts. Produced with The Tank Museum, *The Tank Book* traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armour, weaponry, and much more. If you are interested in modern warfare, *The Tank Book* is truly unmissable reading.

**Panther Tank Enthusiasts' Manual** Mark Healy, 2019-08-27 Regarded by many as one of the greatest tanks ever built, the German Panther is probably the finest medium tank of the Second World War and certainly the most numerous German panzer in wartime service, with some 7,000 built. It combined firepower, armour protection and mobility that was unmatched by any other tank of the period. In the *Panther Tank Enthusiasts' Manual*, author Mark Healy looks at the development, construction and fighting qualities of the Panther, as well as including insights into what it was like to operate and maintain. He focuses on surviving Panthers at the German Armour Museum in Munster (Panther Ausf A) and the later Panther Ausf G at the Tank Museum, Bovington, as his centrepieces and draws on a range of documentary and photographic information sources in Germany, the USA and France.
